the entire document is considered
completed by the communities.

FOREWARD

The staff of Lake Country Fire & Rescue (LCFR) are continuously striving to find new ways to protect the citizens we serve, visitors, businesses, and the environment in our response area. Responding to emergencies resulting from these hazards possess challenges that cannot be adequately addressed within the routine operations of the fire department and local government(s) which requires a separate set of guidelines to follow in the event of an emergency.

To meet these special set of challenges, LCFR developed a Comprehensive Emergency Management Plan (CEMP). This plan is a result of collaborative efforts between LCFR command staff and Waukesha County Emergency Management to ensure consistency with County, State, and Federal plans.

The CEMP provides LCFR with a framework/foundation for responding to special emergencies within our response area beyond the day-to-day routine 911 call categories. The CEMP establishes a unified command structure for emergency response operations to ensure a coordinated and effective response. The CEMP also incorporates the concepts and processes of the National Incident Management System (NIMS) as a standard for emergency response operations. The goal for this plan is to protect the public and respond efficiently and effectively to significant incidents that threaten life, property, public safety, and the environment in our communities.

The Comprehensive and Integrated Emergency Management Model (upon which modern emergency management is based) provides the design for the CEMP. This Comprehensive Emergency Management Plan includes a four-phase functional structure of mitigation, preparedness, response, and recovery. This framework allows for a continuous and sustained process of pre-incident, trans-incident, and post-incident activities. Integration ensures a horizontal and vertical unity of effort among all levels of government and all elements of a community.

The CEMP as a policy document must remain a dynamic and flexible instrument that will change and mature with each update. The format of this CEMP closely follows the Waukesha County Emergency Management Plan so in the case of a large event where Waukesha County Emergency Management is dispatched to our response area to assist us, all agencies will be following a similar framework and all plans will intertwine seamlessly.

We are confident that this CEMP will perform as it is intended; this tool will improve and strengthen responses between the communities in our area along with our State, local and County agency partners.

Respectfully,

Matthew Fennig – Fire Chief
Lake Country Fire & Rescue
Emergency Manager

PROMULGATION LETTER

Letter of declaration/promulgation will be inserted here once all 3 communities adopt and sign off on this plan.

HOW TO USE THIS DOCUMENT

LCFR has strategically structured this CEMP around its programs that protect the community. The Comprehensive Emergency Management Program includes performing mitigation/ prevention, preparedness, response, and recovery activities. The CEMP document has five major components:

Component 1: CEMP BASIC PLAN:

Provides a general overview and summary of the purpose, responsibilities, and operational concepts of the CEMP.

Component 2: Appendix I:

Addresses the “Mitigation” phase.

Component 3: Appendix II:

Addresses the emergency management “Preparedness” phase.

Component 4: Appendix III:

Addresses the “Response, Emergency Support Functions” (ESF) phase.

Component 5: Appendix IV:

Addresses the “Recovery” phase.

BASIC PLAN SECTIONS

- I. INTRODUCTION**
- II. SITUATION**
- III. CONCEPT OF OPERATIONS**
- IV. RESPONSIBILITIES**
- V. FINANCIAL MANAGEMENT**
- VI. ATTACHMENTS**

CEMP COMPONENT PARTS

Annex I – Mitigation

Annex II – Preparedness

**Annex III – Response
Emergency Support
Functions (ESFs)**

Annex IV – Recovery

**LAKE COUNTRY FIRE & RESCUE
COMPREHENSIVE EMERGENCY MANAGEMENT PLAN (CEMP)
BASIC PLAN**

I. INTRODUCTION

A. DEFINED

1. This CEMP describes the basic strategies, assumptions, and mechanism through which Lake Country Fire & Rescue (LCFR) will mobilize resources and conduct activities to guide, coordinate, and support local emergency management efforts. To facilitate effective intergovernmental operations, this CEMP adopts a functional approach that groups the type of assistance that the response area requires under the Emergency Support Functions (ESFs). Each ESF is headed by a primary department which is required within each ESF. ESFs are the primary mechanisms that manage assistance during an emergency.
2. Each department and non-governmental organization with a role or responsibility in the implementation of the CEMP must become familiar with this CEMP to ensure efficient and effective execution of emergency responsibilities. Each department and participating agency must develop and maintain departmental emergency plans and/or standard operating procedures (SOP's). By being prepared before the catastrophe happens, LCFR can better service its citizens and people in its response area at the time of the emergency.

B. PURPOSE, SCOPE, ASSUMPTIONS

1. Purpose

a. To provide:

1. Guidance in all phases of emergency management: mitigating/preventing, preparing for, responding to and recovering from emergencies that threaten life or property within the response area of LCFR.
2. An organizational framework that will guide response and recovery actions.
3. A mechanism for interagency and community-wide cooperation and coordination.

2. Scope

a. This CEMP:

1. Establishes fundamental policies, program strategies and assumptions for a comprehensive emergency management program that all communities LCFR serve can adopt.

2. Establishes a method of operations that spans the direction and control of an emergency from initial monitoring through post-disaster response, recovery, and mitigation.
3. Defines the mechanisms to facilitate delivery of immediate assistance, including direction and control of the intrastate, State response, and recovery assistance.
4. Assigns specific functions to appropriate response area agencies and organizations, as well as outlines methods to coordinate with the private sector and voluntary organizations.
5. Addresses the various types of emergencies that are likely to occur from local emergencies, to minor, to major or catastrophic disasters.
6. Identifies the actions that the Emergency Manager will initiate, in coordination with County, State, and Federal counterparts as appropriate, regardless of the magnitude of the disaster.

3. Assumptions

a. This plan is based upon the concepts that emergency functions for various groups involved in emergency management will generally parallel their normal day-to-day functions. To the extent possible, the same personnel and material resources will be employed in both cases. It is generally true, however, that a disaster is a situation in which the usual way of doing things no longer suffices. It is desirable, and always attempted, to maintain organizational continuity and to assign familiar tasks to personnel. Day-to-day functions that do not contribute directly to the emergency operation may be suspended for the duration of any emergency. Efforts that would normally be required of those functions will be redirected to accomplish the emergency task by the agency concerned. Assumptions include, but are not limited to:

1. While it is likely that outside assistance would be available in most major disaster situations affecting LCFR's response area and while plans have been developed to facilitate coordination of this assistance, it is necessary for LCFR to be prepared to carry out disaster responses and short-term recovery operations in an independent basis.
2. A major emergency can exhaust the resources of a single jurisdiction or directly impact more than one jurisdiction. It may require resources from numerous agencies and levels of government.
3. Incidents will be operated under the local guidelines, Mutual Aid Box Alarm System (MABAS) and may go as far as the Unified Command System in accordance with the National Incident Management System (NIMS). In keeping with the nationwide strategy of the Integrated Emergency Management System (IEMS), this plan is concerned with all types of emergency situations that may develop. It also accounts for activities before, during, and after emergency operations.

C. OBJECTIVES

1. The objectives of LCFR are to protect public health and safety and to prevent loss of life, to preserve property and the environment, to assure continuity of government and government operations, to restore the community to normal, to mitigate/prevent the causes of damage, and to prepare the response area in advance of an emergency. Specifically, LCFR strives to:
 - a. **Protect Public Health and Safety and Prevent Loss of Life:** includes efforts to save human life, treat the injured, warn the public to avoid further casualties, evacuate people from impacted areas, direct people to shelter and mass care, coordinate mass prophylaxis (prevention) if warranted, monitor and regulate safety of food and water.
 - b. **Preserve Property and the Environment** includes measures to save property from destruction, prevent further loss, provide security for property, especially in evacuated areas, and prevent contamination to the environment.
 - c. **Assure Continuity of Government and Government Operations:** provides for lines of succession for elected and appointed officials and assures that critical functions of government can be reconstituted and conducted with minimal interruption.
 - d. **Restore the Community to Pre-Incident Conditions:** restore essential infrastructure, the social fabric, as well as the economic basis of the community.
 - e. **Mitigate/Prevent the Causes of Damage:** implement mitigation measures to prevent damage from a similar emergency that may occur in the future.
 - f. **Prepare the Response Area in Advance of an Emergency** includes developing action plans on how to respond to and recover from emergencies, training staff on how to perform the duties and responsibilities, exercising the plans and modifying the plans based on the experiences of real life emergencies and plan exercises.

D. METHODOLOGY

1. This plan was developed by a planning process coordinated with the Waukesha County Emergency Management, LCFR's Emergency Manager and LCFR's command staff.
2. This plan is approved and implemented by the Emergency Management Director.
 - a. Fire Chief Matthew Fennig is the Emergency Management Director for the City of Delafield, the Village of Nashotah, the Village of Chenequa, the Village of Wales, the Village of Oconomowoc Lake, the Town of Genesee, and the Town of Delafield.
3. Plan maintenance and record of changes:

- a. LCFR's Emergency Management Director ensures that necessary changes and revisions to the plan are prepared, coordinated, published and distributed. This plan and its contents are to be reviewed annually and amended as necessary.
- b. This plan will undergo revision/amendments whenever:
 1. Information errors or omissions have been identified.
 2. New issues, requirements, or supplementary material have been identified which are not adequately addressed.
 3. There has been a change in information, data, or assumptions from those upon which the plan was based.
 4. The nature or magnitudes of identified risks have changed.
 5. There are implementation problems with other agencies.
 6. Legislative changes affecting organizational structure of local, State or Federal agencies.
 7. Incorporate new local County, State or Federal guidelines or directives and/or to address significant operational issues.
 8. Exercises have revealed deficiencies or shortfalls in which these deficiencies will be addressed which in turn may cause changes in this CEMP.

E. RELATIONSHIP TO OTHER PLANS

1. The combined homeland security and emergency management authorities policies/procedures and resources or the response area (communities, County, regional and State and Federal partners) and other entities (example: voluntary disaster relief organizations, the private sector) constitute an intergovernmental emergency response network for providing assistance following an emergency.
2. The CEMP may be implemented as the only response plan, or it may be used in conjunction with local partners' operational plans developed under statutory authorities and/or Memorandums of Understanding (MOU's). It is also supported by tactical policies and procedures of the communities LCFR covers. However, the CEMP shall remain the official and primary plan to guide response and recovery activities for LCFR.
3. The structure of the CEMP is always in place and available for implementation. When a public emergency occurs, the framework of the CEMP is used to facilitate response of one or more Emergency Support Functions (ESF's) as dictated by the requirements of the incident. The Emergency Operations Center (EOC) may be activated and staffed with a partial or full team at the direction of the Emergency Manager. Individual ESF and support agencies may be employed in the response as needed to respond to the emergency.

4. Local CEMP and other Local, State or Federal Plans:
 - a. The CEMP may also be implemented concurrently with many local, County, State, Federal and regional emergency operation plans without a Presidential Declaration. Regardless, the response would be in accordance with the local CEMP, and in accordance with the State or Federal Officials for the applicable plan.
 - b. In certain circumstances, Federal and/or State agencies have statutory responsibility and authority to respond directly to incidents without a formal request for assistance from LCFR. In all cases, however, those agencies should immediately establish contact with Emergency Management and the local incident commander to coordinate the response and/or recovery efforts.
5. Local CEMP and the National Response Framework (NRF).
 - a. The NRF is built upon the premise that incidents are typically managed at the lowest jurisdictional level. The CEMP was designed to be compatible with the NRF based on the planning assumption that for major incidents, it is likely the affected communities' Mayor(s) and/or Village President(s) would declare a State of emergency, followed by a request for specific types of assistance from the Governor and/or President under the Stafford Act.

F. STATEMENT OF LIMITATIONS

1. Not all emergency situations can be foreseen. The community emergency management system must be able to adapt rapidly to unique conditions. This may include multi-jurisdictional situations as well as simultaneous events.
2. The multi-jurisdictional and multi-discipline approach reflected in the CEMP is a means of ensuring the best use of response and recovery resources in time of community crisis. No attempt will be made in this document to specify all the possibilities and intricacies associated with every type of disaster that might conceivably develop.
3. Because the LCFR CEMP represents a corporate capability that is constantly altered by changes that occur in the law, public policy, organizations, program funding, systems, and the environment, it is impossible to create, maintain and promise the delivery of a perfect emergency management system.
4. LCFR actions may also be constrained because hazards can create effects that may impair the availability and use of local government assets, along with other essential services provided by the private sector. The disaster response and relief activities of government may be limited by:
 - a. An inability of the general citizenry to survive on their own for more than three days without additional supplies of water, food, shelter, and medical supplies.
 - b. A lack of law enforcement, fire, emergency medical services and public works and other response organizations due to damage to facilities, equipment and

shortages of personnel.

- c. The shortage of critical drugs and medicines at medical facilities.
 - d. The shortage of specialized response personnel and equipment needed to respond to a disaster.
 - e. Damage to or overload of lifelines, such as roads, utilities, and communication networks.
 - f. The delay of arrival of outside assistance from either the State or Federal level.
 - g. The limited number of public safety responders in a rural environment.
5. Despite the above potentially unavoidable limitations, LCFR will endeavor to make every reasonable effort within its capabilities to respond to the dangers and hardships imposed by emergency or disaster events (example: based on the situation, the information available, and the resources at hand).
 6. This plan is adopted to protect and preserve the public peace, health, safety, and welfare. Its provisions shall be liberally construed for the accomplishment of these purposes. Moreover, nothing contained in this plan is intended to be nor shall be construed to create or form the basis for any liability on the part of LCFR or its officers, employees or agents, for any injury or damage resulting from failure of any public official or employee to comply with the provisions of this plan, or by reason or in consequence of any act or omission relating to the implementation or enforcement of this plan on the part of LCFR by any of its officers, employees, or agents.
 7. The plan is not intended to limit or restrict initiative, judgment, or independent action required to provide an appropriate and effective emergency and disaster response. It is expressly the purpose of this plan to provide for and promote the health, safety and welfare of the general public. It is not intended to create or otherwise establish or designate any particular class or group of persons who will or should be especially protected or benefited by its provisions.

G. POLICIES

1. In order to protect lives and property and in cooperation with other elements of the community (example: business, volunteer sector, social organizations, etc.), it is the policy of LCFR to strive to mitigate, prepare for, respond to and recover from all natural and man-caused emergencies and disasters.
2. It is the policy of LCFR that it will take appropriate action in accordance with this plan to mitigate any harm to the citizens or property in the response area.
3. Because of the nature of emergencies and disasters (causing damages, interruptions and shortfalls to community resources), it is the policy of LCFR that citizens are encouraged to be self-sufficient for a minimum of 72 hours should an emergency or disaster occur.

4. **NON-DISCRIMINATION** – It is the policy of LCFR that no services will be denied on the basis of race, color, national origin, religion, sex, age, or disability, and no special treatment will be extended to any person or group in an emergency or disaster over and above what normally would be expected in the way of municipal services. LCFR activities pursuant to the Federal/State agreement for major disaster recovery will be carried out in accordance with Title 44, Code of Federal Regulations (CFR), and Section 205.16. State disaster assistance is conditional on full compliance with this rule.

H. AUTHORITIES AND REFERENCES

1. State Statute Chapter 323 Emergency Management

I. SITUATION

A. POTENTIAL EMERGENCY CONDITIONS

1. A major natural, technological, mass casualty event or terrorism related emergency may overwhelm the capabilities of LCFR to provide prompt and effective emergency response and emergency short-term recovery measures. Transportation infrastructure may be damaged and local transportation services could be disrupted. There is the potential for widespread damage to commercial telecommunications facilities which would impair the ability of governmental response and emergency response agencies to communicate.
2. Homes, public buildings, and other critical facilities and equipment may be destroyed or severely damaged. Debris may make streets and highways impassable. The movement of emergency supplies and resources could be seriously impeded. Public utilities may be damaged and either fully or partially inoperable. Some LCFR emergency personnel may even be victims of the emergency, preventing them from performing their assigned emergency duties. Numerous separate hazardous conditions as a result of the major event can be anticipated.
3. Thousands of emergency victims may be forced from their homes and large numbers of dead and injured could be expected. Many victims will be in life-threatening situations requiring immediate rescue and medical care. There could be shortages of a wide variety of supplies necessary for emergency survival. Hospitals, nursing homes, pharmacies and other health/medical facilities may be severely damaged or destroyed. Medical and health care facilities that remain in operation will be overwhelmed by the number of victims requiring medical attention. Medical supplies and equipment will be in short supply.
4. Damage to fixed facilities which generate, produce, use, store or dispose of hazardous materials could result in the release of hazardous materials into the environment. Food processing and distribution capabilities may be severely damaged or destroyed. There could be minimal to total disruption of energy sources and prolonged electric power failure.

B. HAZARD ANALYSIS (SUMMARY)

1. Due to the location and geological features, all the communities that LCFR respond to are vulnerable to the damaging effects of certain hazards.
2. Disaster response efforts are often hampered by equipment and facility damage, communication failures, inclement weather, responder injury and death, and many other limiting factors. In the event of an emergency or disaster that exceeds the available resources; the public should expect and be prepared for a minimum 72-hour delay for emergency response services.
3. When looking at all the different type of hazards that LCFR could deal with while protecting our communities. it is staggering once it is put down on paper. Waukesha County’s CEMP includes all 581 square miles of Waukesha County where in contrast LCFR’s CEMP pertains to 75 square miles and approximately 30,000 citizens.
4. The following is a chart that is taken directly from Waukesha County’s Comprehensive Emergency Management Plan showing hazards that we may have to mitigate:

MASTER LIST OF HAZARDS FOR WAUKESHA COUNTY		
NATURAL		
<ul style="list-style-type: none"> • Agricultural/Hydrologic Drought • Cold, Extreme • Drought • Earthquakes • Epidemic, Animal • Epidemic, Human 	<ul style="list-style-type: none"> • Fire, Rural/Urban • Fire, Wildland • Flooding • Heat, Extreme • Storm, Ice/Hail • Storm, Lightning 	<ul style="list-style-type: none"> • Storm, Severe Thunder • Storm, Snow • Storm, Windstorm • Storm, Winter • Tornado
TECHNOLOGICAL	HUMAN	
<ul style="list-style-type: none"> • Air Pollution • Building/Structure Collapse • Dam/Levee Failure • Energy Emergency • Explosions • Fire: Structural/Forest/Wildfires • Hazardous Material Accident/Incidents, Fixed Facility or Transportation • Mass Casualties • Power/Utility Outage • Radiological, Transportation • Transportation Accident, Aircraft, Marine, Motor Vehicle, Railroad, Trucking, and Waterborne 	<ul style="list-style-type: none"> • Attack at Civic/Sports Events • Civil/Political Unrest/Disturbances • Economic Emergency • Explosives Attack-Bombing Using Improvised Explosive • Municipal Water Supply Contamination • Riot/Demonstration/Violent Protest/Illegal Assembly • Strike • Terrorism: Bomb Blast, Ecological, Economic, Incendiary, Prolonged/Multiple Hostage Situation, Sabotage • WMD: Biological, Chemical, Nuclear, Incendiary, Explosive 	

Table 1: “Comprehensive Emergency Management Plan – Waukesha County” January 2013

C. VULNERABILITY ANALYSIS

1. LCFR’s response area has a population estimated at 30,000 people. All communities could experience a possible large loss of life and property of catastrophic proportion from a single major incident or a series of potential hazards.

D. PERSONS WITH ACCESS AND FUNCTIONAL NEEDS

1. LCFR recognizes the need to undertake additional and reasonable efforts to protect and assist people with access and functional needs at the time of emergencies and disasters, and especially during evacuations, sheltering and re-entry operations.
2. Waukesha County Health and Human Services Department manages planning for human service needs such as this; it will be a collaborative effort.

E. EMERGENCY MANAGEMENT CRITICAL FACILITIES

1. The elements listed on the “Essential Services, Critical Facilities and Infrastructure” Chart in Table 2 comprise the likely available emergency management support facilities or systems. LCFR has identified certain “critical facilities” that may be either emergency incident sites due to disaster impacts or could be used as emergency management support facilities given that they are not impacted. LCFR will strive to maintain certain “essential services” and maintain/restore the community’s “infrastructure” during times of disaster.
2. Table 2 is taken from Waukesha County’s 2013 CEMP showing the County’s essential services, critical facilities and infrastructure; not all pertain to our communities but the majority does.
 - a. Essential Services: Community services normally determined to be lifesaving/preserving and those critical to the immediate economy of the region that need to be maintained or restored immediately. Each of these services are dependent upon certain critical facilities and infrastructure. LCFR will also strive to provide these services during disasters through activation of Emergency Support Functions (ESFs) as appropriate.
 - b. Critical Facilities: Specific public and private facilities essential for delivery of vital services and for the protection of the community. The American Society of Engineers classifies critical facilities in the following categories:
 - i. Category IV – buildings and other structures whose failure would represent a low hazard to human life, such as storage facilities.
 - ii. Category III – all buildings not specifically included in other categories.
 - iii. Category II – buildings and other structures that represent a substantial hazard to human life in the event of a failure. They include buildings with higher concentrations of occupants, special population facilities, or special community events.
 - iv. Category I – essential facilities such as hospitals, fire/police/public works buildings and other emergency service facilities such as power stations, water supply facilities, aviation facilities, and other buildings critical for the national and civil defense.
 - c. Infrastructure: Systems upon which critical facilities, and hence, essential services are dependent.

3. Turn to next page to see Table 2 (Essential Services, Critical Facilities and Infrastructure).

ESSENTIAL SERVICES, CRITICAL FACILITIES AND INFRASTRUCTURE	
<p style="text-align: center;">Essential Services</p> <ul style="list-style-type: none"> • Alert and Warning • Commodities Distribution • Communications • Community EOC • Continuity of Government Services • Emergency Dispatch Services • Emergency Medical Services • Emergency Public Information • Energy/Utilities • Financial Services • Fire Services • Food/Water Distribution • Health • Law Enforcement • Mass Care • Public Health • Public Works/Engineering • Search and Rescue • Shelter • Support to Functional and Access Needs Populations or High Occupancy Structures, Facilities, Special Events • Transportation 	<p style="text-align: center;">Critical Facilities</p> <ul style="list-style-type: none"> • Banks/ATMs/Credit Unions • Bridges • Business Establishments • Campgrounds/Parks/Recreation Areas • Clinics; Pharmacies • Computer Data Bases/Service Centers • Detention Center; • Dispatch Center • Emergency Operations Center (EOC) Room/Building • Fire Stations • Food Storage Facilities • Fuel Storage • Government Offices • High Occupancy Structures • Hospital/Nursing Homes/Clinics/Pharmacies/Ambulance Stations • Hotels/Motels/Resort Complexes • Kitchens • Light Industry • Microwave Towers/Satellite Ground Terminals • Parks/Recreation Areas • Police Station/Jail • Power Plant/Sub Stations • Public Assembly Areas: Civic Center/Theaters • Pumping Stations • Restaurants • Schools • Shopping Areas • Shopping Malls • Sports Fields • Telephone Switching/Relay Stations • Transportation Over/Underpasses • TV/Radio Stations • Warehouse/Equipment Storage Complexes • Wastewater/Sewage Treatment Facilities • Water Treatment Facilities/Pumping Stations
<p style="text-align: center;">Infrastructure</p> <ul style="list-style-type: none"> • Computer Systems • Electrical Systems • Gas (Propane) • Natural Gas • Radio/TV/Print Media • Roads/Highways • Telephone Systems • Water Supplies/Sewer • Waterways, Navigable: Salt & Fresh Water 	

Table 2: “Comprehensive Emergency Management Plan – Waukesha County” January 2013

II. CONCEPT OF OPERATIONS

A. EMERGENCY MANAGEMENT PROGRAM PHASES

1. The Emergency Management Program is a comprehensive effort that requires LCFR to work and cooperate effectively with many other governmental, non-governmental, and private organizations. LCFR will meet its responsibility for protecting life and property from the effects of emergency events by acting within each of the following phases of emergency management.

a. Phase 1: Mitigation/Prevention

- i. Mitigation is any action that prevents an emergency from occurring or reduces the impact of an emergency on people, property and the environment. Mitigation efforts include adopting and enforcing building codes, land use planning, training, and education of the public on the need for mitigation and implementing structural and non-structural safety measures.
- ii. Prevention helps protect lives and property before an emergency occurs. Prevention measures help avoid emergencies, or they can intervene to stop an emergency from occurring. Measures involve applying intelligence and other analysis to a range of activities, such as heightened inspections; improved surveillance and security operations; investigations to determine the full nature and source of the threat; public health and agricultural surveillance; immunizations, isolation, or quarantine; and specific law enforcement operations aimed at deterring or preempting illegal activity.
- iii. All seven communities (City of Delafield, Village of Chenequa, Village of Nashotah, Village of Wales, Village of Oconomowoc Lake, Town of Genesee, Town of Delafield,) have departments that are expected to actively participate in recommending to the Emergency Manager mitigation/prevention strategies intended to improve the emergency resilience of the communities and to carry out those strategies as directed.

b. Phase 2: Preparedness

- i. Preparedness activities consist of almost any pre-emergency action that will improve the safety or effectiveness of emergency response. Preparedness activities have the potential to save lives, lessen property damage, and increase individual and community control over the subsequent emergency response. In general, Preparedness involves ensuring the community has appropriate personnel, with proper equipment, training, policies and facilities required to respond to an emergency or disaster situation. Active decision-making must occur regarding standards of care, staffing and equipment levels appropriate to the jurisdiction and the myriad of potential hazards a community may face. This is not to imply a community must be self-sufficient, rather that they have

appropriate protocols and procedures in place to secure additional resources when local capabilities will be overwhelmed.

- ii. Intergovernmental departments will prepare for emergencies by creating and maintaining emergency plans and procedures to accomplish the tasks expected of them. Plans and procedures will allow departments to integrate their individual capabilities into the area wide response and recovery effort. Community departments will ensure that their employees are trained to implement emergency procedures. These departments will validate their readiness for an emergency through internal training and participation in exercises. Other governmental jurisdictions, private, and non-profit organizations within and outside the response area boundaries may also be encouraged to participate in these exercises as well. Exercise results will be documented and recommendations implemented to improve the preparedness for an emergency. The LCFR Emergency Manager or designee will revise the CEMP based on continuous planning and exercising and lessons learned once this plan is put into practice.
- c. Phase 3: Response
- i. Response is the use of resources to address the immediate and short-term effects of an emergency. Emergency response efforts can minimize suffering, loss of life, and property damage, as well as maintain or hasten the restoration of essential government services.
 - ii. When initiating the response operation, LCFR will conduct an initial assessment of the situation, determine the need to alert others and then take appropriate actions to reduce the risks and potential impacts of the emergency.
 - iii. The community departments may assist with issuing and transmitting emergency alert and warnings, supporting first responder efforts to protect lives and property, maintaining or restoring essential services, and protecting vital resources and the environment.
- d. Phase 4: Recovery
- i. Recovery activities return the communities to a pre-emergency state. Examples of recovery efforts, which may include a continuation of ESFs or implementation of Recovery Support Functions (RSFs), conducting detailed damage assessments, removing debris, restoring essential services, critical facilities and infrastructure, rebuilding homes and providing assistance to businesses and individuals.

- ii. There is not a definitive point after the emergency occurs where the response phase ends and the recovery phase begins. In general, most recovery and mitigation efforts occur after the deactivation of the EOC and when the community departments return to normal operations. Many long-term recovery programs will be integrated into the day-to-day project activities of the departments rather than be managed from the EOC.

B. NATIONAL INCIDENT MANAGEMENT SYSTEM (NIMS)

1. As most agencies around the Country have, LCFR formally adopted and uses the National Incident Management System (NIMS). NIMS provides a consistent national approach for Federal, State, and local governments and non-governmental organizations to work effectively and efficiently together to prepare for, respond to, and recover from domestic incidents, regardless of cause, size, or complexity. To provide for interoperability and compatibility among Federal, State, and local capabilities, NIMS includes a core set of concepts, principles, terminology, and technologies covering the incident command system; multi-agency coordination systems; unified command; training; identification and management of resources (including systems for classifying types of resources); qualifications and certification; and the collection, tracking, and reporting of incident information and incident resources.
2. NIMS provides LCFR with a framework for interoperability and compatibility and maintains a balance between flexibility and standardization. NIMS is flexible because the system can be adjusted to manage all types of incidents, and is applicable to any incident regardless of cause, size, or complexity.
3. NIMS provides standardization by using established organization structures (Incident Command System [ICS], Multi-agency Coordination System [MAC], Public Information System) and consistent terminology. The ICS component of NIMS is a toolbox from which incident managers may choose all or some applicable tools necessary to fulfill their functional roles in a full range of events. The flexibility and standardization within NIMS is realized during an incident when the municipal departments previously trained and practiced using these tools.
4. The NIMS components were not designed to stand alone. The components work together as a system to provide the national framework for incident management. The NIMS does not yield optimal results when one of its components is absent.
5. The National Incident Management System (NIMS) is designed so that local jurisdictional authorities retain command, control and authority over responses. Adhering to the NIMS allows local agencies to better utilize requested Federal and State resources.
6. The Incident Command System (ICS). This CEMP formalizes the NIMS incident command organization and structure as mandatory for all response activities by all departments identified in this plan.

C. EMERGENCY MANAGEMENT ORGANIZATION

1. This CEMP establishes LCFR's comprehensive emergency management program. Upon promulgation of this plan, all departments of the three communities and LCFR are deemed part of the emergency preparedness and response organization.
2. The CEMP is always in effect and available for implementation, and works to ensure the LCFR is continually ready to coordinate response activities without formal activation. This is due to the fact that it incorporates principles of response to basic, everyday incidents. However, it should be recognized that an order or proclamation of a local state of emergency or disaster by the City/Village President or designee may activate special components of the emergency management plan when deemed necessary.
3. The Village/City Administrator or resident/Mayor is the ultimate authority for disaster preparedness and response. The Emergency Manager has the responsibility for coordinating the entire emergency management program on behalf of the community leaders.
4. LCFR's Emergency Manager implements, manages and reports on all actions authorized and taken pertinent to any emergency measures pursuant to this plan.
5. The Emergency Manager's duties include the ongoing planning for and coordination of actions necessary to prepare for and manage all four phases of the emergency management program. The Emergency Management Director(s) also assures there is a senior officer (Shift Commander), on-duty, 24 hours a day to oversee the emergency management response program (CEMP).
6. The Emergency Manager's duties shall include the ongoing planning for and coordination of those actions necessary for the creation and maintenance of an effective emergency response capability to prepare for and manage emergency conditions.

D. EMERGENCY/DISASTER DECLARATIONS

1. Wisconsin State Universal Citation: WI Statute § 323.11 (2013 through Act 380)
 - i. "323.11 Declaration by local government. The governing body of any local unit of government may declare, by ordinance or resolution, an emergency existing within the local unit of government whenever conditions arise by reason of a riot or civil commotion, a disaster, or an imminent threat of a disaster, that impairs transportation, food or fuel supplies, medical care, fire, health or police protection, or other critical systems of the local unit of government. The period of the emergency shall be limited by the ordinance or resolution to the time during which the emergency conditions exist or are likely to exist."

E. EMERGENCY AUTHORITIES

1. Wisconsin statutes provide local government, principally the chief elected official, with emergency powers to control emergency situations. If necessary, the municipalities affected shall use these powers during emergency situations.
2. When an emergency situation caused severe damage, injury, or loss of life or it appears likely to do so, the Chief Elected Official or governing boards may by executive order or proclamation declare a local state of disaster. The Chief Elected Official may subsequently issue orders or proclamations referencing that declaration to invoke certain emergency powers in order to cope with the disaster. These powers include:
 - a. To assemble all department heads for the purpose of forming an advisory body to offer advice upon the need for and to supervise emergency services to the impacted area(s).
 - b. Without restricting the power of the Fire and Police Chiefs, to seek mutual aid, to contract with other units of government for the use of manpower, specialized services, and equipment.
 - c. To contract on a cost basis with private industry, leasing companies or contractors for services, manpower and equipment.
 - d. To order all municipal employees to immediate active duty, including reassignment to disaster or emergency functions.
 - e. To order all municipal departments to concentrate their manpower and equipment in a given area(s).
 - f. To authorize any municipal owned or leased property to be made available as emergency shelters, food and water dispensing areas, hospitals, morgues, bases of operations and the like if needed.
 - g. To order municipal employees and equipment to be utilized in the transportation of equipment, supplies, food, water, materials, from place to place to assist in any governmental, Red Cross or like charitable agency operating within the response area.
 - h. To suspend ordinary municipal non-essential services until further notice.
 - i. To suspend the operation of any municipal licensed business.
 - j. Without restricting the power of the Fire and Police Chiefs', to order a curfew for the general public or any segment of the general public in all or any portion of the municipalities affected.
 - k. To close any street, park or public facility within the response area.

- l. To order the evacuation of citizens or take other protective actions deemed necessary within the response area.
- m. To declare a state of “local emergency” for all or part of the municipalities as deemed appropriate.
- n. To request further disaster declarations and assistance from the Governor of the State of Wisconsin and the President of the United States of America, and other agencies, as appropriate.
- o. To administer municipal government effectively to meet the needs of the disaster relief. This includes the power to authorize the transfer of funds from and to individual departments and agencies until such time as this can be assumed by the city/village boards or the appropriate committees; serve as chief spokesperson for the communities (unless delegated) and take all steps required to keep the public informed on protection and survival steps that may be needed; take all necessary steps to provide for the safekeeping of all municipal records and documents essential to the function of government; establish priorities in the procurement of supplies and services; control the resources of all municipal departments and utilize these resources to the most advantage in dealing with the emergency or recovery efforts; provide for the accounting of all emergency disbursements and review their need based on the priority of the operation; direct the resources of the municipalities anywhere within the State of Wisconsin to insure the well-being of all municipal residents; administer the relocation of municipal government and provide for its functional ability during an emergency; appoint and direct special task groups as required for emergency operations.
- p. To take all steps reasonably necessary to preserve the public health, safety and welfare and property of the citizens and residents of the municipalities affected.
- q. A local disaster declaration activates the recovery and rehabilitation aspects of this plan. A local disaster declaration is required to obtain Federal and State disaster recovery assistance.

F. CONTINUITY OF GOVERNMENT

1. The procedures for the Villages and Cities and municipal line of succession can be found in Chapters 61 and Chapters 17 of the Wisconsin State Statutes as well as charters, ordinances, and resolutions.
2. The line of succession for the LCFR’s response area communities are:
 - a. The Mayor or Village President or Town President
 - b. Emergency Management Director – Fire Chief
 - c. Deputy Emergency Management Director(s) – LCFR Chief Officer

3. The line of succession to each department head is according to the operating procedures established by each department.
4. Preservation of records:
 - a. Lake Country Fire & Rescue shall establish procedures to ensure the selection, preservation, and availability of records essential to the effective functioning of government and to the protection of rights and interests of persons under emergency conditions.

G. EMERGENCY SUPPORT FUNCTIONS (ESFs)

1. Emergency Support Functions (ESFs) represent groupings of types of assistance activities that LCFR is likely to need in times of emergency or disaster. During emergencies, the Emergency Management Director(s) and/or Deputy Emergency Management Director(s) determine which ESFs are activated to meet the disaster response needs.
2. The State Emergency Management plans and the National Response Framework are organized by related emergency functions commonly known as “emergency support functions (ESFs).” The State and Federal governments will respond to municipal requests for assistance through the ESF structure. Within the State Emergency Operations Center (SEOC), requests for assistance will be tasked to the particular ESF(s) for completion. A lead agency/department for each ESF is indicated and will be responsible for coordinating the delivery of that ESF to the emergency area. The lead agency/department will be responsible for identifying the resources within the ESF that will accomplish the mission and will coordinate the resource delivery. County, State and Federal efforts will be in “support” of the municipalities.
3. This plan is based upon the concept that the ESFs for the various municipal organizations involved in emergency operations will generally parallel their normal day to day functions. To the extent possible, the same personnel and material resources will be deployed.
4. Local municipal departments are normally designated as “the lead or co-lead” for an ESF due to a statutory responsibility to perform that function, or through its programmatic or regulatory responsibilities. In some agencies a portion of the agency’s mission is very similar to the mission of the ESF, therefore, the skills to respond in a disaster can be immediately translated from the daily business of that agency. The “lead” agency also has the necessary contacts and expertise to coordinate the activities of that support function.
5. Upon activation of the LCFR EOC, the activated ESF lead agencies will designate representatives in the EOC to coordinate their assigned ESFs.

6. The lead agency for the ESF will be responsible for obtaining all information relating to ESF activities and requirements needed for the emergency and disaster response.
7. LCFR will respond to requests for assistance thru the ESF process. Within the EOC, requests for assistance will be tasked to the appropriate ESFs for completion. The lead agencies will be responsible for coordinating the delivery of that assistance.
 - a. With concurrence from the Emergency Manager, ESF #5 “Emergency Management Annex” will issue mission assignments to the lead agency or agencies for each ESF.
 - b. The lead agency or agencies for the tasked ESFs will be responsible for identifying and tasking the particular resources and will coordinate the delivery of that resource or resources.

H. INCIDENT COMMAND SYSTEM (ICS)

1. LCFR’s on–scene response to emergencies follows the concepts of the National Incident Management System (NIMS) and the Incident Command System (ICS).
2. The person in charge at the incident is the on-scene incident commander who is responsible for ensuring each agency on scene can carry out its responsibilities.
3. LCFR’s emergency responders are likely to be first on scene at an emergency situation within their response area. They will normally take charge and remain in charge of the incident until it is resolved. They will seek guidance and direction from local officials and seek technical assistance from State and Federal agencies and industry when deemed appropriate.
4. The first local emergency responder to arrive at the scene of an emergency will implement the incident command system and serve as the incident commander until relieved by a more senior or more qualified individual.
5. Upon arriving at an incident scene, the incident commander shall:
 - a. Establish an incident command post and direct the on-scene response.
 - b. Isolate the scene
 - c. Assess the situation and identify the hazards
 - d. Warn the population in the area of the incident; provide emergency instructions.
 - e. Determine and implement protective measures (evacuation or in-place sheltering) for the population in the immediate area of the incident.
 - f. Implement traffic control arrangements in and around the incident scene.

- g. Develop objectives (tasks to be done).
 - h. Ensure appropriate safety and personnel protective measures.
 - i. Develop an action plan and priorities.
 - j. In coordination with the EOC, contact appropriate agencies or personnel with expertise and capability to carry out the incident action plan.
 - k. Coordinate as appropriate with other responding agencies.
 - l. Request additional resources from the EOC.
6. When more than one agency is involved at an incident scene, the agency having jurisdiction and other responding agencies shall work together to coordinate each agency's objectives. Team problem solving should facilitate effective response. Other agency personnel working in support of the Incident Command system will maintain their normal chain of command, but will be under control of the municipal on-scene Incident Commander. The on-scene Incident Commander may designate a Public Information Officer (PIO) to work with the news media at an incident. This may include coordinating agency media releases and arranging contacts between the media and response agencies. If additional support is needed, the EOC may be activated.
7. During widespread emergencies or disasters, emergency operations with different objectives may be conducted at geographically separated scenes. Incident command will be established at each site. When this situation occurs, it is particularly important that the allocation of resources to specific field operations be coordinated through the EOC. Incident Command Post links to the EOC via radio, landline telephone or cell phone.
8. In emergency situations where other jurisdictions or the State or Federal government are providing significant response resources or technical assistance, it is generally desirable to transition from the normal ICS structure to a Unified Command structure. Principles of Area Command or Multi-Agency Coordinated Systems may also apply. This arrangement helps to ensure that all participating agencies are involved in developing objectives and strategies to deal with the emergency.

I. INCIDENT RESPONSE LEVELS (LEVELS OF DISASTER)

1. Many emergencies follow some recognizable build-up period during which actions can be taken to achieve a gradually increasing state of readiness. LCFR will use a graduated response approach in responding to and managing emergencies and disasters. As the potential severity of the emergency or the demand on local resources grow, there will be an increase in emergency response and coordination activities to meet increasing emergency demands. Readiness Levels will be determined by the Emergency Management Coordinator.

2. Defining the Disaster Severity. The municipalities' capabilities define these categories. Select one of the "Categories of Severity" if the hazard results in one or more of the qualifiers found within the level chosen.
 - a. **Negligible**: Minor injuries/no deaths, shutdown of critical facilities for less than 3 days, less than 10% property damage, no economic effect; no effect on ecological system; no effect on response system.
 - b. **Limited**: Less than 10 deaths/injuries; shutdown of critical facilities for 3-7 days; 10-25% property damage; temporary effect on economy; temporary/minimal effects on ecological systems; no effect on response system.
 - c. **Critical**: More than 10 deaths/injuries; complete shutdown of critical facilities for 30 days or more; more than 50% property damage; severe long-term effects on the economy; severe effects on ecological systems, severely affects State/local/private sectors capabilities to begin or sustain recovery activities, overwhelms local and State response resources.

J. DIRECTION AND CONTROL

1. General

- a. LCFR retains decision making authority and control during emergencies. The local responsibility for disaster management cannot be relinquished. Field Incident Commanders exercise this authority in their role as municipality officials. Municipal officials operating in the Emergency Operations Center (EOC) retain the coordination and commitment authority for local resources and deploy those resources as appropriate.
 - b. When an emergency is confined to a single location within the municipalities, the municipalities with legal authority will exercise command. The department(s) representative(s) will serve as the on-scene incident commander (or Unified Command if applicable) responsible for the operation. Field Incident Commander(s) will manage the emergency response at an incident site(s).
2. During emergency operations, department heads retain administrative and policy control over their employees and equipment. However, personnel and allocated equipment will carry out mission assignments directed by the field Incident Commander or EOC Manager. Each department and agency are responsible for having its own operating procedures for response operations, but interagency procedures, such as a common communications plan, may be adopted to facilitate coordinated effort. Role of the Emergency Operations Center (EOC)
 - a. Once activated as a coordination entity, the EOC directs and coordinates the overall response to emergency events in support of the Incident Commander(s). The EOC does not assume command from field Incident Commanders. Individual field departmental supervisors retain tactical control of resources assigned to incidents.

- b. The EOC may be partially activated to coordinate support for field incident commander(s) without activating the full EOC organization.
- c. The LCFR Emergency Manager or designee are responsible for the proper functioning of the EOC and will also serve as a liaison with State and Federal emergency agencies and neighboring jurisdictions. The LCFR Emergency Management Director(s) or designee will advise other emergency officials on courses of action available for major decisions.

3. Role of Waukesha County Emergency Management

- a. The Waukesha County Emergency Management EOC may serve as the liaison and coordinating agency between the municipalities, Waukesha County, other local governments, State private not-for-profit (PNP) agencies, State government and Federal government.
- b. If County resources are made available to the municipalities, they will be under the operational management of the Emergency Manager or designee and the Incident Commanders.

4. Role of the State of Wisconsin

- a. The State EOC may serve as the liaison and coordinating agency between the municipalities, Waukesha County, other local governments, State private not-for-profit (PNP) agencies, State government and State government.
- b. If State and/or Federal resources are made available to the municipalities, they will be under the operational management of the LCFR's Emergency Manager or designee and Incident Commanders.

K. EMERGENCY OPERATIONS CENTER – ACTIVATION

1. General

- a. The EOC may be activated at any time there is an existing or potential threat or any event deemed an incident of critical significance by the municipalities, the Emergency Manager or designee. Plan stakeholders should plan on staffing the EOC to the requested scale as soon as possible, but within one hour of notification.
- b. The EOC is an essential facility for successful response and recovery operations. With decision and policy makers located together, personnel and resources can be used efficiently. Coordination of activities will ensure that all tasks are accomplished, minimizing duplication of efforts.
- c. Depending upon the severity and magnitude of the disaster, activation of the EOC may not be necessary, may only be partially required, or may require full activation. Partial activation would be dictated by the characteristics of the disaster and would involve only those persons

needing to interact in providing a single municipality coordinated response. EOC activation levels will generally follow the “emergency levels” as described in Paragraph I in this section.

2. Scheduled Activations

- a. A scheduled activation is a predetermined activation in response to various meteorological, geophysical, or planned events. Planned events may include, but are not limited to, protest/demonstrations, political events, parades, and holiday celebrations. Notifications will be made according to established policies and protocols. The type and severity of the event will dictate to which level the EOC is activated, and which functions and components should staff the EOC.

3. Unscheduled Activations

- a. The EOC may also activate as a response to unanticipated events. Depending upon the incident, the appropriate ESFs, Command or Management components will be notified to staff the EOC as soon as possible but no longer than one hour from notification. The municipality’s designated EOC staff and/or Emergency Manager or designee(s) will cease conducting their daily activities and report to the EOC and prepare it for activation and operation. The Waukesha County Communication Center will make appropriate notifications.

4. Role of Emergency Management Staff

- a. Initial notification of an unscheduled event may come from several sources. On-duty municipality staff will contact the LCFR Emergency Manager or designee for incidents that meet or may escalate to the level requiring EOC activation. If required, the On-duty staff will take appropriate action to implement EOC activation procedures. The On-duty staff may activate the EOC when an event is of such magnitude that the need for activation of the EOC is self-evident.

5. Authority to Activate the EOC

- a. The following individuals are authorized to activate the EOC for unscheduled events during situations where the need for EOC-level coordination is evident:
 - i. LCFR Emergency Manager or Designee
 - ii. City and/or Village President(s)
- b. Any department director(s) or the Incident Commander may request EOC activation to coordinate or support emergencies, or for planned events, being managed by their organization or in anticipation of an emergency event.

- c. The incident commander/department Director(s) should notify the Emergency Manager when:
 - i. Needs exceed authority
 - ii. Incidents involve mass fatalities or casualties
 - iii. Incidents involving severe environmental damage
 - iv. Incidents pertaining to reportable hazardous materials
 - v. Resource needs are greater than what is available
 - vi. Actions produced deleterious unanticipated results
 - vii. Whenever the incident commander believes EOC assistance is advantageous
 - viii. Once notified, the Emergency Manager or designee and the incident commander will make an assessment to determine what services the EOC can provide.
- d. Any municipality may request the EOC to be activated to support an emergency occurring in or affecting their jurisdiction.
- e. When the decision is made to activate the EOC, the Emergency Manager or designee will notify the appropriate staff members to report to the EOC. The EOC Management staff will take action to notify and mobilize the appropriate organizations and operations centers that they are responsible for coordinating. Notifications are also made to the Waukesha County Emergency Management staff and the State emergency duty officer or State EOC (SEOC).
- f. When the EOC is activated, it is essential to establish a division of responsibilities between the incident command post(s) and the EOC for emergency operations. Common EOC tasks include:
 - i. EOC/ICS Interface Management: Coordination of on-scene to EOC interaction.
 - ii. Situational Awareness and Reports: Assemble accurate information and intelligence on the emergency situation and current resource data to allow officials to make informed decisions.
 - iii. Incident Prioritization: Collaborate with representatives of emergency service agencies, determine and prioritize required response actions and coordinate their implementation.

- iv. Policy Establishment: Suspend or curtail government services, recommend closure of schools and businesses, and cancellation of public events.
- v. Public Protection Measures: Direct shelter in place, organize and implement large scale evacuation, organize and implement shelter and mass arrangements for evacuees, coordinate traffic control for large scale evacuations.
- vi. Resource Management: Provide resource support for the incident command operations. Acquire and request resources; allocate and prioritize resource requests; implement cost control analysis measures.
- vii. Emergency Public Warning: Issue community wide warnings (phone/media).
- viii. Record Keeping: Gather, process, analyze, and store incident records.
- ix. Emergency Public Information: Issue emergency instructions; provide information to the general public and joint information center management.
- x. Liaison Coordination: Request and coordinate assistance from the State and other external sources.

L. EMERGENCY OPERATIONS CENTER (EOC): ORGANIZATION, OPERATIONS AND STAFFING

Note: The “EOC Operations Manual” provides comprehensive details on EOC operations such as detailed job descriptions and checklists of tasks. The EOC Operations Manual is published separately.

1. Overview

- a. The EOC management structure is intended to be flexible and should be modified by the Emergency Management Director(s), the EOC Manager and the EOC Unit Leaders, to meet the demands of any situation.
- b. The department heads and Command Staff through the EOC Manager will implement policy directives and will have overall management responsibility for the incident.
- c. The EOC Manager directs EOC response actions to save lives and protect property and recommends/implements population protective actions. Within the framework of the EOC, all available resources are identified and mobilized as necessary. Tasks are prioritized, and resources used within this priority framework.

- d. Departments will document appointments and work assignments in an emergency situation. They submit a complete emergency action plan on staffing allocation, equipment distribution, and other emergency-related needs as requested by the EOC Manager. A department carries out its emergency duties as described in the CEMP concurrently with its essential functions as described in its Continuity of Operations Plan (COOP).
 - e. All municipal officials and employees are part of the emergency management organization and may be called on to perform emergency management functions during an emergency, including non-traditional position assignments and tasks.
2. Use of the National Incident Management System (NIMS) and Incident Command System (ICS).
 - a. The EOC utilizes a modified organizational structure of the National Incident Management System (NIMS)/ Incident Command System (ICS) in the context of both pre-incident, post-incident and recovery activities. The EOC organization adapts to the magnitude and complexity of the situation at hand, and incorporates the NIMS principles regarding span of control and standard organizational structure.
 - b. Although the EOC uses a modified ICS structure, the EOC does not generally directly manage on-scene operations. Instead, the EOC focuses on policy decisions, providing multi-agency support to on-scene efforts, develops situational awareness for the entire county, and conducting broader operational management for activities such as mass shelter, catastrophic evacuation, and public information activities.
3. EOC Positions
 - a. The Emergency Manager or designee provide overall direction and control, and is responsible for making decisions necessary to meet the emergency/disaster impacts to include management of incident activities, development and implementation of strategic decisions, and approving the ordering and releasing of resources.
 - b. Department heads and Command Staff Policy Group is comprised of department leaders who provide strategic advice and policy recommendations to the Emergency Manager and Chief Elected Official.
 - c. The EOC Manager reports to the Emergency Manager or designee and:
 - i. Ensures that the EOC is adequately staffed and that appropriate ESFs are activated to meet the emergency tasks and demands.
 - ii. Implements the Emergency Managers decisions through the EOC process and ensures that the EOC is structured to meet the event demands.

- iii. Additionally, the EOC Manager supervises the management staff and EOC Unit Leaders.
- d. The Public Information Officer (PIO) reports to the EOC Manager and is in charge of implementing the Public Information plan. The PIO Unit may include various components, such as: Rumor Control; Public Enquiries; Media Enquiries; Social Media monitoring, and Public Warnings, Information and Instruction.
- e. The Safety Officer reports to and advises the EOC Manager on EOC and operational safety issues.
- f. The Liaison Officer is staffed or assigned by the EOC Manager and functions as the point of contact with other agencies, and:
 - i. Coordinates Agency Representatives assigned to the EOC as well as requests from other agencies for sending liaison personnel to other EOCs.
 - ii. Functions as a central location for incoming agency representatives, and will provide workspace and arrange for support as necessary.
- g. EOC Unit Leaders
 - i. There are four EOC Units: Policy Group, Situation and Planning Unit, Resource Status and Procurement Unit, and Public Information. Each of these units will be functionally oriented. The size and functions within this organization will be dictated by the magnitude and nature of the emergency.
 - ii. Policy Group - This EOC unit is responsible for all policy and directive development and/or interpretation to coordinate incident response assets. The Policy Group Supervisor position is staffed by the situational needs of the emergency, i.e. Fire, Law Enforcement, Public Works, etc. The Policy Group consists of the upper level personnel from participating agencies, who possess the legal authority to commit their respective departmental resources.
 - iii. Situation and Planning Unit – This EOC unit collects, evaluates, disseminates, and documents information about the incident, status of resources, develops the Incident Action Plans (IAP's), compiles damage assessment, and develops response and recovery plans in support of field based Incident Command Structure(s).
 - iv. Resource Status and Procurement Unit – This EOC unit is responsible for monitoring operational status of committed resources, providing all support needs to emergency incident sites, ordering all resources, and providing facilities, supplies, and

services. Additionally, this unit is responsible for tracking and recording all incident costs.

- v. Public Information Unit – This EOC unit is responsible for collecting, coordinating and disseminating emergency public information, as well as coordinating the establishment of a Joint Information Center, and media and public briefing functions.

h. Extended Operations

- i. The EOC may be required to operate on a 24 hour basis for the duration of an emergency. During a 24 hour operation, shifts will normally last 12 hours, but may be adjusted based on the needs created by the emergency.
- ii. Each position in the EOC must have a total of, at minimum, two people designated to cover shift staffing during a 24 hour period.
- iii. Extended operation details are broadly described in the EOC Guidebook which explains how the EOC runs and operates. See the appendix for the EOC Guidebook document.

M. FACILITIES

1. Incident Command Post (ICP)

- a. The tactical level, on–scene incident command and management organization is located at the ICP. When multiple command authorities are involved, the ICP may be led by a Unified Command, comprised of officials who have jurisdictional authority or functional responsibility for the incident under an appropriate law, ordinance, or agreement. The Unified Command provides direct, on–scene control of tactical operations and utilizes a NIMS ICS incident management team organization.
- b. ICP is usually located at or in the immediate vicinity of the incident site. The location is selected by the agency having primary jurisdictional authority for managing the incident at this level. Generally, there is one ICP established for each incident. Depending on the number and location of incidents, there may be multiple ICPs.

2. Emergency Operations Center (EOC)

- a. The EOC and alternate addresses are:
 - i. Primary EOC: Lake Country Fire & Rescue – Station 1, Training Room
 - ii. Secondary EOC: Town of Delafield Village Hall, Meeting Room

- iii. Third EOC: City of Delafield – City Hall, Meeting Room
 - b. If any of the two above locations are not available a mobile command post vehicle that is maintained by the Waukesha County Sheriff’s Department which is available for deployment as an incident command center or on-scene EOC if requested, otherwise Waukesha County Communications (dispatch) has availability as well.
 - c. LCFR’s Emergency Manager is responsible for the readiness and support of the EOC locations shown above.
 - d. All departments are responsible to ensure that communication systems are in place between EOC representatives and their departments.
 - e. Land based phones will be provided to agency representatives at the EOC; redundant telecommunications will be facilitated by: cellular phones, satellite telephone and radio communications.
 - f. Communications to the general public will be through the media and internet or telephone based notification systems and are coordinated by the on-scene Public Information Officers (PIOs) and/or the EOC Information Officer. Waukesha County Communications Center Supervisors activate the mass notification system upon request from competent authority.
 - g. A Public Inquiry Center (disaster hotline) may be established if needed.
 - h. Situational awareness, emergency management and communications software will be available in the EOC.
 - i. ARES/RACES (Amateur Radio Emergency Services / Radio Amateur Civil Emergency Service) Radio is utilized during emergency/disaster situations where normal governmental communication systems sustained damage or when additional communications are required. An ARES/RACES station is located in the County EOC and serves as a primary backup means of communication. Public Health and several hospitals located in the County also have ARES/RACES stations.
3. Department Operating Locations
 - a. Each municipal department will be directed by the EOC to establish a primary location and alternate location from which to establish direction and control of its respective activities in an emergency or disaster. This may be from the EOC or other location depending on the emergency circumstances.
4. 911 Communications

- a. Fire and Law Enforcement responders involved in disaster operations will maintain operations through the Waukesha County Communications Center until advised to communicate directly through the EOC.
 - b. Any department operating from an alternate location other than the EOC will maintain contact with the EOC through direct redundant communications, such as telephone, radio, fax or via State of Wisconsin's WebEOC v8.3. Waukesha County Emergency Management can assist command in getting access if they do not already have login info.
5. Joint Field Office (JFO)
- a. The JFO is a Federal/State multi-agency coordination center established locally. It provides a central location for coordination of Federal, State, local, non-governmental and private sector organizations with responsibility for response and incident support.
6. Joint Information Center (JIC)
- a. The JIC is a location where public affairs professionals from organizations involved in incident management activities work together to provide critical emergency information, crisis communications, and public affairs support. The JIC serves as a focal point for the coordination and dissemination of information to the public and media. This may also include a Public Inquiry Center which is responsible for receiving and responding to public inquiries regarding the disaster. It is normally established and managed by the EOC.
7. Disaster Recovery Center (DRC)
- a. The DRC established in coordination with State and local jurisdictions, a DRC is an established central facility where individuals affected by a disaster can obtain information on disaster recovery assistance programs from various Federal, State, local, private sector, and voluntary organizations.
8. Point of Distribution
- a. A Point of Distribution (POD) is a centralized location for the receipt County Public Health Division of resources and supplies being provided in support of public health emergency operations. It is at this location that incoming resources will be received, sorted and distributed. Some of the potential locations could be Cushing School, St. Johns Military Academy, or Lake Country School. Any large venue for receiving and storage will work as a POD. POD should have pre-developed security plans created in cooperation with County Public Health, County Sheriff, and local law enforcement.

1. LCFR may receive early initial warnings of a disaster, potential disaster, or other Incidents of critical significance, from municipal departments, the National Warning System, neighboring jurisdictions, the State EOC, the National Weather Service, the news media, or the general public.
2. Incidents of critical significance are those high-impact events that require a coordinated and effective response by an appropriate combination of municipal, County, private-sector, and non-governmental entities in order to manage an emergency event. Incidents of critical significance which require notification to the Emergency Manager or designee may include, but are not limited to the following:
 - a. Any incident which may require a substantial evacuation and/or temporary displacement of multiple persons (> 15 people) or where assistance in coordinating temporary sheltering or providing transportation assistance.
 - b. Any event posing a potential or actual threat of a mass casualty incident of level 2 or greater (> 11 victims).
 - c. Have significant impact and/or require significant information sharing, resource coordination, and/or assistance.
 - d. Attract a sizable influx of independent, spontaneous volunteers.
 - e. Overwhelm capabilities of government and infrastructure owners and operators.
 - f. Any incidents pertaining to significant hazardous material releases.
 - g. Events which create substantial media attention that may significantly impact the municipalities “corporate” reputation.
 - h. Any severe weather related warning or phenomena indicating or involving serious injury or property damage.
 - i. Any incident which close or significantly block major thoroughfares within the municipalities for an extended time period due to emergency events.
 - j. Any prolonged outage of public utilities.
 - i. Electrical: sustained electrical outage resulting in loss of power in excess of six hours and/or
 - ii. Natural gas: line breaks requiring evacuation of a significant number of the general public and/or closing of a major roadway; or loss of natural gas capacity in excess of six hours for a significant number of residents and/or

- iii. Sewer: any spill involving flow rate in excess of 100 gallons per minute or any spill in excess of 500 gallons into any major body of water; Water: any line break lowering pressure to a point requiring a ‘boil water’ order or an outage predicted to exceed six hours.
 - k. Wild land fires at or near the urban areas that threaten residential structures, utilities, or cause extended road closures.
 - l. Any incident where public resources within the municipalities are depleted, being deployed out of the area or any event posing a major environmental threat.
3. Upon the receipt of notification of any significant event occurring in one of LCFR’s municipalities, the Waukesha County Communications will:
 - a. Notify LCFR’s Emergency Manager or designee
 - b. Notify County and State warning points as necessary
 - c. Notify appropriate response agencies
 - d. Notify the public
4. Upon the notification of the warning (imminent or spontaneous event) each municipality department will initiate internal notifications of actions to:
 - a. Alert employees assigned to emergency duties as appropriate to the situation or specific instructions
 - i. Suspend or curtail normal business activities
 - ii. Recall essential off duty employees
 - iii. Send non-critical employees home
 - iv. Secure and evacuate the department’s facilities if applicable.

O. WATCH AND STANDBY PROCEDURES

1. A watch and/or standby designation is an elevated advisory or response condition in order to make advance emergency preparations. The Emergency Manager or designee may issue a watch/standby order if a pending disaster has the potential of affecting the municipalities. When issued, the municipal departments and partner agencies will take the following actions:
 - a. Review this document
 - b. Notify employees
 - c. Review agency specific emergency plans

- d. Insure that department vehicles and equipment are serviced and ready to be deployed
- e. Inventory existing communication equipment. Be prepared to collect and redistribute radios, portable telephones, chargers, batteries, etc.
- f. Obtain maps, drawings, and other emergency aids.
- g. Continue to provide routine service to the public, but plan to change the emergency procedures upon warning notification.
- h. The public may be notified that the municipalities are in a watch/standby situation and will be advised to take appropriate preparedness measures.

P. MUNICIPAL EMPLOYEE RECALL PROCEDURES

1. Recall procedures vary depending on each municipal department and each municipal department has the responsibility to inform employees of proper recall procedures. Employees who are recalled are expected to secure their families and homes, and report promptly to their assigned positions. Municipal employee contact lists are included at the end of this document.
2. Employees who are recalled should realize that the emergency may be several days or longer in duration. Each employee should report to his/her emergency assignment with personal items necessary for 72 hours (e.g. personal articles, toiletries, change of clothing, medications, special non-refrigerated dietary foods, blankets/sleeping bag, etc.)

Q. ESSENTIAL EMPLOYEE INFORMATION

1. Essential employees are designated by each of the municipalities by each body and the department heads.
2. All essential employees shall report to the designated area, at the time specified by their department manager for further instructions.
3. Essential employees should come to the designated area prepared for an extended stay of at least 24 hours, perhaps lasting several days or even weeks.
4. Essential employees should come equipped to the designated area with the necessary supplies.

R. EMERGENCY PUBLIC INFORMATION

1. Rapid dissemination of information is essential and vital for health and safety protection during and after emergencies and disasters. The primary means to do this is by direct contact with the media through prepared statements by the municipalities Emergency Manager or designee in coordination with the community heads by using press releases, public service announcements, and

telephonic or social media networking applications.

2. Citizens have the responsibility to prepare themselves and their families to cope with emergency situations and manage their affairs and property in ways that will aid the government in managing emergencies. The municipalities will assist citizens in carrying out these responsibilities by providing public information and instructions prior to and during emergency situations. In the event an incident requires comprehensive public information, the Emergency Operations Center may establish a Joint Information Center (JIC). The JIC serves as the location representing various organizations from local, State, or State jurisdictions to coordinate the dissemination of emergency public information. In coordinating timely and consistent information, the JIC serves to reduce information gaps, misinformation and rumors during an emergency.

S. EMERGENCY PROCLAMATION / REQUEST FOR ASSISTANCE AND RESOURCE REQUESTS

1. Emergency Proclamation

- a. A local “Emergency Proclamation” is the legal method which authorizes extraordinary measures to meet emergencies and/or solve disaster problems. A proclamation allows for the emergency appropriation of monies, emergency use of resources, the by-passing of time consuming requirements such as: hearings; competitive bid process; and activates extraordinary measures as outlined in this plan. A proclamation is typically a prerequisite for State and/or Federal assistance and made at the onset of a disaster to allow the municipalities to do as much as possible to help itself.
- b. An emergency proclamation is a prerequisite to the following actions:
 - i. Allow the municipality(s) head to issue emergency orders and provide for the expeditious mobilization of municipality(ies’) resources in responding to an emergency occurrence to ensure the safety of life, protect property, the environment and allow economic survival of the community.
 - ii. Request the Governor to enact specific emergency powers.
 - iii. Request the use of money from the State Emergency Disaster Fund.
 - iv. Request State or Federal assistance
 - i. A written or verbal proclamation may be issued, however, after a verbal proclamation is declared, it must be followed by a written declaration and filed with the municipality for official documentation as soon as the emergency conditions allow.

- ii. In preparing a proclamation, a description of the event and the necessary emergency authorizations need to be documented. The County should be informed via the County Emergency Manager and the State should be informed via the Region Wisconsin Emergency Management Office and the public informed as soon as possible when an Emergency Proclamation is declared and/or signed.
 - iii. The municipality heads and/or the Emergency Manager may declare a Local State of Emergency to expedite access to local resources needed to cope with the incident. If the needed response exceeds these local capabilities a state of emergency exists. The municipal head(s) may further ask for a gubernatorial declaration and State and/or Federal assistance.
- c. A “State of Emergency Proclamation” is the legal method which authorizes extraordinary measures to meet emergencies and/or solve the consequences of a disaster. A “State of Emergency Proclamation” is normally issued when, in the judgment of the municipal head(s), and with consultation of the Emergency Manager the threat or actual occurrence of an emergency is of sufficient severity and magnitude that local resources are insufficient to meet the needs of the event.
- d. A State of Emergency Proclamation is a prerequisite to the following actions:
 - i. Allow the municipal heads to issue emergency orders and provide for the expeditions mobilization of municipal resources in responding to an emergency event to ensure the safety of life, protect property, the environment, and allow community economic survival
 - ii. Request the Governor to enact specific emergency powers
 - iii. Request use of money from the State Emergency and Disaster Fund
 - iv. Request State or Federal assistance

2. Request for Assistance

- a. If the situation is beyond local capability, a request for County or State assistance, and/or Federal assistance may be in the original proclamation or included in a second proclamation presented to the Governor through the State EOC. The “Local Proclamation” and the “Request for Assistance” are two separate actions, although they may be combined.

Part of this proclamation includes the municipal heads proclaiming they are “in a state of emergency.”

- b. At the State level, decision making authority and commitment of State resources is retained at the State EOC (SEOC). The SEOC tracks Mission assignments coordinated by the State.
- c. Should State assistance be granted, a State Coordinating Officer (SCO) will be appointed to interface directly between the State and local government and to coordinate State ESFs mobilized to support local emergency operations.
- d. A Federal Coordinating Officer (FCO) works with the SCO to identify requirements. A Joint Field Office (JFO) may be established to coordinate State and Federal resources. A Principal Federal Officer (PFO) may be designated to coordinate Federal interagency incident management efforts.

3. Resource Requests

- a. The municipality(s) must validate and approve all municipal resource requests and verify that local resources have been or will be exhausted as a result of the incident, and that resources are not available from the local private sector.
- b. The municipality(ies) EOC will attempt to support all requests for resource support from locally or regionally available resources until these have been or will be exhausted. Unmet resource requests will be consolidated and forwarded to the County. The EOC Resource Status and Procurement Unit will coordinate Resource/mission requests from the EOC to the County EOC.
- c. The County will attempt to support all requests for resource support from County or other regional resource pools until these resources are or will be exhausted. Unmet resource requests/needs will be consolidated and forwarded to the State of Wisconsin through the Wisconsin Emergency Management (WEM) Regional office, WEM Duty Officer, or State Emergency Operations Center (SEOC).

T. PUBLIC PROTECTION: EVACUATION AND SHELTER

1. Evacuation

- a. The purpose of evacuation is to move people, and where appropriate other living creatures, away from an actual or potential danger to a safer place. For this to happen safely, plans must be in place not just for alerting people and moving them, but also to shelter and support them through to their eventual return and recovery.
- b. The overall objectives of emergency evacuation operations and notifications are to:

- i. Expedite the movement of persons from hazardous areas. Institute access control measures to prevent unauthorized persons from entering vacated or partially vacated areas.
 - ii. Provide for evacuation to appropriate transportation points, evacuation points, and shelters.
 - iii. Provide adequate means of transportation for persons with disabilities, the elderly or other persons with special needs, and persons without vehicles.
 - iv. Provide for the procurement, allocation, and use of necessary transportation and law enforcement resources by means of mutual aid or other agreements.
 - v. Control evacuation traffic.
 - vi. Account for the needs of individuals with household pets and service animals prior to, during, and following a major disaster or emergency.
 - vii. Provide initial notification, ongoing, and re-entry communications to the public through the Joint Information Center (JIC).
 - viii. Assure the safety and re-entry of the evacuated persons.
- c. The local government must be prepared to manage an evacuation on a range of scales. There are no precise parameters regarding evacuation scale, however for planning purposes, it is helpful to describe evacuations on four levels.
- i. Site Evacuation: Is a small-scale, localized operation which may be needed as a result of a severe weather event, hazardous material incident, major fire, bomb threat or civil disturbance. Site evacuation involves a small number of people. This typically includes workers at the site and people from adjacent occupancies. Evacuation holding times are typically short, generally less than an hour or two, and citizens are permitted to return to their businesses or homes.
 - ii. Intermediate Level Evacuation: involves a larger number of citizens and a larger area may be necessary if the event impacts a larger geographic area. This level affects off-site homes and businesses and normally affects fewer than 100 people. People may remain out of the area for two to four hours or more. Collecting, documenting, and managing the evacuees become more difficult. Off-site collection sites or shelter areas will need to be determined and managed.

- iii. Large Scale Evacuation: could be required in the event of a significant natural or technological disaster or a local terrorist threat or attack. Thousands of people could be evacuated. Evacuees may be out of their homes and businesses for many hours if not days. Evacuation completion time frames will be extended. Evacuation shelters will need to be located, opened and managed. Documentation and tracking of evacuees becomes more important as well as more difficult. Site and evacuation perimeters become extended and require many more resources to maintain. Security of the evacuated area will be a significant concern.
 - iv. Mass Evacuation: could be required due to an event that may cause or has caused a major disaster. The situation may require the implementation of regional, multi-jurisdictional evacuation and sheltering operations. Many thousands of people may need to be evacuated for an extended period of time. Large-scale reception operations would be required and sheltering needs would be regional in nature. Local resources would most likely be exhausted and significant State and State assistance would be required to support the evacuation and sheltering operation.
- d. Evacuations, other than limited site or intermediate evacuations ordered by authorized response agencies to protect lives will be initiated following an evacuation order from the Emergency Manager, Incident Commander or designee.
- i. A number of citizens will require special assistance during the evacuation and recovery phases of a disaster. This population will be encouraged to notify appropriate shelters, family, Waukesha County agencies and transportation representatives of their needs.
 - ii. The EOC, the Emergency Manager, and Law Enforcement have lead responsibility for organizing and mobilizing evacuation operations.
 - iii. All assistance and support of such actions will be coordinated from the municipal EOC. Decisions on issues such as: deploying and re-deploying personnel; determining evacuation routes; directing people trapped on evacuation routes to safe shelter; ensuring the sufficiency of fuel; and addressing any matters relative to the ordered protective actions will be made by the EOC Situation and Planning Unit in coordination with the County and/or State EOC.
 - iv. In the event of incidents requiring regional evacuation orders, consideration will be given to designating a specific time for businesses within an evacuation zone to close and evacuate personnel. This time should be subsequent to the issuance of a general evacuation order. It is the policy of the municipality to refrain from issuing a mandatory evacuation order for businesses unless absolutely necessary in an effort to maximize the available

resources to the general public prior to the incident or disaster.

- v. The Emergency Support Function structure promulgated in this plan will be used as appropriate to support evacuation operations.
- e. Re-entry into Emergency Areas
 - i. Emergency operations such as search and rescue, damage assessments, preliminary debris removal, and other tasks will need to be performed in order to assure some degree of stability and safety. Premature permanent re-entry of the general public into evacuated areas could complicate emergency response operations and leave the returning population vulnerable due to a lack of support services or safety issues.
 - ii. Re-entry into evacuated areas shall be restricted until sufficient levels of safety, services and infrastructure are available for the returning population. The incident commander or EOC Policy Group, depending on the incident, may permit re-entry into an area using the following guidelines:
 - i. No damages reported: Upon cancellation of all warnings/watches for the local jurisdiction, and when no damage has been reported, re-entry will be authorized.
 - ii. Substantial damages and/or injuries: After a local emergency which resulted in substantial injuries or harm to the population or substantial damage or loss of property, the evacuation order within those areas will be rescinded to the degree appropriate. An orderly return may be implemented in accordance with the categories and in order of priority as established below:
 1. Category One: Search and rescue teams, fire personnel, law enforcement personnel, transportation crews, utilities personnel, and public health officials.
 2. Category Two: Damage assessment teams dispatched by the EOC for the purpose of developing preliminary damage, accessibility, and safety hazard assessments.
 3. Category Three: Clean-up teams for the purpose of clearing and repairing roads, restoring utilities, and eliminating safety hazards to the degree necessary to allow re-entry.
 4. Category Four: Individuals who possess and exhibit appropriate residency documentation shall

be determined “priority class parties”. Priority Class parties will be permitted a reasonable time to return to their property. A re-entry identification system should be established to accelerate the re-entry process.

2. Sheltering

- a. One of the most important roles of government is to protect people from harm, including helping people obtain food and shelter in major emergencies. When disasters occur, victims are often provided safe refuge in temporary shelters located in schools, community centers, office buildings, tents or other facilities. The opening of shelters is a coordinated effort between municipal EOC, Waukesha County Department Health and Human Services, shelter providers, and the American Red Cross (ARC).
- b. The municipalities may utilize five types of sheltering options; shelter-in-place, protective, special medical needs, pet, and host shelters.
 - i. Shelter in Place - This a protective action process for taking immediate shelter in a location readily accessible to the affected individual(s). Shelter-in-place is generally intended as a short-term strategy for responding to disasters.
 - ii. Protective General Population Shelters – These shelters are selected to provide the maximum available protection from known hazards and threats. They are open to the general public upon activation and attempts will always be made to staff with trained shelter management teams.
 - iii. Special Medical Needs Shelter - Provide additional care for those individuals that meet the requirements of the access and functional needs program criteria. Due to the critical care required for a Special Medical Needs Shelter operation, such a shelter should be the last option for the public during an emergency incident. Such shelters shall be co-located with general population shelters, but have available additional staff and equipment to meet functional needs individuals. Those individuals whose needs exceed the capabilities of the Special Medical Needs Shelter should be transported to appropriate emergency medical facilities.
 - iv. Pet Shelter – Provides protection for domestic pets (dogs and cats) and their owners. Animals housed in pet shelters will not be housed directly with occupants but will be accessible.
 - v. Host Shelter – These shelters support the temporary housing of displaced persons from other regions of the County or State. Once activated, shelters will work closely with the municipal EOC to coordinate information and resources needed to operate the shelter. Some shelters may be opened by ARC and some may be opened

by municipalities or County staff and then turned over to ARC as additional resources become available to help with local response. Municipal or County run and community-run shelters should report their operational status as soon as possible to the municipal EOC so they can track shelter capacity and forecast needs for mass care and feeding such as food, supplies, equipment, personnel, etc. The ARC liaison in the EOC will provide coordination between ARC and the municipality.

- vi. Making emergency sheltering programs generally accessible is required by the Americans with Disabilities Act of 1990 (ADA).
- vii. State and local governments must comply with Title II of the ADA in the emergency and disaster related programs, services and activities they provide. This requirement applies to programs, services and activities provided directly by State and local governments as well as those provided through third parties, such as the American Red Cross, private nonprofit organizations and religious entities. The ADA generally does not require State or local emergency management programs to take actions that would fundamentally alter the nature of the program, service or activity or impose undue financial and administrative burdens. All established shelters will require security and access control measures.

U. RECOVERY FRAMEWORK

1. The municipalities' primary role is planning for and managing all aspects of its recovery. County, State and Federal officials will look to the municipalities to clearly articulate its recovery priorities and develop recovery plans. Post disaster recovery activities begin in the early stages of the response operations and may last for years.
2. Requests for immediate recovery and relief supplies and resources will be made by the municipalities to the County and/or State EOC.
3. The municipalities' recovery organization follows the concepts of the National Incident Management System (NIMS).
4. Depending upon the severity and magnitude of the disaster, full activation of the municipalities Recovery Incident Management System may not be necessary, may only be partially required, or may require full activation. Partial or full activation would be dictated by the characteristics of the disaster and would involve only those departments and organizations needing to interact in providing the necessary recovery activities and programs.
5. A municipal Disaster Recovery Manager (DRM) may be appointed to implement policy directives and manage recovery activities. The DRM ensures that the appropriate recovery support functions are identified and activated, that appropriate tasks are identified and prioritized, and that resources are applied

within this priority framework.

6. The municipality may establish a “Recovery Task Force” to oversee the recovery and reconstruction process, serve as an advisory committee to the Disaster Recovery Manager and the chief elected officials, and to identify mitigation opportunities, identify resources, and ensure maximum control over the recovery process.
7. Recovery planning begins when the municipal EOC is activated. Recovery planners begin an assessment of the disaster impacts and determine which Recovery Support Functions (RSFs) will be activated to meet the municipal recovery needs.
8. Just like ESFs, Recovery Support Functions represent groupings of types of recovery activities and programs that the municipalities and its citizens are likely to need following disaster. A “primary” agency/department for each RSF will be responsible for coordinating the implementation of the recovery activity or programs. The primary agency/department will be responsible for identifying the resources (support departments and organizations) within the RSF that will accomplish the post disaster activities. The primary agency/department is also responsible for coordinating the resource delivery.
9. The municipal response to and recovery disaster impacts will follow a “phased approach” that includes three general phases: short-term (days); intermediate (weeks); long-term (months-years).

V. STATE OF WISCONSIN RESPONSE

1. The State of Wisconsin provides assistance to impacted counties when the resources of the affected county and its municipalities have been exhausted. Requests for and deployment of resources are approved and coordinated by the State Emergency Operations Center.
2. The Governor has the inherent responsibility, constitutional and statutory authority for overseeing the State’s response to any emergency or disaster. When directed, state agencies will take the appropriate actions to mobilize and deploy resources to assist in life, safety, and property protection efforts.
3. Wisconsin Emergency Management (WEM) is responsible for the coordination of the State response to an emergency or disaster. WEM will make recommendations to the Governor on matters pertaining to State Declarations, requests for State assistance, and ongoing response and recovery activities. Other responsibilities of the State include:
 - a. Receive, evaluate and issue information on emergency operations.
 - b. Coordinate the activities of all State agencies.
 - c. Coordinate the receipt, allocation and delivery of resources supplied by the State or Federal government or other States.

- d. Coordinate emergency operations mutual aid with other states.

W. STATE GOVERNMENT RESPONSE

1. The State government provides assistance to affected communities when the capabilities of the local and State governments are exceeded. The State EOC will advise FEMA Region V that a formal request for State assistance is to be submitted. FEMA may deploy a FEMA liaison to the SEOC, and if a Presidential Disaster Declaration or State of Emergency is made, may deploy an Emergency Response Team (ERT).

III. RESPONSIBILITIES

A. GENERAL EMERGENCY MANAGEMENT RESPONSIBILITIES

1. The following common responsibilities are assigned to each department listed in this CEMP.
 - a. Participate as requested in mitigation and prevention, preparedness, response and recovery activities.
 - b. Provide staff members with training and exercise opportunities adequate to prepare them to carry out the responsibilities identified in this CEMP.
 - c. Upon receipt of an alert or warning of an emergency, initiate notification actions to alert employees on assigned response duties.
 - d. As appropriate during an alert or warning:
 - i. Suspend or curtail normal business activities as appropriate.
 - ii. Recall needed off-duty employees.
 - iii. Send employees that are not needed home so they can protect their families and possessions.
 - iv. Secure and protect departmental facilities.
 - v. Evacuate departmental facilities if appropriate.
 - e. As requested, augment the EOC's effort to warn the public through use of vehicles equipped with public address systems, sirens, employees going from door to door, etc.
 - f. Keep the EOC informed of field activities and maintain a communications link to the EOC.
 - g. If appropriate or requested, send a representative to the EOC.

- h. Department Operations Center (DOC) if appropriate to support and facilitate department response activities, maintain events log, and report information to the EOC.
- i. Report damages and status of critical facilities to the EOC.
- j. If appropriate or requested, send a representative to the EOC.
- k. Coordinate with the EOC to establish protocols for interfacing with State and Federal responders.
- l. Coordinate with the EOC Public Information Officer before releasing information to the media.
- m. Submit reports to the EOC detailing departmental plans, emergency expenditures and obligations.

B. GENERAL PREPAREDNESS RESPONSIBILITIES

1. All municipal departments may have emergency–related functions in addition to their normal daily functions. Each department head is responsible for the development and maintenance of their respective department emergency and continuity of operations (COOP) plans and procedures for each division and section, and performing such functions as may be required to effectively cope with and recover from any emergency affecting their respective areas of responsibility. Specifically, the following common responsibilities are assigned to each department listed in this CEMP.
 - a. Create emergency and COOP plans for their department.
 - b. Create and maintain a department calling tree or other method for notification.
 - c. Establish department and individual responsibilities (as indicated in these plans); identify emergency tasks.
 - d. Work with other municipal departments to enhance cooperation and coordination, and eliminate redundancy. Departments having shared responsibilities should work to complement each other.
 - e. Establish education and training programs so that each division, section, and employee will know exactly where, when and how to respond.
 - f. Develop site specific emergency plans for department facilities as necessary.
 - g. Ensure that employee job descriptions reflect their emergency duties.

- h. Train personnel to perform emergency duties/tasks as out lined in the CEMP or individual department plans.
- i. Identify, categorize and inventory all available department resources.
- j. Develop procedures for mobilizing and employing additional resources.
- k. Establish uninterrupted communication capabilities with the EOC.
- l. Prepare to fill positions in the emergency organization as requested by the Emergency Manager or designee acting in accordance with this CEMP.
- m. Prepare to provide internal logistical support to department operations during the initial emergency response phase.

C. GENERAL RESPONSE RESPONSIBILITIES

1. Implement department emergency and COOP plans when necessary;
 - a. Be responsible for the call back of all personnel they intend to use in both their routine and assigned functions and directing such personnel where to report and their respective assignment.
 - b. Be responsible for the safety of vital records, files and equipment assigned to their respective department/ divisions.
 - c. Ensure that vital records are protected and maintained.
 - d. Ensure that activity logs are initiated as a matter of record.
 - e. Coordinate, where appropriate, to ensure that each of their facilities and buildings are secure before an emergency strikes.

D. SPECIFIC RESPONSIBILITIES BY DEPARTMENT

1. The General emergency preparedness responsibilities of all municipal government organizations and non-government organizations are outlined in the previous sections and in the letter of agreement to this plan.

IV. FINANCIAL MANAGEMENT

A. GENERAL

1. During and after emergency/disaster events normal fiscal and administrative functions and regulations may need to be temporarily modified or suspended in order to support emergency operations in a timely manner. Additionally, if certain emergency costs can be documented, certain reimbursements from State and State sources may be possible. Municipal emergency response and recovery costs must be properly documented so that eligible reimbursements from state and federal sources may be possible.

B. POLICIES

1. All departments will make every effort possible to assure the safety of cash, checks, accounts receivable, and assist in the protection of other valuable documents/ records.
2. Departments will designate personnel to be responsible for documentation of disaster operations and expenditures. Emergency expenditures will be incurred in accordance with existing municipal emergency purchasing procedures.
3. During the emergency operations, non-essential administrative activities may be suspended, and personnel not assigned to essential duties may be assigned to other departments to provide emergency support. Each department will keep an updated inventory of its personnel, facilities, and equipment resources as part of their emergency plans and procedures.

C. ADMINISTRATION

1. During an emergency or disaster, administrative procedures may have to be suspended, relaxed, or made optional in the interest of protecting life or property. Departments are authorized to take necessary and prudent actions in response to disaster emergency incidents. Emergency services officers have independent authority to react to emergency situations.
2. Normal procedures which do not interfere with timely accomplishment of emergency tasks will continue to be used. Those emergency administrative procedures which depart from “business-as-usual” will be described in detail in department emergency and disaster policies, procedures, and instructions or in their incident action plan during EOC activation.
3. Departments are responsible for keeping records of the name, arrival time, duration of utilization, departure time and other information relative to the service of emergency workers, as well as documentation of any employee or authorized volunteer injuries, lost or damaged equipment, and any associated or extraordinary costs.

D. PRESERVATION OF RECORDS

1. In order to continue normal government operations following an emergency situation disaster, vital records must be protected. These include legal documents as well as property and tax records. The principal causes of damage to records are fire and water; therefore, essential records shall be protected accordingly. Each department responsible for preparation of annexes to this plan will include protection of vital records in its SOPs. If records are damaged during an emergency situation, the municipality will seek professional assistance to preserve and restore them.

E. POST-INCIDENT & EXERCISE REIVEW

1. The Emergency Management Director(s) is responsible for organizing and conducting an After Action Debrief following the conclusion of a significant emergency event/incident or exercise. Exercises follow the guidance provided in the Homeland Security Exercise Evaluation Program (HSEEP) which includes preparation of an After Action Report (AAR) and integrated Improvement Plan (IP). The after action debrief will entail both written and verbal input from all appropriate participants as the basis for the AAR. Where deficiencies are identified, an individual, department, or agency will be assigned responsibility for correcting the deficiency and due date shall be established for that action and forms the content of the IP.

F. FISCAL

1. Department of Administration and Financial Division personnel shall facilitate the acquisition of supplies, equipment, and services necessary to support the emergency response actions of municipal departments.
2. When circumstances dictate, emergency response field personnel may be given purchasing authority after coordination with the Finance Director(s). A record of all purchases shall be reported to the Finance Department in accordance with municipal purchasing policies. A complete and accurate record of all purchases, a complete record of all properties commandeered to save lives and property, and an inventory of all supplies and equipment purchased in support of the emergency response shall be maintained.
3. Though certain formal procedures may be waived, this in no way lessens the requirement for sound financial management and accountability. Departments will identify personnel to be responsible for documentation of disaster costs and utilize existing administrative methods to keep accurate records separating disaster operational expenditures from day-to-day expenditures. Documentation will include: logs, formal records and file copies of all expenditures, receipts, personnel time sheets. Department Heads will be held responsible for deviations from the emergency purchasing procedures.
4. A separate Emergency Operations Center (EOC) "Finance Strike Team" may be formed to handle the monetary and financial functions during large emergencies, disasters under the Finance and Administration Section of NIMS organized Incident Command System.
5. The municipalities may qualify for reimbursement of certain emergency costs from State, State disaster recovery programs. The municipality may also collect damages from its insurance carriers or other responsible party(s). Successful documentation of expenditures will maximize the reimbursements and assistance that the municipality and its citizens will receive. All municipal departments and agencies are expected to include requirements for emergency fiscal record keeping in their emergency plans and procedures.

G. LOGISTICS

1. Departments responding to emergencies and disasters will first use their

available resources. When this plan is implemented, the EOC becomes the focal point for procurement, distribution and replacement of personnel, equipment and supplies. Scarce resources will be allocated according to established priorities and objectives of the Incident Commander(s).

2. Logistics will be needed to support the field operations, the Emergency Operations Center (EOC) operations, and disaster victims.
3. All departments are expected to maintain an inventory of all non-consumable items, to include their disposition after the conclusion of the emergency proclamation. Items that are not accounted for, or that are placed in municipal inventory as an asset will not be eligible for reimbursement.

V. ATTACHMENTS

A. Glossary and Acronyms

(SEE NEXT PAGE)

GLOSSARY

– A –	
Access/Accessible	The suitability or adaptability of programs, services, activities, goods, facilities, privileges, advantages or accommodations provided by a public or private (for-profit or not-for-profit) entity, or by any entity to which it contracts for all members of the population, including individuals with functional or access needs.
Access and Functional Needs	Persons who may have additional needs before, during and after an incident in functional areas, including but not limited to: maintaining independence, communication, transportation, supervision, and medical care. Individuals in need of additional response assistance may include those who have functional or access needs; live in institutionalized settings; are seniors; are children; are from diverse cultures; have limited English proficiency, non-English speaking; or transportation disadvantaged.
Activation	A process by which a facility is brought up to emergency mode from a normal mode of operation. Activation is completed when the facility is ready to carry out full emergency operations.
After Action Report	A formal document detailing strengths and areas for improvement following an event or exercise.
Agency	A division of government with a specific function offering a particular kind of assistance. In ICS, agencies are defined either as jurisdictional (having statutory responsibility for incident management) or as assisting or cooperating (providing resources or other assistance).
Agency Representative	A person assigned by a primary, assisting, or cooperating Federal, State, local, or tribal government agency or private entity delegated authority to make decisions affecting that agency's or organization's participation in incident management activities following appropriate consultation with the agency leadership.
Aid Agreements, Mutual (Pacts)	Written or unwritten understandings among jurisdictions, which cover methods and types of assistance available during an emergency.
Alternate EOC	A site located away from the primary EOC from which civil government officials exercise direction and control in an emergency or disaster.
Area Command (Unified Area Command)	An organization established (1) to oversee the management of multiple incidents that are each being handled by an ICS organization or (2) to oversee the management of large or multiple incidents to which several Incident Management Teams have been assigned. Area Command has the responsibility to set overall strategy and priorities, allocate critical resources according to priorities, ensure that incidents are properly managed, and ensure that objectives are met and strategies followed. Area Command becomes Unified Area Command when incidents are multi-jurisdictional. Area Command may be established at an EOC facility or at some location other than an ICP.
Available Resources	Resources assigned to an incident, checked in, and available for use, normally located in a Staging Area.

– B –	
Base Camp	A resource staging area for personnel and equipment.
Business Continuity (BC)	The capability to maintain or return to normal provision of day-to-day services.
– C –	
Catastrophic Incident	Any natural or man-made incident, including terrorism that results in extraordinary levels of mass casualties, damage or disruption severely affecting the population, infrastructure, environment, economy, national morale and / or government functions. A catastrophic event could result in sustained national impacts over a prolonged period of time; almost immediately exceeds resources normally available to State, local, tribal, and private sector authorities in the impacted area; and significantly interrupts governmental operations and emergency services to such an extent that national security could be threatened. All catastrophic events are Incidents of National Significance.
Chain of Command	A series of command, control, executive, or management positions in hierarchical order of authority.
CHEMTREC	“Chemical Transportation Emergency Center,” a public service of the Chemical Manufacturers Association located in Washington, D. C. CHEMTREC provides immediate advice for emergency personnel at the scene of an accident or spill. A telephone hotline for emergencies is: 1-800-424-9300.
Civil Disturbance	Any incident intended to disrupt community affairs and requiring law enforcement intervention and emergency management assistance to maintain public safety. These include, but are not limited to: terrorist attacks, riots, and strikes which result in violence, and demonstrations requiring police intervention and arrests.
Clean Sweep Program	An organized campaign to collect and properly dispose of toxic or hazardous household chemicals (pesticides, solvents, paints, etc.)
COAD	Citizens and Organizations Active in Disaster: an organized group of community resources (personnel and equipment) available to assist government agencies before, during and following disaster occurrence.
Command Staff	In an incident management organization, the Command Staff consists of the Incident Command and the special staff positions of Public Information Officer, Safety Officer, Liaison Officer, and other positions as required, who report directly to the Incident Commander. They may have an assistant or assistants, as needed.
Community Recovery	In the context of the NRF and its annexes, the process of assessing the effects of an Incident of National Significance, defining resources, and developing and implementing a course of action restore and revitalize the socioeconomic and physical structure of a community.

Comprehensive Emergency Management (CEM)	An integrated approach to the management of emergency programs and activities for all four emergency phases (mitigation, preparedness, response, and recovery), for all types of emergencies and disasters (natural, man-made, and attack), and for all levels of government (local, state, and Federal) and the private sector.
Comprehensive Emergency Management Plan (CEMP)	Contains policies, authorities, concept of operations, legal constraints, responsibilities, and required emergency functions. Strategic document to guide development of Agency response plans, SOPs, and specific incident action plans.
Congregate Care	Refers to the provision of temporary housing and basic necessities for evacuees.
Consequence Management	Predominantly an emergency management function and included measures to protect public health and safety, restore essential government services, and provide emergency relief to governments, businesses, and individuals affected by the consequences of terrorism. The requirements of consequence management and crisis management are combined in the NRF. See also Crisis Management.
Continuity of Government (COG)	All measures that may be taken to ensure the continuity of essential functions of the three branches of government—executive, legislative and judicial—in the event of an emergency or disaster.
Continuity of Operations Plan (COOP)	The plan includes all measures that may be taken to ensure the continuity or return to continuity of daily functions of the three branches of government—executive, legislative and judicial—in the event of an emergency or disaster. Often referred to as Business Continuity Plan (BCP)
Credible Threat	A potential terrorist threat based on a threat assessment evaluated as reliable and likely to involve WMD.
Crisis Action Team (CAT)	A flexible, supporting / coordinating service that could be one person at home facilitating the coordination of personnel and resources to an incident scene; Several people convening in the Emergency Operations Center (EOC) or on-scene to assist the “Incident Manager” as needed.
Crisis Counseling Grants	Funded by FEMA under the Stafford Act to address the counseling needs of a community following a presidentially declared disaster in which individual assistance is authorized.
Critical Facilities	Specific structures or facilities that support the delivery of essential services. Critical facilities can also be defined as locations having large concentrations of people either temporarily or permanently such as high occupancy structures, special population facilities, or special community events.
Critical Infrastructures	Systems and assets, whether physical or virtual, so vital to the United States that incapacity or destruction of such systems and assets would have a debilitating impact on security, nation economic security, national public health or safety, or any combination of those matters.
Cultural Resources	Cultural resources include historic and prehistoric structures, archeological

	sites, cultural, landscapes, and museum collections.
Cyber	Pertaining to computers and their support systems, such as servers, routers, and switches that support critical infrastructure.
- D -	
Damage Assessment	Damage assessment is the systematic process of describing in general terms the location, nature, and severity of damage sustained by the public and private sectors in an emergency or disaster and estimating the cost of repair and restoration or replacement; Estimation of damages made after a disaster has occurred which serves as the basis of the Governor’s request to the President for a declaration of Emergency or Major Disaster.
Decontamination	The reduction or removal of contaminating chemical or radioactive material from a structure, area, object or person.
Defense Support of Civil Authorities (DSCA)	Refers to <i>DOD</i> support, including Federal military forces, <i>DOD</i> civilians and <i>DOD</i> contractor personnel, and <i>DOD</i> agencies and components, for domestic emergencies and for designated law enforcement and other activities.
Deputy	A fully qualified individual who, in the absence of a superior, could be delegated the authority to manage a functional operation or perform a specific task. In some cases, a deputy could act as relief for a superior and therefore must be fully qualified in the position. Deputies can be assigned to the Incident Commander, General Staff, and Branch Director(s).
Direction and Control	The assignment of missions, tasks and procedures to operate government during emergency operations; The provision of overall operational control and/or coordination of emergency operations at each level of the statewide emergency organization, whether it be direction of field forces or the coordination of joint efforts of governmental and private agencies in supporting such operations.
Disaster	Any occurrence or imminent threat of widespread or severe damage, injury, or loss of life or property resulting from a Natural, Technological, and / or National Security incident, including but not limited to earthquake, explosion, fire, flood, high water, hostile military actions, hurricanes, landslide, mudslide, storms, tidal wave, tornado, wind-driven water, or other disasters.
Disaster Analysis	The collection, reporting and analysis of disaster related damages to determine the impact of the damage and facilitate emergency management of resources and services to the stricken area.
Disaster Assessment	Quick, initial assessment of disaster impacts on people, property, and environment.
Disaster Field Office (DFO)	The primary federal field location in or near the disaster area for the coordination of the federal response and recovery operations; a point of coordination and control for state and federal governmental efforts to support disaster relief and recovery operations. It houses the Federal Coordinating Officer (FCO), Emergency Support Function (ESF) staff and other staff comprising the Emergency Response Team (ERT). It will

	operate 24 hours a day, as needed, or with a schedule sufficient to sustain the federal response operations. Except where facilities do not permit, the FCO will be co-located with the State Coordinating Officer (SCO) at the DFO. A DFO will be established in each affected State.
Disaster Recovery Center (DRC)	A facility established in a centralized location within or near the disaster area at which disaster victims (individuals, families, or businesses) apply for disaster aid.
Distribution	The process of delivering a commodity from convenient points to the customers.
- E -	
Emergency	Any incident which requires emergency assistance to save lives and protect public health and safety or to avert or lessen the threat of a major disaster. (PL 93-288); Any occasion or instance for which, in the determination of the Governor, state assistance is needed to supplement local efforts and capabilities to save lives and protect property and public health and safety, or to lessen or avert the threat of a catastrophe in any part of the state.
Emergency Alert System (EAS)	Formally the Emergency Broadcast System. Consists of broadcasting stations and interconnecting facilities that have been authorized by the Federal Communications Commission to operate in a controlled manner during emergencies.
Emergency Communication Vehicle	An emergency management vehicle providing the capabilities to communicate and exercise direction and control over an emergency.
Emergency Information	Material designed to improve public knowledge or understanding of an emergency.
Emergency Instructions	Information provided to the general public during an emergency pertaining to recommendations for actions such as evacuation and sheltering.
Emergency Management	The preparation for and the carrying out of all emergency functions, other than functions for which the military forces are primarily responsible, to minimize injury and repair damage resulting from disasters caused by enemy attack, sabotage, or other hostile action, or by fire, flood, storm, earthquake, or other natural causes, and to provide support for search and rescue operations for persons and property in distress; organized analysis, planning, decision-making, assignment, and coordination of available resources to the mitigation of, preparedness for, response to, or recovery from major community-wide emergencies. Refer to local and state emergency legislation.
Emergency Management Plans	Those plans prepared by federal, state and local governments in advance and in anticipation of disasters for the purposes of assuring effective management and delivery of aid to disaster victims, and providing for disaster prevention, warning, emergency response, and recovery.
Emergency Operations Center (EOC)	A protected site from which public officials issue warnings and exercise direction and control during an emergency / disaster. It is equipped and staffed to provide support in coordinating and guiding emergency / disaster

	operations.
Emergency Protective Measures	Those efforts to protect life and property against anticipated and occurring effects of a disaster. These activities generally take place after disaster warning (if any) and throughout the incidence period.
Emergency Public Information	Information that is disseminated primarily in anticipation of an emergency or during an emergency. In addition to providing situational information to the public, it also frequently provides directive actions required to be taken by the general public.
Emergency Public Information (EPI)	Information disseminated to the public by official sources during an emergency, using broadcast and print media, in anticipation of an emergency, or at the actual time of an emergency; in addition to providing information as such, frequently directs actions, instructs, and transmits direct orders. Includes rumor-control processes.
Emergency Response Plan (ERP)	The "steady-state" plan maintained by various jurisdictional levels for managing a wide variety of potential hazards.
Emergency Response Provider	Includes Federal, State, local, and tribal emergency public safety, law enforcement, emergency response, emergency medical (including hospital emergency facilities), and related personnel. Agencies and authorities. (See section 2(6), Homeland Security Act of 2002, Public Law 107-296, 116 Stat. 2135 (2002).) Also known as "emergency responder."
Emergency Response Team (ERT)	An interagency team, consisting of the lead representative from each Federal department or agency assigned primary responsibility for an ESF and key members of the FCO's staff, formed to assist the FCO in carrying out his/her coordination responsibilities. The ERT provides a forum for coordinating the overall Federal response, reporting on the conduct of specific operations, exchanging information, and resolving issues related to ESF and other response requirements. ERT members respond to and meet as requested by the FCO. The ERT may be expanded by the FCO to include designated representatives of other Federal Departments and agencies as needed.
Emergency Support Function (ESF)	A grouping of government and certain private-sector capabilities into an organizational structure to provide the support, resources, program implementation, and services that are most likely to be needed to save lives, protect property and the environment, restore essential services and critical infrastructure, and help victims and communities return to normal, when feasible, following domestic incidents.
Emergency Support Team (EST)	An interagency group operating from the Federal Emergency Management Agency (FEMA) headquarters. The EST oversees the national-level response support effort and coordinates activities with the ESF primary and support agencies in supporting Federal response requirements in the field.
Emerging Infectious Diseases	New or recurring infectious diseases of people, domestic animals, and/or wildlife, including identification, etiology, pathogenesis, zoonotic potential, and ecological impact.
Energy Management	The technology involving the analysis of energy use resulting in appropriate

	techniques and methods to ensure more efficient utilization of energy resources.
Environment	Natural and cultural resources and historic properties as those terms are defined in this glossary and in relevant laws.
Environmental Response Team	Established by EPA, the Environmental Response Team includes expertise in biology, chemistry, hydrology, geology and engineering. The Environmental Response Team provides technical advice and assistance to the OSC for both planning and response to discharges and release of oil and hazardous substances into the environment.
EPCRA	The Emergency Planning and Community Right-to-know Act (EPCRA) is Title III, of the Superfund Amendments and Reauthorization Act of 1986 (as amended) (SARA). The Act requires Local Emergency Planning Committees to formulate a comprehensive emergency plan to deal with Hazardous Materials and public access to chemical inventory reports within its district.
Essential Services	Services which local government must at a minimum strive to provide at all times.
Evacuation	Organized, phased, and supervised withdrawal, dispersal, or removal of civilians from dangerous or potentially dangerous areas, and their reception and care in safe areas.
Exercise	Maneuver or simulated emergency condition involving planning, preparation, and execution; carried out for the purpose of testing, evaluating, planning, developing, training, and / or demonstrating emergency management systems and individual components and capabilities, to identify areas of strength and weakness for improvement of the CEMP.
– F –	
Facility Management	Facility selection and acquisition, building services, information systems, communications, safety and health, and physical security.
Federal / State Agreement	The agreement signed by the Governor and the Regional Director(s) of the Federal Emergency Management Agency, specifying the manner in which federal assistance will be made available for a Presidential Disaster Declaration or State of Emergency, Fire Suppression, or Major Disaster, and containing terms and conditions consistent with applicable laws, executive orders, and regulations as the President of the United States may require.
Federal Assistance	Aid to disaster victims or state or local governments by federal agencies authorized to provide assistance under federal statutes.
Federal Coordinating Officer (FCO)	The person appointed by Federal Emergency Management Agency to coordinate all federal disaster assistance programs to ensure their maximum effectiveness and take appropriate action to help local citizens and public

	officials obtain the assistance to which they are entitled.
Federal Disaster Assistance	Aid to disaster victims or state and local governments by federal agencies under provisions of the Robert T. Stafford Relief and Emergency Assistance Act of 1988 (PL 93–288) as amended.
Federal Hazard Mitigation Officer (FHMO)	Person appointed by the FCO responsible for managing federal hazard mitigation programs and activities.
Federal Interagency Hazard Mitigation Team (I–Team)	Activated by the FHMO immediately following a Presidential Disaster Declaration, and made up of appropriate federal, state, and local government representatives to identify opportunities for hazard mitigation.
Federal On-Scene Coordinator (FOSC or OSC)	The Federal official pre-designated by the EPA or the USCG to coordinate responses under subpart D of the National Contingency Plan (NCP), or the government official designated to coordinate and direct removal actions under subpart E of the NCP.
FEMA	Federal Emergency Management Agency.
First Responder	Local and nongovernmental police, fire, and emergency personnel who in the early stages of an incident are responsible for the protection and preservation of life, property, evidence, and the environment, including emergency response providers as described in section 2 of the Homeland Security Act of 2002 (6 U.S.C. 101), as well as emergency management, public health, clinical care, public works, and other skilled support personnel (such as equipment operators) who provide immediate support services during prevention, response, and recovery operations. First responders may include personnel from Federal, State, local, tribal, or nongovernmental organizations.
Functional Needs	The needs of an individual who under usual circumstances is able to function on their own or with support systems. However, during an emergency, their level of independence is challenged.
– G –	
Governor’s Authorized Representative (GAR)	That person named by the Governor in the Federal / State Agreement to execute on behalf of the state all necessary documents for disaster assistance following the declaration of an emergency or a major disaster, including certification of applications for public assistance.
Grantee	The state agency that is eligible to receive federal dollars in a Presidential Disaster.
– H –	
Hazard	Any situation that has the potential for causing damage to life, property, and / or the environment.
Hazard Mitigation	Any cost-effective measure which will reduce the potential for damage to a facility from disaster event.
Hazard Mitigation Grant Program	Federal government may contribute up to 75 percent of the cost of hazard mitigation measures which FEMA has determined are cost-effective and which substantially reduce the risk of future damage, hardship, loss, or

	suffering in any area affected by major disaster. (Stafford Act, Sec. 404)
Hazard Mitigation Plan	Section 409 of the Stafford Act requires the state and affected local governments to prepare a hazard mitigation plan that evaluates the natural hazards within the disaster area(s) and recommends appropriate measures to reduce the risks from future disasters.
Hazardous Materials (HazMat)	A substance or material in a quantity or form that may pose a risk to health and safety or property when released to the environment.
Hazardous Substance	As described by the NCP, any substance designated pursuant to section 311 (b)(2) (A) of the Clean Water Act; any element, compound, mixture, solution, or substance designated pursuant section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); any hazardous waste having the characteristics identified under or listed pursuant to section 3001 the Solid Waste Disposal Act (but not including any waste the regulation of which under the Solid Waste Disposal Act (42 U.S.C. § 6901 et seq.) has been suspended by act of Congress); any toxic pollutant listed under section 307(a) of the Clean Water Act; hazardous air pollutant listed under section 112 of Clean Air Act (42 U.S.C. § 7521 et seq.); and any imminently hazardous chemical substance or mix with respect to which the EPA Administrator has taken action pursuant to section 7 of the Toxic Substances Control Act (15 U.S.C. § 2601 et seq.).
Hazards, Natural	Events such as, but not limited to, earthquakes, tornadoes, floods, hurricanes, wildfires, landslides, or avalanches.
Hazards, Technological	Man-made incidents such as toxic chemical releases, nuclear power plant accidents, dam failures or bridge collapses.
Historic Property	Any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places, including artifacts, records, and remains which are related to such district, site, building, structure, or object [16 U.S.C. § 470(w) (5)].
Host Area	A specified area relatively unlikely to experience direct effects of a hazard or an area designated for evacuees following a major event.
- I -	
Incident Command System (ICS)	A standardized on scene emergency management construct specifically designed to provide for the adoption of an integrated organizational structure that reflects the complexity and demands of single or multiple incidents, without being hindered by jurisdictional boundaries. ICS is the combination of facilities, equipment, personnel, procedures, and communications operating with a common organizational structure, designed to aid in the management of resources during incidents. ICS is used for all kinds of emergencies and is applicable to small as well as large and complex incidents. ICS is used by various jurisdictions and functional agencies, both public and private, or organized field-level incident management operations.
In-Kind Donations	Donations other than cash (usually materials or professional services) for disaster survivors.

Incident	An occurrence or event, natural or human-caused that requires an emergency response to protect life or property. Incidents can, for example, include major disasters, emergencies, terrorist attacks, terrorist threats, wild land and urban fires, floods, hazardous materials spills, nuclear accidents, aircraft accidents, earthquakes, hurricanes, tornadoes, tropical storms, war-related disasters, public health and medical emergencies, and other occurrences requiring an emergency response.
Incident Action Plan (IAP)	Contains objectives reflecting the overall incident strategy(ies) for the next operational period, includes specific actions, assignments, and supporting information as appropriate.
Incident Command Post (ICP)	The field location for performance of the primary tactical-level, on-scene incident command functions.
Incident Commander	The person responsible for the management of all operations at the incident site.
Incident Management Team (IMT)	Task force of trained personnel to assist the Incident Commander and appropriate Command and General Staff personnel assigned to an incident.
Incident Mitigation	Actions taken during an incident designed to minimize impacts or contain the damages to property or the environment.
Incident of National Significance	Based on criteria established in HSPD-S (paragraph 4), an actual or potential high-impact event that requires a coordinated and effective response by and appropriate combination of Federal, State, local, tribal, nongovernmental, and/ or private sector entities in order to save lives and minimize damage, and provide the basis for long-term community recovery and mitigation activities.
Incident Period	For Emergencies or Major Disasters declared pursuant to PL 93–288, those days or parts thereof officially designated by the President or a representative as the dates upon which damages occurred.
Individual Assistance	Financial or other aid provided to private citizens to help alleviate hardship and suffering intended to facilitate resumption of a normal way of life following a disaster.
Individual Assistance Officer	State Human Services officer designated to coordinate individual assistance programs.
Infrastructure	The manmade physical systems, assets, projects, and structures, publicly and/or privately owned, that are used by or provide benefit to the public. Examples of infrastructure include utilities, bridges, levees, drinking water systems, electrical systems, communications systems, dams, sewage systems, and roads.
Initial Actions	The actions taken by those responders first to arrive at an incident site.
Initial Response	Resources initially committed to an incident.
Intermediate Recovery	Phase of recovery which involves returning individuals, families, critical infrastructure and essential government or commercial services to a functional, if not pre-disaster, state. Such activities are often characterized by temporary actions that provide a bridge to permanent measures.

Integrated Public Alert and Warning System (IPAWS)	A nationwide communication system to provide immediate warning and information to the general public through a variety of existing technologies.
- J -	
Joint Field Office (JFO)	A temporary Federal facility established locally to provide a central point for Federal, State, local, and tribal executives with responsibility for incident oversight, direction, and/or assistance to effectively coordinate protection, prevention, preparedness, response, and recovery actions. The JFO will combine the traditional functions of the JOC, the FEMA DFO, and the JIC within a single Federal facility.
Joint Information Center (JIC)	Integrates incident, information and public affairs into a cohesive organization designed to provide consistent, coordinated, timely information during a crisis or incident operations. The mission of the Joint Information System (JIS) is to provide a structure and system for developing and delivering coordinated interagency messages; developing, recommending, and executing public information plans and strategies on behalf of the IC advising the IC concerning public affairs issues that could affect a response effort; and controlling rumors and inaccurate information that could undermine public confidence in the emergency response effort.
Joint Operations Center (JOC)	The JOC is the focal point for all Federal investigative law enforcement activities during a terrorist or potential terrorist incident or any other significant criminal incident, and is managed by the SFLEO. The JOC becomes a component of the JFO when the NRF is activated.
Jurisdiction	A range or sphere of authority. Public agencies have jurisdiction at an incident related to their legal responsibilities and authorities. Jurisdictional authority at an incident can be political or geographical (e.g., city, county, tribal, State, or Federal boundary lines) or functional (e.g., law enforcement, public health).
- K - L -	
LEPC	Local Emergency Planning Committee: A committee established under the authority of the State Emergency Response Commission (SERC), as required by Title III, Emergency Planning and Community Right-to-know Act (EPCRA) of the Superfund Amendments and Reauthorization Act of 1986 (as amended) (SARA), to formulate a comprehensive emergency plan to deal with Hazardous Materials and public access to chemical inventory reports for its district. (See SARA)
Liaison Officer	A member of the Command Staff responsible for coordinating with representatives from cooperating and assisting agencies.
Local Emergency	The duly proclaimed existence of conditions of a disaster or of extreme peril to the safety or health of persons and property within local jurisdictional boundaries. The emergency may be declared by a mayor or his/her designee and would normally be issued concurrent with a county declaration by the Chief Elected Official and/or board of County Supervisors prior to requesting state and / or federal assistance.
Local Government	A county, municipality, city. town, township, local public authority, school

	<p>district, special district, intrastate district, council of governments (regardless of whether the council of governments is incorporated as a nonprofit corporation under State law), regional or interstate government entity, or agency or instrumentality of a local government; an Indian tribe or authorized tribal organization; or a rural community, unincorporated town or village, or other public entity. (As defined in section 2(10) of the Homeland Security Act of 2002, Public Law 107- 296, 116 Stat. 2135, et seq. (2002).)</p>
Long-Term Recovery	<p>Phase of recovery that may continue for months or years and addresses complete redevelopment and revitalization of the impacted area, rebuilding or relocating damaged or destroyed social, economic, natural and built environments and a move to self-sufficiency, sustainability and resilience.</p>
-M-	
Major Disaster	<p>As described by the Stafford Act, any natural catastrophe (including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought) or, regardless of cause, any fire, flood, or explosion, in any part of the United States, which in the determination of the President causes damage of sufficient severity and magnitude to warrant major disaster assistance under this act to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.</p>
Materiel Management	<p>Requisitioning and sourcing (requirements processing); acquisition, asset visibility (resource tracking), receipt, storage, and handling; security and accountability; inventory, deployment, issue, and distribution; and recovery, reuse, and disposition.</p>
Mitigation	<p>Activities designed to reduce or eliminate risks to persons or property or to lessen the actual or potential effects or consequences of an incident. Mitigation measures may be implemented prior to, during, or after an incident. Mitigation measures are often developed in accordance with lessons learned from prior incidents. Mitigation involves ongoing actions to reduce exposure to, probability of, or potential loss from hazards. Measures may include zoning and building codes, floodplain buyouts, and analysis of hazard-related data to determine where it is safe to build or locate temporary facilities. Mitigation can include efforts to educate governments, businesses, and the public on measures they can take to reduce loss and injury.</p>
Mobile Command Post	<p>A transportable command unit capable of exercising direction and control from a forward deployed location during an emergency. The emergency communications vehicle normally provides the necessary equipment to perform this role.</p>
Mobilization	<p>The process of deploying appropriate resources.</p>
Mobilization Center	<p>An off-site temporary facility at which response personnel and equipment are received from the Point of Arrival and are pre-positioned for deployment to an incident logistics base, to a local Staging Area, or directly to an incident site, as required. A mobilization center also provides</p>

	temporary support services, such as food and billeting, for response personnel prior to their assignment, release, or reassignment and serves as a place to out process following demobilization while awaiting transportation.
Monitoring	The procedure of locating and measuring radioactive or other hazardous material contamination by the use of survey instruments capable of detecting and measuring ionizing radiations or other hazardous materials.
Multiagency Coordination System (MACS)	The combination of personnel, facilities, equipment and procedures and communications integrated into a common system. When activated, MACS have the responsibility for coordination of assisting agency resources and support in a multi-agency or multi-jurisdictional environment. A MAC Group functions within the MACS. (as defined by National Wildlife Coordinating Group (NWCG) National Training Curriculum).
Multijurisdictional Incident	An incident requiring action from multiple agencies that each have jurisdiction to manage certain aspects of an incident coordinated under Unified Command.
Mutual Aid Agreement	Written agreement between agencies, organization, and/or jurisdictions that they will assist one another on request by furnishing personnel, equipment, and/or expertise in a specified manner.
- N -	
National Contingency Plan (NCP)	The federal government's blueprint for responding to both oil spills and hazardous substance releases and development of a national response capability and promote overall coordination among the hierarchy of responders and contingency plans.
National Disaster Medical System (NDMS)	A coordinated partnership between DHS, HHS, DOD, and the Department of Veterans Affairs established for the purpose of responding to the needs of victims of a public health emergency. NDMS provides medical response assets and the movement of patients to health care facilities where definitive medical care is received when required.
National Incident Management System (NIMS)	A system mandated by HSPD-5 that provides a consistent, nationwide approach for Federal, State, local, and tribal governments; the private sector; and NGOs to work effectively and efficiently together to prepare for, respond to, and recover from domestic incidents, regardless of cause, size, or complexity. To provide for interoperability and compatibility among Federal, State, local, and tribal capabilities, the NIMS includes a core set of concepts, principles, and terminology. HSPD-5 identifies these as the ICS; multiagency coordination systems; training; identification and management of resources (including systems for classifying types of resources); qualification and certification; and the collection, tracking, and reporting of incident information and incident resources.
National Response Center	A national communications center for activities related to oil and hazardous substance response actions. The National Response Center, located at DHS/USCG Headquarters in Washington, DC, receives and relays notices of oil and hazardous substances releases to the appropriate Federal OSC.
National Response System	Pursuant to the National Contingency Plan (NCP), the mechanism for coordinating response actions by all levels of government (40 CFR §

	300.21) for oil and hazardous substances spills and releases.
National Response Team (NRT)	The NRT, comprised of the 16 Federal agencies with major environmental and public health responsibilities, is the primary vehicle for coordinating Federal agency activities under the NCP. The NRT carries out national planning and response coordination and is the head of a highly organized Federal oil and hazardous substance emergency response network. EPA serves as the NRT Chair, and DHS/USCG serves as Vice Chair.
National Security and Emergency Preparedness (NS/EP)	Telecommunications. NS/EP telecommunications services are those used to maintain a state of readiness or to respond to and manage any event or crisis (local, national, or international) that causes or could cause injury or harm to the population or damage to or loss of property, or could degrade or threaten the NS/EP posture of the United States.
National Special Security Event (NSSE)	A designated event that, by virtue of its political, economic, social, or religious significance may be the target of terrorism or other criminal activity.
National Strike Force	The National Strike Force consists of three strike teams established by DHS/USCG on the Pacific, Atlantic, and Gulf coasts. The strike teams can provide advice and technical assistance for oil and hazardous substances removal, communications support, special equipment, and services.
National Warning System (NAWAS)	A nationwide, dedicated, voice warning network. Its primary purpose is to provide the American population with information of an impending attack upon the United States.
National Weather Service (NWS)	Under the National Oceanic and Atmospheric Administration (NOAA), of the Department of Commerce, the NWS is responsible for providing weather service to the nation. It is charged with responsibility for observing and reporting the weather and with issuing forecasts and warnings of weather and floods in the interest of national safety and economy.
Natural Resources	Natural resources include land, fish, wildlife, domesticated animals, plants, biota, air, water. Water means salt and fresh water, surface and ground water, including water used for drinking, irrigation, aquaculture, and recreational purposes, as well as in its capacity as fish and wildlife habitat, including coral reef ecosystems as defined in 16 U.S.C. 64501. Land means soil, surface and subsurface minerals, and other terrestrial features.
Nongovernmental Organization (NGO)	A nonprofit entity that is based on interests of its members, individuals, or institutions and that is not created by a government, but may work cooperatively with government. Such organizations serve a public purpose, not a private benefit. Examples of NGOs include the American Red Cross and faith-based charity organizations such as Salvation Army and others.
Nuclear Incident Response Team (NIRT)	Created by the Homeland Security Act to provide DHS with a nuclear/radiological response capability. When activated, the NIRT consists of specialized Federal response teams drawn from DOE and/or EPA. These teams may become DHS operational assets providing technical expertise and equipment when activated during a crisis or in

	response to a nuclear/ radiological incident as part of the DHS Federal response.
- O -	
On-Scene Coordinator (OSC)	See Federal On-Scene Coordinator.
Operating Conditions (OPCONS)	Increasing levels of preparedness (from 5 to 1) requiring performance of predetermined actions in response to a real or perceived threat.
- P -	
Preparedness	The range of deliberate, critical tasks and activities necessary to build, sustain, and improve the operational capability to prevent, protect against, respond to, and recover from domestic incidents. Preparedness is a continuous process involving efforts at all levels of government and between government and private-sector and nongovernmental organizations to identify threats, determine vulnerabilities, and identify required resources.
Prevention	Actions taken to avoid an incident or to intervene to stop an incident from occurring. Prevention involves actions taken to protect lives and property. It involves applying intelligence and other information to a range of activities that may include such countermeasures as deterrence operations; heightened inspections; improved surveillance and security operations; investigations to determine the full nature and source of the threat; public health and agricultural surveillance and testing processes; immunizations, isolation, or quarantine; and, as appropriate, specific law enforcement operations aimed at deterring, preempting, interdicting, or disrupting illegal activity and apprehending potential perpetrators and bringing them to justice.
Principal Federal Official (PFO)	The Federal official designated by the Secretary of Homeland Security to act as his/her representative locally to oversee, coordinate, and execute the Secretary's incident management responsibilities under HSPD-5 for Incidents of National Significance.
Private Sector	Organizations and entities that are not part of any governmental structure. Includes for-profit and not-for-profit organizations, formal and informal structures, commerce and industry, private emergency response organizations, and private voluntary organizations.
Public Assistance	Financial or other aid provided to political subdivisions and Indian tribes to facilitate restoration of public facilities to pre-disaster functions and capabilities.
Public Assistance Officer	State Infrastructure Officer designed to facilitate and manage restoration of public facilities to pre-disaster functions and capabilities.
Public Assistance Program	The program administered by FEMA that provides supplemental Federal disaster grant assistance for debris removal and disposal, emergency protective measures, and the repair, replacement, or restoration of disaster damaged, publicly owned facilities and the facilities of certain private

	nonprofit organizations.
Public Facility	Any flood control, navigation, irrigation reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, airport facility, non–federal aid street, road or highway, and any other public building, structure or system including those used exclusively for recreation purposes.
Public Health	Protection, safety, improvement, and interconnections of health and disease prevention among people, domestic animals and wildlife.
Public Information Officer (PIO)	An individual responsible for releasing accurate official information to the public through the news media.
Public Service Announcements (PSA)	Media announcements usually of ten, twenty, or thirty second duration providing timely information to the public. This is normally provided by the media as a public service.
Public Works	Work, construction, physical facilities, and services provided by governments for the benefit and use of the public.
– Q – R –	
Radiological Emergency Response Teams (RERTs)	Teams provided by EPA's Office of Radiation and Indoor Air to support and respond to incidents or sites containing radiological hazards. These teams provide expertise in radiation monitoring, radionuclide analyses, radiation health physics, and risk assessment. RERTs can provide both mobile and fixed laboratory support during a response.
Rapid Response Teams (RRT)	Teams comprised of trained individuals in specific fields (law enforcement, fire, public works, building officials, etc.). RRT's are organized from local governments when activated, operates under the local governmental entity as an operating unit of an Emergency Response Team.
Re–entry	Return to evacuated areas by resident populations which may be constrained by time or function based on the existing situation.
Recovery	The development, coordination, and execution of service and site restoration plans for impacted communities and the reconstitution of government operations and services through individual, private sector, nongovernmental, and public assistance programs that: identify needs and define resources; provide housing and promote restoration; address long term care and treatment of affected persons; implement additional measures for community restoration; incorporate mitigation measures and techniques, as feasible; evaluate the incident to identify lessons learned; and develop initiatives to mitigate the effects of future incidents.
Regional Response Teams (RRTs)	Regional counterparts to the National Response Team, the RRTs comprise regional representatives of the Federal agencies on the NRT and representatives of each State within the region. The RRTs serve as planning and preparedness bodies before a response, and provide coordination and advice to the Federal OSC during response actions.
Resources	Personnel and major items of equipment supplies, and facilities available or potentially available for assignment to incident operations and for which status is maintained. Resources are described by kind and type and may be

	used in operational support or supervisory capacities at an incident or at an EOC.
Response	Activities that address the short-term, direct effects of an incident. Response includes immediate actions to save lives, protect property, and meet basic human needs. Response also includes the execution of emergency operations plans and of incident mitigation activities designed to limit the loss of life, personal injury, property damage, and other unfavorable outcomes. As indicated by the situation, response activities include: applying intelligence and other information to lessen the effects or consequences of an incident; increased security operations; continuing investigations into the nature and source of the threat, ongoing public health and agricultural surveillance testing processes; immunizations, isolation, or quarantine; and specific law enforcement operation aimed at preempting, interdicting, or disrupting illegal activity, and apprehending actual perpetrators and bringing them to justice.
– S –	
Shelter	Pre-identified sites in existing structures or temporary facilities used to house personnel displaced as a result of an emergency evacuation or the effects of a natural or man-made disaster.
Shelter Management	The internal organization, administration and operation of a shelter facility by either pre-trained or emergent leadership.
Short-Term Recovery	Phase of recovery which addresses the health and safety needs beyond rescue, the assessment of the scope of damages and needs, the restoration of basic infrastructure and the mobilization of recovery organizations and resources including restarting and/or restoring essential services for recovery decision making.
Situation Assessment	The evaluation and interpretation of information gathered from a variety of sources (including weather information and forecasts, computerized models, GIS data mapping, remote sensing sources, ground surveys, etc.) that, when communicated to emergency managers and decision makers, can provide a basis for incident management decision-making.
Situation Report	Initial impact, damage assessment report.
Special Populations	People who cannot comfortably or safely access and use standard resources offered in disaster preparedness relief and recovery. They include, but are not limited to those who are physically or mentally disabled, blind, deaf, cognitively disabled, mobility limited, non-English speaking, geographically/culturally isolated, medically or chemically dependent, homeless, frail, elderly and children.
Stafford Act (“Robert T. Stafford Disaster Relief and Emergency Assistance Act” P.L. 93-288, as amended)	Provides authority for response assistance under the Federal Response Plan, and which empowers the President to direct any federal agency to utilize its authorities and resources in support of state and local assistance efforts.
Staging Area	Facility located in the disaster impact area at the local jurisdictional level where arriving personnel and resources are staged pending assignment to an

	operational site within the affected jurisdiction.
Standard Operating Procedure (SOP)	A ready and continuous reference to those roles, relationships and procedures within an organization which are used for the accomplishment of broad or specialized functions which augment the Comprehensive Emergency Management Plan; Set of instructions having the force of a directive, covering features of operations which lend themselves to a definite or standardized procedure without loss of effectiveness, and implemented without a specific direct order from higher authority.
State Coordinating Officer (SCO)	The person appointed by the Governor for the purpose of coordinating state and local disaster assistance efforts with those of the federal government.
State Emergency Plan	As used in Section 201(b) of PL 93–288; that state plan which is designed specifically for state–level response to emergencies or major disasters and which sets forth actions to be taken by the state and local governments including those for implementing federal disaster assistance. (Known as the Wisconsin Emergency Response Plan) Execution of the Wisconsin Emergency Response Plan is a prerequisite to the provision of federal assistance authorized by PL 93–288.
State Hazard Mitigation and Recovery Team (SHMART)	Representatives from key state agencies, local governments, and other public and private sector organizations that influence development and hazard management policies within the state.
State Hazard Mitigation Officer (SHMO)	State official responsible for coordinating the preparation and implementation of the State Hazard Mitigation Plan (pursuant to Section 409 of the Stafford Act) and implementation of the Hazard Mitigation Grant Program (pursuant to Section 404 of the Stafford Act).
State of Emergency	An emergency proclaimed as such by the Governor, JURISDICTIONAL Chief Elected Official, or other persons authorized pursuant to state law.
Strategic	Strategic elements of incident management are characterized by continuous, long term, high-level planning by organizations headed by elected or other senior officials. These elements involve the adoption of long-range goals and objectives, the setting of priorities, the establishment of budgets and other fiscal decisions, policy development, and the application of measures of performance or effectiveness.
Strategic Plan	A plan addressing long-term issues such as impact of weather forecasts, time-phased resource requirements, and problems such as permanent housing for displaced disaster victims, environmental pollution, and infrastructure restoration.
– T –	
Telecommunications	The transmission, emission, or reception of voice and/or data through any medium by wire, radio, other electrical, electromagnetic or optical means. Telecommunications includes all aspects of transmitting information.
Telecommunications Service Priority (TSP) Program	The <i>NS/EP</i> TSP Program is the regulatory, administrative, and operational program authorizing and providing for priority treatment (i.e., provisioning and restoration) of <i>NS/EP</i> telecommunications services. It establishes the

	framework for <i>NS/EP</i> telecommunications service vendors to provide, restore or otherwise act on it priority basis to ensure effective <i>NS/EP</i> telecommunications services.
Transportation Management	Transportation prioritizing, ordering, sourcing, and acquisition; time-phasing plans; fleet management; and movement coordination and tracking.
Tribe	Any Native Americans, band, nation, or other organized group or community, including any Alaskan Native Village as defined in or established pursuant to the Alaskan Native Claims Settlement Act (85 Stat. 688) [43 U.S.C.A. and 1601 et seq.], that is recognized as eligible for the special programs and services provided by the United States to Native Americans because of their status as Native Americans.
- U - V - W -	
Unaffiliated Volunteer	An individual not formally associated with a recognized voluntary disaster relief organization; also known as a "spontaneous" or "emergent" volunteer.
Unified Command	An application of ICS used when there is more than one agency with incident jurisdiction or when incidents cross political jurisdictions. Agencies work together through the designated members of the Unified Command to establish their designated Incident Commanders at a single ICP and to establish a common set of objectives and strategies and a single Incident Action Plan.
Uniform Disaster Situation Report (UDSR)	The damage assessment reporting form used in Wisconsin.
Unsolicited Goods	Donated items offered by and/or sent to the incident area by the public, the private sector, or other source, that have not been requested by government or nonprofit disaster relief coordinators.
Urban Search and Rescue (USAR)	The process of locating, extricating and providing immediate medical treatment of victims trapped in collapsed structures.
Vulnerability or Risk	The degree to which people, property, environment, and social and economic activity are susceptible to injury, damage, disruption, or death.
Warning	The alerting of public officials, emergency support services, and the general public to the threat of extraordinary danger and the related effects of both technological and natural disasters.
Watch	Usually issued by the National Weather Service when some type of weather hazard is possible in your area, i.e. flood, tornado, thunderstorm. Means "be on the lookout for —." A watch is upgraded to a "warning" when the hazard has been sighted or is indicated on weather radar.
Wireless Priority Service (WPS)	WPS allows authorized <i>NS/EP</i> personnel to gain priority access to the next available wireless radio channel to initiate calls during an emergency when carrier channels may be congested.
- X - Y - Z -	
Voluntary Organizations Active	A VOAD coordinates planning efforts by the many voluntary organizations responding to disaster.

in Disaster (VOAD)	
Volunteer	Any individual accepted to perform services by an agency that has authority to accept volunteer services when the individual performs services without promise, expectation, or receipt of compensation for services performed.
Volunteer and Donations Coordination Center	Facility from which the Volunteer and Donations Coordination Team operates. It is best situated in or close by the EOC for coordination purposes. Requirements may include space for a phone bank, meeting space, and space for a team of specialists to review and process offers.

I. MITIGATION.

GENERAL

Hazard mitigation planning is the process of developing a set of actions designed to reduce or eliminate risk to people and property from hazards and their effects. Mitigation efforts include activities that will prevent or reduce the impact of emergency/disaster results on people, property and environment. Efforts include building codes, land use planning, training and education, structural and non-structural safety measures.

Philosophically, there are three things we can do to mitigate. We can:

- a. Act on the hazard (the cause of the emergency).
- b. Act on the people (the population effected by the emergency).
- c. Act on the interaction between the hazard and the people.

Mitigation activities may be undertaken before a hazard event or afterwards. Pre-event mitigation activities are highly desirable, since the period immediately following a hazard event is often a difficult one in which to make mitigation decisions. If put in place soon enough, mitigation activities can reduce the damage caused by the next event. Also worth noting is mitigation can break the cycle of repeated destruction resulting from hazard events.

Federal policies require a formal mitigation program implementation plan any time an area is subject of a Presidential Disaster Declaration and receipt of federal disaster monies.

II. PREPAREDNESS.

GENERAL.

This Comprehensive Emergency Management Plan (CEMP) contains departmental emergency responsibilities and tasks that translate to actions found within the ESF schedule, and within each department's emergency plans and standing operational procedures. Municipal departments having emergency/disaster responsibilities must educate, train, and equip their personnel to insure that planned responsibilities become reality. Further, emergency preparedness education programs for the general public will reduce disaster demands. An informed general public will also be more self-reliant.

POLICIES.

Each department will budget for adequate training on such topics as necessary to ensure that they and their personnel are prepared to carry out their stated responsibilities and tasks.

The LCFR Emergency Manager formalizes and maintains the majority of applicable emergency plans and standard operating procedures. Additionally, municipalities' management maintains various supportive documents applicable to diverse departments for their utilization.

LCFR's Emergency Manager conducts training for all relevant departments and personnel which includes, but is not limited to: EOC operations, departmental and personnel preparedness.

Review of departmental plans and procedures are to be conducted annually. Departments who have

emergency support functions will provide LCFR's Emergency Manager with their operational procedures and applicable revisions.

Each department head is responsible for the preservation of vital records and documents deemed essential for continuing government functions and conducting post-disaster operations.

GENERAL PREPAREDNESS ACTIVITIES.

LCFR's Emergency Manager undertakes a constant year-round approach in preparation, response, recovery, and mitigation efforts.

On-going community emergency preparedness activities coordinated by the municipalities include:

- Encouraging critical facilities (hospitals, schools, nursing homes, utilities) to develop and maintain response and recovery plans.
- Response resource development (developing enhanced capability).
- Equipment, supply acquisition for emergency response to include terrorism response and prevention.
- Disaster drills and exercises.
- Warning system tests.
- Emergency communications system tests.
- Emergency public information system tests.
- Emergency power tests.
- Public information and education.
- Emergency Operations Center readiness.
- Development and maintenance of plans and procedures.

TRAINING.

It is the responsibility of LCFR's Emergency Manager to work with all department heads, elected officials, and municipalities to insure that all emergency response agencies and members of the Emergency Management organization receive sufficient training regarding the municipalities' and County's Comprehensive Emergency Management Plans (CEMP), and other specific disaster contingency plans to insure their proper response when required.

National Incident Management System (NIMS). LCFR's response to emergencies follows the concepts of NIMS and appropriate training is encouraged.

State and federal agencies offer a variety of training and education programs available to local government. Training opportunities are provided and coordinated by the Wisconsin Emergency Management and the Federal Emergency Management Agency (FEMA), and include:

Emergency management training and education programs for first responders, emergency workers, emergency managers, public/private/NGO officials, and others.

Preparedness information/programs for the general public.

LCFR's Emergency Manager will:

- Encourage departments to provide personnel training in specific emergency management skills and related professional development.
- Ensure training for Emergency Operations Center (EOC) staff.
- Encourage public education efforts for schools, community groups, businesses, County and municipal employees, and the general public.
- Prepare and coordinate drills and exercises.
- Promote and conduct Community Emergency Response Team (CERT) Training.

Village departments are expected to:

- Ensure that their employees are trained in the concepts of the Village's Comprehensive Emergency Management Plan (CEMP), and in their particular department/agency emergency plans and standing operational procedures.
- Encourage their employees to develop personal preparedness plans and supplies.
- Encourage department public education programs to include emergency preparedness and emergency management information.
- Participate in pre-evacuation activities, packing, etc.

Other on-going training programs include:

The Southeast Wisconsin Homeland Security Partnership and Southeast Wisconsin Citizens and Organizations Active in Disaster (COAD) in conjunction with Waukesha County Emergency Management promotes business and industry emergency preparedness and planning.

The Southeast Wisconsin Citizens and Organizations Active in Disaster (COAD), American Red Cross and American Heart Association provide public information on first aid, Cardio Pulmonary Resuscitation (CPR), emergency prevention, and disaster preparedness.

Wisconsin Emergency Management provides disaster preparedness and emergency management training.

EXERCISES.

LCFR's Emergency Manager will adhere to the Homeland Security Exercise and Evaluation Program (HSEEP) to plan, conduct and evaluate disaster exercises. HSEEP is both doctrine and policy for designing, developing, conducting and evaluating exercises. HSEEP is a threat- and performance-based exercise program that includes a cycle, mix, and range of exercise activities of varying degrees of complexity and interaction.

LCFR's Emergency Manager will coordinate involvement of the municipal staff in situational drills, tabletop or functional exercise to test the Comprehensive Emergency Management Plan (CEMP), and the municipalities' capability to respond to emergencies.

LCFR's Emergency Manager is also responsible to ensure that all County, State and Federally mandated exercises designed for the municipalities are carried out on schedule including the following:

The County is required to conduct one all-hazards full scale exercise and one functional exercise during each four-year period based on a hazard identified in Waukesha County's County-wide Hazard Mitigation Plan Hazard Analysis. In addition, at least two tabletop exercises are required each year of the four-year cycle. The State's Emergency Planning and Community Right to Know Act (EPCRA) grant program requires the County to conduct a full scale and functional exercise focused upon hazardous materials emergency response, which may be incorporated into the all-hazard exercises.

Other exercises will be coordinated by the Waukesha County Emergency Management as time, resources and conditions permit. LCFR may participate or host any of those exercises in coordination with the County or other agencies.

Annex III RESPONSE FUNCTIONS – EMERGENCY SUPPORT FUNCTIONS (ESFs)

ESF#1-#23 are from the Waukesha County CEMP. Rather than reconfiguring for LCFR's CEMP these will be used as necessary and as guidance for the LCFR CEMP. The majority of the County agencies referenced in the ESF's would be accessible to LCFR.

III. RESPONSE FUNCTIONS – EMERGENCY SUPPORT FUNCTIONS (ESFs)

A. PURPOSE.

1. The purpose of Emergency Support Function # 1 is to provide, in a coordinated manner, the resources (human, technical, equipment, facility, materials and supplies) of participating agencies to support emergency transportation needs and service restoration activities during emergency or disaster situations.
2. Enables agencies, and emergency support functions requiring use of the transportation systems to perform their missions following an emergency. In the context of this plan, transportation refers to the resources and assets necessary to move goods and people.

B. POLICIES.

1. All transportation resources will be utilized on a priority basis to protect lives, property and environment.
2. Transportation planning will be directed toward satisfying the needs of responding agencies requiring transportation routes to perform their assigned emergency missions.
3. Transportation planning will include the utilization of available primary and support agency capabilities.
4. In a major emergency, the relaxation of certain restrictions (waive weight, height, and load requirements for vehicles transporting critical items) is essential to allow rescue and relief equipment into affected areas.

PUBLIC WORKS; PUBLIC WORKS, MUNICIPAL; PIPELINE UTILITIES RESPONSIBILITIES/TASKS BY PHASE

Emergency Support Function (ESF) # 2

Communications & Information Technology

Preface

Voice and data communications infrastructure may be severely compromised during a catastrophic emergency. This infrastructure is vital for communications to/from emergency responders in the field, between incident sites and the Emergency Operations Center (EOC), and for the County government to maintain linkages to the general public, NGOs and other levels of government.

Emergency Support Function (ESF) # 2

Communications & Information Technology

A. PURPOSE.

1. Support public safety and the operation of government agencies by maintaining continuity of information and telecommunication infrastructure equipment and other technical resources. The emergency communications, notification and warning system is described in the Alert & Warning Emergency Support Function ESF # 22: Public Protection.

B. POLICIES.

1. Normal communications systems will be utilized as much as possible during an emergency. Some communications needs will be met by utilizing available mutual aid channels and back-up systems.
2. Priority will be given to restoration of communications systems in the event of an emergency.
3. In the event of an emergency, all departments will ensure the security of computer equipment and printers located in their areas.
4. Information Technology (IT) and other departments will have regularly scheduled computer back up programs in effect for critical computer applications and data.
5. IT will ensure that all network data is adequately backed up and secured in an offsite location.
6. Facilities will coordinate with Information Technology (IT) and other departments to ensure the necessary emergency power systems are in place to keep the voice and data communications infrastructure operating when there is a commercial power outage.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE	
WAUKESHA COUNTY EMERGENCY PREPAREDNESS – RADIO SERVICES & WCC; DOA – IT	
Pre-Emergency	Work with the County Emergency Management to: <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Identify information technology facilities and resources available for use. 3. Ensure that the EOC and backup is equipped with the appropriate voice and data equipment. 4. Identify communication facilities and resources available for use (800 Mhz., VHF Radios, Cell Phones, etc.). 5. Develop inventories of equipment. 6. Ensure redundant communications between Waukesha County EOC and other local, regional and state EOC’s. 7. Ensure that backup power generation is in place or planned for. 8. Maintain list of radio frequencies.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE	
WAUKESHA COUNTY EMERGENCY PREPAREDNESS – RADIO SERVICES & WCC; DOA – IT	
	<ol style="list-style-type: none"> 9. Develop frequency use procedures and protocols. 10. Develop a data recovery plan. 11. Assure incremental backups are performed everyday with full backups performed on weekends. 12. Copy mission critical databases to offsite location every evening. 13. Schedule tests, exercises. 14. When notified, make contact with Emergency Management staff and report to the EOC. 15. Develop network mutual aid agreements. 16. Develop a prioritized list of networks to be restored in the event of failure. 17. Develop emergency action checklists.
Emergency	<ol style="list-style-type: none"> 1. When notified report to Waukesha County EOC. 2. Respond to requests for local communications assistance, identify required support agencies, begin mobilization of resources and personnel, and prepare to activate. 3. Emergency Support Function (ESF) # 3

Public Works

A. PURPOSE.

1. To facilitate protection, repair and restoration of local government owned physical infrastructure for roads and storm–water management systems.

B. POLICIES.

1. The first priority of the Public Works Department will be to assist Public Safety personnel in life safety activities.
2. Provide public works services to lands and facilities under local jurisdiction. Emergency public works response to private property shall be done only when authorized, or when life or public health is threatened.
3. To clear transportation routes as per public safety priorities.
4. Municipalities coordinate Waste Management and Sewer System operations.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE	
PUBLIC WORKS	
Pre-Emergency	Work with the County Emergency Management to: <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Maintain inventories of resources and equipment. 3. Participate in tests, exercises. 4. Develop emergency action checklists. 5. Maintain pre–event contracts to support Public Works needs in an emergency. 6. Assist ESF # 23 with the development of a Debris Management Plan. 7. Maintain mutual aid agreements.
Emergency	<ol style="list-style-type: none"> 1. Pre–position resources and verify resource inventory in advance of an impending emergency. <ul style="list-style-type: none"> • Stage equipment resources to a safe location. 2. When notified of an emergency situation, send response teams/personnel, equipment, and vehicles to the emergency scene, staging area, or other location, as appropriate. 3. Assist Law Enforcement Agencies and fire services personnel in life safety activities to include: heavy rescue of people in collapsed buildings; clearing of roads and traffic control; construction of emergency access roads; communication support; use of vehicles for transportation, sheltering, and

Emergency Support Function (ESF) # 5

Information Analysis & Planning

Preface

During large scale emergencies and disasters the EOC (if activated) is the single point where all information is received and analyzed; where decisions are made, priorities established, and resources allocated. EOC information management consists of three interrelated functions:

- **The Information Collection function entails the gathering, consolidation, and retention of raw data and information from sources that include human sources, observation and technical sources;**
- **The Information Analysis and Planning function provides the ability to merge data and information for the purpose of analyzing, linking, and disseminating timely and actionable information with an emphasis on the larger public safety threat picture (situation reports) and needed future actions (incident action plans);**
- **The Information Sharing and Dissemination function is the multi-jurisdictional, multidisciplinary exchange and dissemination of information among local layers of government, the private sector and citizens.**

During the post incident response phase, ESF # 5 activities include those functions that are critical to support and facilitate multiagency planning and coordination for operations involving incidents requiring federal coordination to include: alert and notification; staffing and deployment of DHS and DHS/FEMA response teams, as well as response teams from other federal departments and agencies; incident action planning; coordination of operations; logistics management; direction and control; information collection, analysis, and management; facilitation of requests for federal assistance; resource acquisition and management; federal worker safety and health; facilities management; financial management; and other support as required. 

Emergency Support Function (ESF) # 5

Information Analysis & Planning**A. PURPOSE.**

1. To describe how the Emergency Manager will collect, analyze, and disseminate information about a potential or actual emergency or disaster to enhance response and recovery activities.
2. ESF # 5 delineates the EOC planning framework and process.

B. POLICIES.

1. ESF # 5 will be coordinated from the Emergency Operations Center (EOC) or alternate site if the EOC is non-operational.
2. The EOC will be managed by the Emergency Manager or designee.
3. Participating departments and agencies will participate and contribute to the incident action planning process coordinated by ESF # 5.
4. The EOC will assist in coordinating the activities of all departments and other organizations in support of the response and recovery from a major emergency in a timely manner.
5. The EOC will strive to maximize the use of the available resources.
6. All affected municipal departments and participating organizations and ESFs are to provide continuous information to the EOC Planning Section related to their department's current and planned response and recovery activities.
7. The Planning Section will produce periodic situation reports that will be distributed to EOC staff and Field incident commanders.
8. All affected municipal departments and participating organizations and ESFs are to be actively involved in the development and implementation of the EOC Incident Action Plan (a specific action plan for the EOC based on impacts of the emergency and resources available.)
9. All affected municipal departments and participating organizations and ESFs are to consider the goals, objectives, and tasks stated in the EOC Incident Action Plan as official priorities and policy for the period covered by the EOC Incident Action Plan.
10. All affected municipal departments and participating organizations and ESFs shall develop action plan components for implementing their assigned tasks within the EOC Incident Action Plan.

11. All departments will participate in the development of a municipal after action review of major event.
12. All departments and ESFs will continually report operational information updates to the EOC.
13. Information will be shared with response and relief organizations in the EOC.
14. Personal information regarding emergency victims will be kept confidential and will only be shared with the response and recovery organizations authorized to receive such information as permitted by law for the sole purpose of providing assistance.
15. Law enforcement sensitive information will be kept confidential by the EOC staff until such time as the Law Enforcement Agencies deems it appropriate for release to the public.
16. Organization:
 - The EOC is organized under the basic concepts of the National Incident Management System (NIMS) consisting of several functional areas: Policy Group, EOC Manager, Public Information, Liaison, Operations, Planning, Logistics, and Finance/ Administration.
17. Input from CEO's.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE	
INFORMATION TECHNOLOGY; EMERGENCY MANAGEMENT	
Pre-Emergency	Work with Emergency Management to: <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Prepare a standard template for the Declaration of Emergency with Chief Elected Official. 3. Prepare standardized reporting formats and forms, and establish reporting procedures. 4. Maintain EOC supplies, and data displays. 5. Participate in drills, exercises. 6. Develop emergency action checklists. 7. Develop procedures for After Action review, critique and debriefing. 8. Maintain situational awareness by monitoring activity in the Village and County as well as regionally. 9. Monitor severe weather systems for their potential impact on Waukesha County. 10. Advise Village staff of changes in National Terrorism Advisory System status and of any announcements of credible threats from the Joint Terrorism Task Force (JTTF), STAC, WISIC and other intelligence services. 11. Provide computer support. 12. Provide Telecommunications support.
Emergency	<ol style="list-style-type: none"> 1. Activate the EOC. 2. Request and receive situation reports from field responders.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

INFORMATION TECHNOLOGY; EMERGENCY MANAGEMENT

	<ol style="list-style-type: none"> 3. Develop reporting procedures and determine schedule with the field representatives. 4. Share the information received by posting status boards, making announcements, routing messages to other EOC staff, and preparing periodic situation reports (SITREPS).
<p>Emergency Operations Center (EOC)</p>	<ol style="list-style-type: none"> 1. Staff the Planning Section positions and Units (see EOC organization chart) to prepare the EOC Situation Report, Incident Action Plan, and make provisions for developing contingencies for extended operations and recovery. 2. Compile information from weather, media and other relevant sources. 3. As a part of the Situation Unit, deploy or coordinate damage assessment teams to compile damage assessment reports. 4. Ensure daily reconnaissance of all impacted areas. <ul style="list-style-type: none"> • Compile status report to assist ongoing incident action planning. 5. Plan for future emergency operational periods. Prepare the Incident Action Plan. Make appropriate recommendations. <ol style="list-style-type: none"> a. Collect, process and disseminate essential elements of information for use by response operations and provision of input for reports, briefings, displays and plans. b. Consolidate information into reports and other materials that describe and document overall response activities. c. Keep the Waukesha County EOC and other Emergency Support Functions apprised of overall operations. d. Maintain displays of pertinent information for use in briefings. e. Research technical information. f. Collect and manage information from all sources. g. Liaison with state and federal agencies as needed. h. Provide for a written incident action plan which identifies the objectives and tasks to be performed during the next operational period and the resource requirements to complete those tasks, as well as identifying future issues to be addressed (what’s to be done next, and what will it take to do it). IAP elements include: <ul style="list-style-type: none"> • Summary/Briefing Document. • Objectives: specific and measurable. • Organization: Village EOC staff, Incident Commanders, etc. • Tasks and Assignments: who’s doing what, where, resources required. • Supporting Materials (as requested): maps, traffic plan, security plan, medical plan, communications plan, etc., as well as weather data, special precautions, and safety messages. 6. Establish, maintain contact with State and Regional EOC’s through the EOC Manager. <ol style="list-style-type: none"> a. Provide situation status and damage information.

*Attachment 2***STANDARD OPERATING GUIDELINES FOR EOC INCIDENT ACTION PLANS****A. PURPOSE.**

1. The EOC Manager shall follow the policy direction received from the Information, Analysis & Planning Team in setting the objectives for the operating period.
2. The EOC Incident Action Plan sets forth objectives and tasks to be completed during the next operational period, the resources necessary to accomplish those tasks, and how they are organized.
3. Accurate and complete EOC Situation Reports (EOC SITREPs) are essential to the development of each operational period EOC Incident Action Plan. SITREPs are developed by the Planning Section from situational information received from each component of the EOC. The next operational period's objectives are derived from progress in achieving the previous operational period's EOC Incident Action Plan as reflected in the EOC SITREP, and from policy direction issued by the Information, Analysis & Planning Team.

B. EOC INCIDENT ACTION PLANNING PROCESS OVERVIEW.

1. The EOC General Staff, under direction of the EOC Manager and led by the EOC Planning Section Chief, will prepare a written EOC Incident Action Plan for the next operational period when emergencies last for more than one operational period.
2. The EOC incident action planning process is an essential tool for the Municipal EOC, particularly in managing sustained operations. If the emergency organization is to have a well planned and executed approach to resolving the problems posed by the emergency, the EOC organization must remain focused and unified in its efforts. The EOC incident action planning process is a key element to ensure that the entire EOC organization will be focused and acting as a unified coordinated body. If the organization is going to move forward in a unified manner, there must be a clear understanding of what goals are being pursued, what time frame is being used (the Operational Period) and how individual unit efforts are a part of the overall organizational efforts.
3. Once the EOC SITREP has been delivered, the EOC Manager finalizes the goals and strategic objectives for the next operational period. These strategic operational objectives must be verifiable and measurable.
4. Once the goals and strategic objectives are set, they should be communicated through the EOC Management and general staff to all EOC components so that they can be considered. Each EOC Section needs to address how it will accomplish the goals and strategic objectives by setting tactical objectives and tasks to resolve the problems identified in the EOC Situation Report. The various branches, and divisions/groups in the EOC Operations Section should each address this issue and develop a coordinated EOC Operations Section approach, including the resources needed and how they should be organized.
5. Next the EOC Logistics and Planning Sections determine how to support the EOC Operations Section's approach to meet the established strategic objectives and to anticipate equipment and supply procurement and personnel acquisition issues. If resources cannot be obtained, then EOC Operations may need to modify their approach based on the actual resources available.

6. The EOC Administration & Finance Section must determine how they will support the EOC Operations Section's efforts to meet the established strategic objectives and to establish specific cost tracking and contracting methods to procure needed resources in a timely manner.
7. The EOC Planning Section must also consider their ongoing efforts to continue to produce and post situation reports and information as well as continuing to support the EOC incident action planning process throughout future operational periods.
8. This will require continual briefing and rotation of staff in key EOC information gathering roles.

C. WRITTEN EOC INCIDENT ACTION PLANS.

1. Written EOC Incident Action Plans are a significant management tool and provide:
 - a. A clear statement of EOC goals and strategic objectives, and EOC operational tactical objectives and task assignments.
 - b. A basis for measuring EOC work effectiveness and cost effectiveness.
 - c. A basis for measuring EOC work progress and providing accountability.
 - d. Documentation of expected emergency or planned event flow.

D. OPERATIONAL PERIODS.

1. EOC operational periods can be of various lengths, but are usually no longer than 24 hours. A 12 hour operational period is common when needing to staff EOC operations 24 hours a day, using a two shift schedule. Operational Period length is determined based on a number of issues, including:
 - a. Length of time needed to achieve EOC tactical objectives.
 - b. Availability of fresh resources.
 - c. Future involvement of additional resources.
 - d. Environmental considerations. (e.g., available light or weather conditions).
 - e. Diminished mental and physical effectiveness of tired workers.
 - f. Safety considerations.

E. ESSENTIAL ELEMENTS IN THE WRITTEN EOC INCIDENT ACTION PLAN.

1. Statement of Objectives – This is a clear listing of what is expected to be achieved. Objectives must be attainable, measurable, and flexible.
2. Organization of resources – Describes what elements of the EOC organization will be active and in place for the next Operational period.
3. Tactics and Assignments – This describes the EOC tactics and operations employed to achieve the objectives. The EOC Operations Section will normally set the tactical methods for accomplishing the objectives and implement actions (e.g. how, when and where to open shelters). The EOC Planning, Logistics and the Finance/Administration Sections will accomplish resource ordering and acquisition of necessary personnel and materials to support the Operations Section activities.
4. Supporting Material – Examples include maps, weather information, special information, the EOC Communications Plan, EOC Medical Plan, and any other special data.

F. RESPONSIBILITIES FOR EOC INCIDENT ACTION PLANNING.

1. The EOC Planning Section Chief is responsible for developing the EOC Incident Action Plan in conjunction with other sections. The EOC Operations and Logistics Sections will provide a great deal of support in the construction of the EOC Incident Action Plan. The EOC Situation Unit will provide a situation report at the beginning of the planning meeting.

G. SEQUENCE OF ACTIVITIES IN THE ACTION PLANNING PROCESS.

1. The EOC PLANNING Section will present a formal current Situation Report. This report should include all key categories and other appropriate forms.
2. The EOC Manager will define the organizational priorities for the next operational period (short term) as well as for the intermediate goals. This should include no more than four or five broad goals and represents the strategic goals of the EOC organization. Goals should be measurable and verifiable. (Example: The Municipality has a water issue. The short term goal is providing bottled drinking water for those who need it, while the intermediate goal is restoration of water purification and delivery systems).
3. The EOC PLANNING Section posts the goals and strategic objectives as determined by the EOC Manager.
4. The EOC OPERATIONS Section will then address how it will tactically address the problems identified in the EOC Situation Report, based on the EOC organizational priorities. Each branch must develop tactical plans. The liaison agencies should address how they will support the overall goals of the EOC keeping in mind that they will also address within their own organizations the same process for their own organization goals.
5. The EOC LOGISTICS Section determines what is required for them to obtain the needed personnel, supplies and materials to support the OPERATIONS Section in their pursuit of the organizational goals, as well as what the specific needs are.
6. The EOC ADMINISTRATION/FINANCE Section determines what is required for them to pay for, document, and recover the funds for the needed personnel, supplies, and materials to support the EOC OPERATIONS Section in their pursuit of the organizational goals.
7. The EOC PLANNING Section continues to capture the information necessary to produce reliable and current situation status reports, project future needs and outcomes and to facilitate the EOC incident action planning process and planning meetings.

H. THE EOC PLANNING MEETING.

1. The EOC planning meeting is critical and there may be a tendency for these meetings to last longer than necessary unless they are kept on track and have good focus. The EOC Planning Section Chief will be responsible for running the EOC planning meeting. There are some important tenants for this meeting:

- All participants must come prepared.
- Strong leadership must be evident.
- Agency representatives must be able to commit resources for their agencies.
- Cell phones and pagers on vibrate only.

I. SEQUENCE AND SUMMARY OF ACTIVITIES BY SECTION.

1. EOC PLANNING	Present the Situation Report.
2. EOC COMMAND STAFF	Set goals and strategic objectives.
3. EOC SITUATION AND PLANNING UNIT	Post goals and strategic objectives for organizations use.
4. EOC SITUATION AND PLANNING UNIT	Determines tactics to achieve goals, resources needed and the organization of the resources.
5. EOC RESOURCE STATUS AND PROCUREMENT UNIT	Determines how it will obtain the needed resources.
6. EOC ADMIN / FINANCE	Determines how it will pay for and document the needed resources.
7. EOC SITUATION AND PLANNING UNIT	Prepares EOC Incident Action Plan (document); continues collecting, analyzing and displaying information and continues Action Planning process.

To assist in the completion of the EOC Incident Action Plan a standardized fill-in-the-blank document format is used. The EOC SITUATION AND PLANNING UNIT should distribute the appropriate fill-in-the-blank pages to the EOC Section Chiefs for completion.

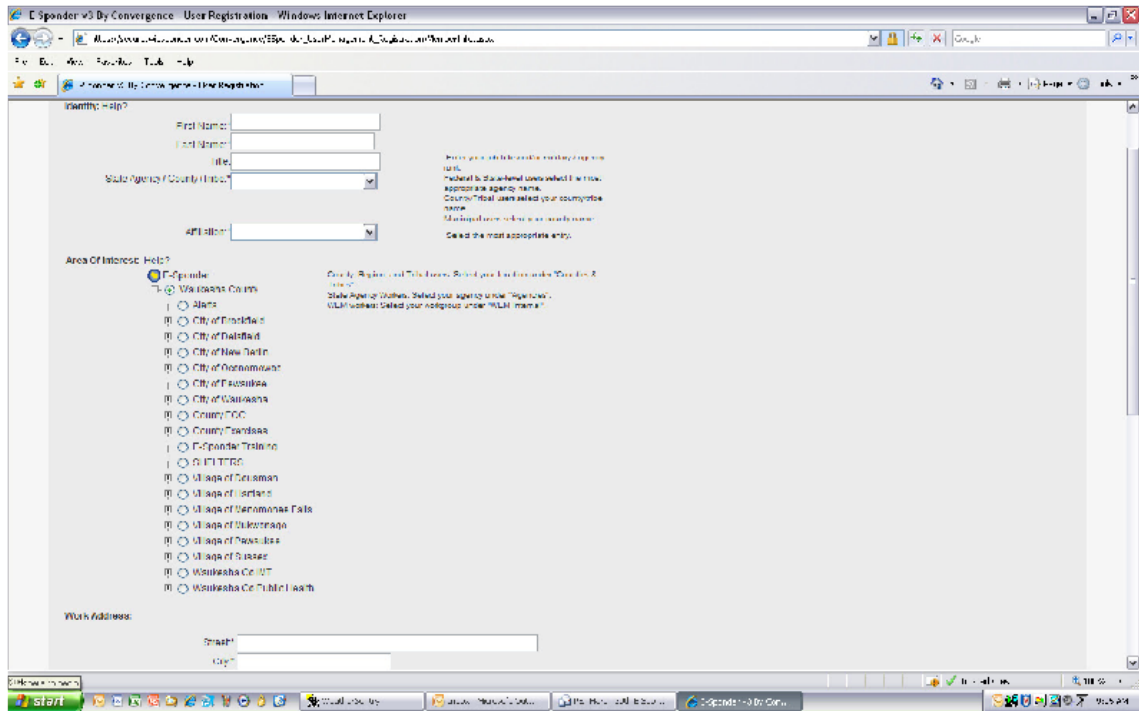

Note: Use Standard ICS Forms and supplement as needed.

ACCESSING E-SPONDER

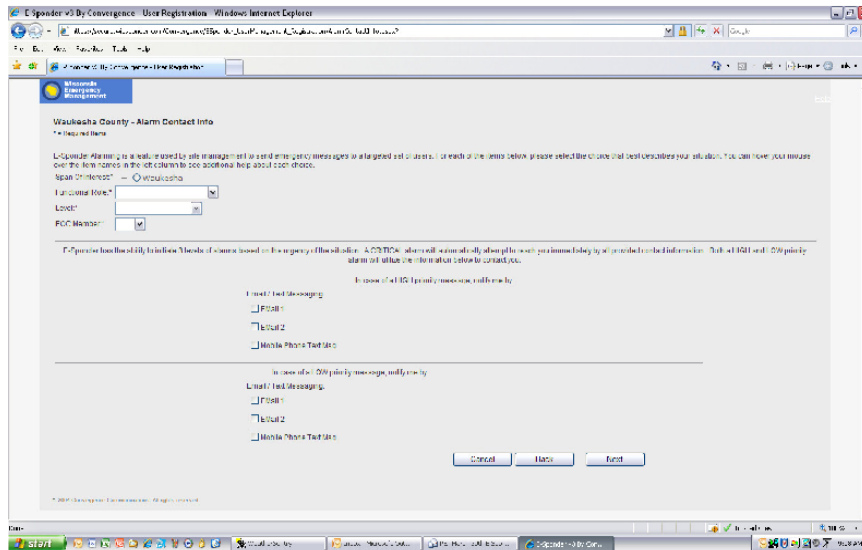

You must register with E-Sponder and request access. To do so, open your web-browser and go to: <http://waukesha.wiesponder.com>

This will open a window with two big blue buttons: Member and Non-Member (Apply for Access).

The first time, click on the Non-Member button. This will take you to a secure web-site where you input identification information as displayed below. Be sure to only check “Waukesha County” under the Area of Interest. You must finish the registration process in one session – see additional information below.

When you finish the first page, click NEXT to continue the registration process.

Clicking NEXT again, will take you to a summary page to verify the information is correctly entered. If all is correct, click SUBMIT.

NOTE: You should receive an email from E-Sponder acknowledging receipt of your request. If you do not get an email within a short time, your registration session most likely timed out and you will have to re-try. This most often occurs when someone is interrupted during the registration process and the connection drops out as a safe guard. Because the page is loaded on your computer, it may appear that the registration went through, however, if you don't receive the confirmation email then registration is lost somewhere in cyberspace. **Contact the Site Administrator before trying to re-enter your registration information.**

Once your registration is received by the system, it is forwarded to the site administrator for access approval and granting of permissions. When access is approved and level of access permissions granted, you will receive additional emails confirming your access. Once your access is approved, you may return to the above web-site and click the Member button. This will take you to the Waukesha County Home Page. You will also be able to move to the State's Home page by clicking in the upper left corner by the Wisconsin emblem.

If you forget your password, contact the Site Administrator. Site Administrators can reset the password, but cannot tell you what the password is or was. When you receive a reset password, you must enter the system within 24 hours and change the password to a permanent selection. The change password link is located on the State's Home page, in the upper left corner of the link bar.

Emergency Support Function (ESF) # 6

Mass Care, Emergency Assistance, Housing & Human Services

The damage created by emergencies often disrupts the ability for citizens to provide their own basic human needs such as food, water, sanitation and housing/sheltering. Government must be prepared to temporarily provide those services when they are needed.

Federal

Agencies

Primary Agency:

- Department of Homeland Security/Federal Emergency Management Agency

Supporting Agencies:

- Department of Agriculture
- Department of Defense
- Department of Health and Human Services
- Department of Homeland Security
- Department of Housing and Urban Development
- Department of the Interior
- Department of Justice
- Department of Labor
- Department of Transportation
- Department of the Treasury
- Department of Veterans Affairs
- General Services Administration
- Small Business Administration
- Social Security Administration
- U.S. Postal Service
- American Red Cross
- Corporation for National and Community Service
- National Voluntary Organizations Active in Disaster
- Other voluntary agency and nongovernmental support organizations

Likely Support Includes:

- Coordinate and lead federal resources, as required, to support local, tribal, and state governments and voluntary agencies (VOLAGs) in the performance of mass care, emergency assistance, housing, and human services missions.

Likely Support Includes:

- When directed by the President, ESF # 6 services and programs are implemented to assist individuals and households through four primary functions:
 - Mass Care: Includes sheltering, feeding operations, emergency first aid, bulk distribution of emergency items, and collecting and providing information on victims to family members.
 - Emergency Assistance: Assistance required by individuals, families, and their communities to ensure that immediate needs beyond the scope of the traditional “mass care” services provided at the local level are addressed. These services include: support to evacuations (including registration and tracking of evacuees); reunification of families; provision of aid and services to special needs populations; evacuation, sheltering, and other emergency services for household pets and services animals; support to specialized shelters; support to medical shelters; nonconventional shelter management; coordination of donated goods and services; and coordination of voluntary agency assistance.
 - Housing: Includes housing options such as rental assistance, repair, loan assistance, replacement, factory-built housing, semi-permanent and permanent construction, referrals, identification and provision of accessible housing, and access to other sources of housing assistance.
 - Human Services: Includes the implementation of disaster assistance programs to help disaster victims recover their non-housing losses, including programs to replace destroyed personal property, and help to obtain disaster loans, food stamps, crisis counseling, disaster unemployment, disaster legal services, support and services for special needs populations, and other Federal and State benefits.

A. PURPOSE.

1. The purpose of this Emergency Support Function is to describe a coordination framework and serve as a guide to provide sheltering, mass care, emergency assistance, housing, and human services following an emergency or disaster. Identify key participants and resources to meet access and functional needs populations in mass care and sheltering operations.

B. POLICIES.

1. The provision of Mass Care, Housing & Human Services as a consequence of disasters is a fundamental responsibility of Waukesha County government. The Waukesha County and DHHS will provide coordination management of all mass care, housing and human services operations in the County through the EOC to ensure the population is effectively served. The primary coordination department for this ESF is DHHS.
2. The County's responsibility for mass care operations is to support the American Red Cross (ARC) in opening and maintaining shelter operations and provide coordination oversight. However, if ARC is unable to open and staff a shelter, it then becomes local government's responsibility to provide care and shelter function.
3. All government/NGOs/private resources will be utilized as necessary to coordinate effective public/private partnerships during an emergency.
4. Waukesha County will coordinate mass care, housing and human services efforts with local, state, and other non-government organizations (NGOs) and other agencies.
5. County designated shelters may be managed by the local government, ARC, or a combination of both entities.
6. Mass care, housing and human services operations will begin as soon as possible following an emergency. Public and private facilities that will provide the best available protection for displaced people will be used as shelters and/or mass feeding facilities. The basic essential life support provided for the displaced population includes food, water, clothing, medical services, sanitation, lodging and communications. The Waukesha County EOC determines which shelters, (generally community centers and public school buildings) will be opened for shelter use.
7. Waukesha County will coordinate with state and federal agencies to facilitate the delivery of assistance programs to individuals, including the identification of appropriate site(s) for Disaster Assistance Center(s). (See Annex IV: Recovery and Recovery Mitigation Actions, in this CEMP, for information on Individual Disaster Assistance Programs.)
8. The care and transport of pets and other animal needs are managed in accordance with ESF # 18.
9. **NONDISCRIMINATION.** No services will be denied on the basis of race, color, national origin, religion, sex, age, or disability, and no special treatment will be extended to any person or group in an emergency over and above what normally would be expected in the way of government services. The County's activities pursuant to the Federal /State Agreement for major emergency recovery will be carried out in accordance with Title 44, Code of Federal Regulations (CFR), Section 205.16.— Nondiscrimination. Federal disaster assistance is conditional on full compliance with this rule.

10. It is the policy of Waukesha County to comply with the American Disabilities Act and its standards set forth in Title 41. CFR Section 101.19–6, to the extent permitted by fiscal constraints.
11. Waukesha County embraced the model of general shelters for all residents except incarcerated populations and those with extremely fragile medical conditions (i.e., separate shelters are not designated for those with access and functional needs).
12. Waukesha County or American Red Cross will secure cooperation of building owners for use of their property for shelter space.
13. Appropriate levels of health and emergency medical care services at shelters will be assessed at each shelter. Persons with access and functional needs or other special medical needs that exceed the capability of normal shelters will be sheltered in an appropriate medical facility.
14. Information about persons identified on shelter lists, casualty lists, hospital admission, etc, will be made available to family members to the extent allowable under confidentiality regulations.
15. Efforts will be made to coordinate among agencies providing information to minimize the number of inquiry points for families.
16. In the interest of public health and safety, Waukesha County will identify and attempt to meet the care and emergency needs of animals following emergencies.
17. Personnel designated as on–scene responders or representatives to the EOC should make prior arrangements to ensure that their families are provided for in the event of an emergency, so to ensure a prompt, worry–free response and subsequent duty.

DHHS RESPONSIBILITIES/TASKS BY PHASE	
Pre–Emergency	<p>Work with the Office of Emergency Management to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Analyze Mass Care, Housing & Human Services requirements. 3. Identify current Mass Care, Housing & Human Services inventories and resources. 4. Establish Mass Care, Housing & Human Services inventory, control, and delivery systems. 5. Develop agreements with Mass Care, Housing & Human Services providers as necessary. 6. Identify County assistance Mass Care, Housing & Human Services locations and resources needed. 7. Maintain inventories of resources and facilities. 8. Identify mass care facilities (temporary lodging and emergency feeding sites) and protective shelters 9. Obtain cooperation of facility owners for use as mass care facilities and protective shelters 10. Develop facility setup plans for potential shelters.

DHHS RESPONSIBILITIES/TASKS BY PHASE	
	<ol style="list-style-type: none"> 11. Identify emergency feeding supplies 12. Recruit and train volunteers for mass care operations. 13. Develop a liaison with other community service organizations for providing mass care to the public. 14. Identify population groups requiring special assistance during an emergency (i.e., senior citizens, functional needs, etc.) and ensure that preparations are made to provide assistance. 15. Implement a public education campaign regarding the importance of having a family disaster plan and 72-hour preparedness kit. 16. Develop and test emergency plans and procedures. 17. Participate in emergency management training and exercises. 18. Develop emergency action checklists.
Emergency	<ol style="list-style-type: none"> 1. When notified, report to the EOC. 2. Mass Care, Housing & Human Services emergency actions may include: <ol style="list-style-type: none"> a. Provide feeding for victims and emergency workers. b. Identify facilities that are appropriate for feeding facilities. c. Medical and nursing aid. d. Provide potable water. e. Provide temporary sanitation facilities. f. Identify distribution service centers. g. Distribute food, clothing, medicine, commodities. h. Operate Family Assistance Centers to provide information services. i. Assess social service needs of victims. j. Provide counseling services. k. Provide access and functional needs coordination services.
Emergency Operations Center (EOC)	<ol style="list-style-type: none"> 1. Staff ESF # 6 position in the EOC. 2. Verify current and needed resources. 3. resources as requested by field incident commanders.

Mass Feeding duties include:

1. Identifying incident sites requiring mass feeding services.
2. Determining present and future need for mass feeding resources:
 - a. Communications
 - b. Feeding facilities.
 - c. Feeding for victims and emergency workers.
 - d. Potable water.
 - e. Temporary sanitation facilities.
3. Obtaining and coordinating deployment of mass feeding resources for emergency responders as requested by field incident commanders.

Sheltering and temporary housing emergency actions include:

1. Determining requirement for shelters for emergency victims and temporary sheltering for emergency responders.
2. Establishing shelter sites and ensuring communications to each site.
3. Ensuring a registration system is activated at each site.
4. Establish alternative temporary housing facilities to provide short-term group housing until suitable transition housing can be arranged.
5. Providing heating and cooling centers.
6. Providing temporary shelter from hazards.
7. Providing temporary group housing.
8. Providing feeding for victims and emergency workers at shelters or at feeding facilities.
9. Identifying facilities that are appropriate for feeding facilities.
10. Providing first aid, medical and nursing aid at facilities as appropriate.
11. Providing potable water.
12. Providing temporary sanitation facilities.

Functional and Access Needs (FAN) emergency actions include:

1. Identifying locations of functional needs populations and individuals.
2. Identifying sources and costs for providing for the needs of functional needs populations and individuals.
3. Coordinating programs and resources for functional needs populations and individuals.
4. Making contact with FAN populations and individuals.
5. Identifying specific needs of FAN populations and individuals.

Family Assistance Centers/Disaster Welfare Inquiries (DWI) include:

1. Providing information services.
2. Assessing social service needs of victims.
3. Providing counseling services.
4. Coordinate with the American Red Cross Family Assistance/ Reunification Center System.

DHHS RESPONSIBILITIES/TASKS BY PHASE

	<p><u>Bulk Disaster Relief Commodity Distribution include:</u></p> <ol style="list-style-type: none"> 1. Determine the commodities (i.e. food, water, ice, clothing, fuel) needing distribution. 2. Determine the locations of those needing the commodities. 3. Determine locations for distribution facilities. 4. Determine resource needs for accomplishing the distribution (security, transport, storage, dispensing). 5. Schedule and inform target groups of the plans for commodity distribution. 6. Distributing food, water, ice, clothing, medicine and other commodities.
<p>Recovery Actions</p>	<ol style="list-style-type: none"> 1. Activate family reunification systems. 2. Continue to utilize multiple means of communicating public information and education. 3. Emergency Support Function (ESF) # 7

Resource Support

Preface

Emergencies have the potential to disrupt the availability of resources needed to effectively respond. Waukesha County may find it necessary to use its personnel and equipment in extraordinary ways, to call upon private citizens and organizations for assistance, and even to request help from neighboring jurisdictions and state and federal agencies to aid in the County's emergency operations.

Primary Agency

Emergency Management

Consists of: GSA providing: Emergency relief supplies.; Facility space; Office equipment; Office supplies; Telecommunications; Contracting services; Transportation services; Personnel required to support immediate response activities; Support for requirements not specifically identified in other ESFs, including excess and surplus property. • Coordinate logistics management and resource support with other federal agencies; state, tribal, and local governments; and the private sector for incidents requiring federal coordination.

Emergency Support Function (ESF) # 7

Resource Support**A. PURPOSE.**

1. Provide resources and logistical support for emergency response and recovery efforts.
2. Provide for the effective procurement, utilization, prioritization, and conservation of available local resources (equipment and supplies) during emergencies.
3. Provide for acquisition of resources from the state or federal government when local resources are depleted.

B. POLICIES.

1. Resources will be inventoried, prioritized or will be utilized in the most efficient manner possible, and will be applied to functions and areas of greatest need.
2. Additional resources will be requested from State Emergency Operations Center (EOC) after all available Waukesha County resources have been or will be utilized.
3. The Waukesha County EOC is responsible for securing resources in support of incident command and operations. Departments that obtain resources from the public or private sector by any other means may not be reimbursed for their expenses.
4. Waukesha County Executive and County Board of Supervisors may invoke temporary controls on local resources and establish priorities for use.
5. Each Waukesha County Department is responsible for arranging the movement of Department assets to points where they are needed during emergencies and disasters. If the department does not have suitable transportation capabilities, it may request assistance through the EOC.
6. Waukesha County Emergency Management is responsible for securing state and federal resources.
7. The County Purchasing Ordinance may be suspended by the Chief Elected Official during declared emergencies.
8. The Chief Executive, in extraordinary circumstances, may convene advisory groups of public and private sector representatives to coordinate and manage the emergency use of community resources.
9. The EOC will coordinate dissemination of information concerning any emergency measures, and voluntary controls or rationing.

10. Citizens are advised to prepare their own emergency supply kit to meet family needs so they are self-sufficient for a minimum of 72 hours.
11. Waukesha County will coordinate with the State EOC to establish an emergency distribution system if an emergency disrupts the normal distribution process.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE	
EMERGENCY MANAGEMENT	
Pre-Emergency	<ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Analyze resource requirements. 3. Identify and maintain current resource inventories. 4. Establish inventory, control, and delivery systems where applicable. 5. Develop a standardized form for use in emergency resource requests by agencies in the EOC during emergency operations. 6. Develop agreements with resource providers as necessary with assistance from Purchasing. 7. Identify potential staging area locations and requirements. 8. Identify and establish agreements with local and regional suppliers. 9. Identify and establish agreement storage facilities, both refrigerated and non-refrigerated for the warehousing of food, water and ice. 10. Develop emergency action checklists. 11. Maintain a list and train emergency procurement liaisons from each department. <ul style="list-style-type: none"> • Participate in drills, exercises.
Emergency	<ol style="list-style-type: none"> 1. When notified, report to the Waukesha County EOC. 2. Coordinate implementation of resource support activities with the appropriate tasked organizations. 3. Negotiate contracts for support of emergency actions as required. <ul style="list-style-type: none"> • Assure compliance with emergency procurement procedures and documentation. 4. Determine the needs in terms of number of people, their location and usable food preparation facilities for feeding. 5. Identify, locate and catalog available resources of food, transportation, equipment, storage and distribution facilities. 6. Ensure foods are safe for human consumption (Public Health). 7. Coordinate shipment of food to designated areas. 8. Establish logistical links with organizations involved in mass feeding.
Emergency Operations Center (EOC)	<ol style="list-style-type: none"> 1. Staff ESF # 7 position in the EOC 2. Coordinate with the EOC Management and General Staff to determine resource needs. Emergency Support Function (ESF) # 8

Public Health

Emergencies have the potential to create widespread public health problems while resources and facilities may be in short supply. Major health problems may emerge, such as infectious diseases, sanitation problems, environmental health, and contamination of food and water thereby protecting the public from negative public health impacts.

Agencies

Primary Agency:

- Department of Health and Human Services

Supporting Agencies:

- Department of Agriculture
- Department of Commerce
- Department of Defense
- Department of Energy
- Department of Homeland Security
- Department of the Interior
- Department of Justice
- Department of Labor
- Department of State
- Department of Transportation
- Department of Veterans Affairs
- Environmental Protection Agency
- General Services Administration
- U.S. Agency for International Development
- U.S. Postal Service
- American Red Cross

Likely Support Includes:

- Provide supplemental assistance to state, tribal, and local governments in the following core functional areas:
 - Assessment of public health/medical needs
 - Health surveillance
 - Medical care personnel
 - Health/medical/veterinary equipment and supplies
 - Patient evacuation
 - Patient care
 - Safety and security of drugs, biologics, and medical devices
 - Blood and blood products
 - Food safety and security
 - Agriculture safety and security
 - All-hazard public health and medical consultation, technical assistance, and support
 - Behavioral health care
 - Public health and medical information
 - Vector control
 - Potable water/wastewater and solid waste disposal
 - Mass fatality management, victim identification, and decontaminating remains
 - Veterinary medical support

A. PURPOSE.

1. Coordinate comprehensive public health services during an emergency, excluding mental health services (ESF # 6), hospital and medical services (ESF # 16) and fatality management (ESF # 20).
2. Provide measures and resources for communicable disease prevention and control (disease surveillance, investigation, containment and communication), including environmental health to first responders and the impacted community.

B. POLICIES.

1. Continuation of public health functions and control of environmental factors related to public health is essential following an emergency to prevent the outbreak of disease and to monitor the spread of vectors associated with the emergency and its aftermath.
2. Expedient health services are coordinated by public health and provided by private health care facilities and EMS.
3. It is desired to provide the highest quality of care possible. In all likelihood, emergency measures to protect life and health during emergencies will be exclusively dependent upon those resources available at the local level during the first critical hours post event. Austere conditions may limit the amount and quality of care it is possible to deliver.
4. Emergency public health services are the responsibility of local public health agencies and this ESF does not supplant the local public health system operations.
5. During a state of emergency local health departments may use the State of Wisconsin Department of Health Services (DHS) as a resource.
6. If the Governor declares a state of emergency related to public health and designates DHS as the lead state agency, local health departments may transfer the public health authority to DHS.
7. Local public health agencies are responsible for coordinating their response to a public health emergency with local and state-level partners.

WAUKESHA COUNTY PUBLIC HEALTH; LOCAL PUBLIC HEALTH AGENCIES RESPONSIBILITIES/TASKS BY PHASE	
Pre-Emergency	Work with the Office of Emergency Management to: <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Federal

Agencies

Primary Agencies:

- Department of Homeland Security/Federal Emergency Management Agency
- Department of Homeland Security/U.S. Coast Guard
- Department of the Interior/National Park Service
- Department of Defense/U.S. Air Force

Supporting Agencies:

- Department of Agriculture
- Department of Commerce
- Department of Defense
- Department of Health and Human Services
- Department of Homeland Security
- Department of Justice
- Department of Labor
- National Aeronautics and Space Administration
- U.S. Agency for International Development

Likely Support Includes:

- Structural Collapse (Urban) Search and Rescue (US&R): Deployment of DHS/FEMA US&R task forces, specialized expertise and equipment, Incident Support Teams (ISTs), and technical specialists.

Likely Support Continued:

- Waterborne Search and Rescue: SAR operations for hurricane, dam/levee failure, and other disasters that primarily require DHS/USCG air, ship, and boat force operations; response to maritime distress situations.
- Inland/Wilderness Search and Rescue: Support for SAR operations conducted in backcountry, remote, or undeveloped or rural or roadless areas that primarily require operations necessitating the use of specialized equipment to access these areas and may require responders traveling over land by alternate methods or by aircraft.
- Aeronautical Search and Rescue: Coordination and support of SAR operations conducted in aviation-related incidents and aeronautical search and rescue.
- SAR services include the performance of distress monitoring, communications, location of distressed personnel, coordination, and execution of rescue operations including extrication or evacuation along with the provisioning of medical assistance and civilian services through the use of public and private resources to assist persons and property in potential or actual distress.

A. PURPOSE.

1. The purpose of this support function is to provide a coordinated process of locating, extricating, and providing initial medical treatment to victims trapped, threatened or stranded in harm's way by any emergency or hazardous event when they cannot remove themselves.

B. POLICIES.

1. Search and rescue operations will be a team effort of Fire, Rescue Services, Police, Public Works, trained volunteer organizations, and the private sector.
2. The Law Enforcement Agencies shall coordinate and establish resources that are qualified in emergency response as a member of the local search and rescue organization. Personnel shall be assigned team positions and offered training to meet specific position requirements.
3. If activated, regional, state and national USAR Teams are under the direction and control of local incident commanders. The USAR Leaders are responsible for planning, coordinating and managing a USAR response when requested and authorized to mobilize.

FIRE DEPARTMENTS; LAW ENFORCEMENT AGENCIES; SHERIFFS DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

*Attachment 1***NATIONAL URBAN SEARCH AND RESCUE (USAR) RESPONSE SYSTEM**

The National Urban Search & Rescue (USAR) Response System is a framework for organizing federal, state and local partner emergency response teams as integrated federal search and rescue task forces. The 28 National USAR Task Forces, complete with the necessary tools, equipment, skills and techniques, can be deployed by FEMA to assist state and local governments in rescuing victims of structural collapse incidents or to assist in other search and rescue missions.

The 28 task forces are located throughout the continental United States. Any task force can be activated and deployed by FEMA to a disaster area to provide assistance in structural collapse rescue, or, they may be repositioned when a major disaster threatens a community. Each task force must have all its personnel and equipment at the embarkation point within six hours of activation so that it can be dispatched and enroute to its destination.

A FEMA Type I Task Force is made up of 70 multi-faceted, cross-trained personnel who serve in six major functional areas, including search, rescue, medical, hazardous materials, logistics and planning. These elements are supported by canines that are trained and able to conduct physical search and heavy rescue operations in damaged or collapsed reinforced concrete buildings. Each task force can be divided into two 35-member, Type III, Light Task Force. What the task force can do:

- Conduct physical search and rescue in collapsed buildings.
- Emergency medical care to trapped victims.
- Search-and-rescue dogs.
- Assessment and control of gas, electric service and hazardous materials.
- Evaluation and stabilization of damaged structures.

US&R Response System Task Forces

Emergency Support Function (ESF) # 10

Hazardous Materials

Preface

Emergencies can cause the release of hazardous materials into the environment. The County's response to these situations requires use of highly technical methods and equipment and specially trained responders.

Emergency Support Function (ESF) # 10

Hazardous Materials

A. PURPOSE.

1. Coordinate response to an actual or potential discharge or release of hazardous materials.

B. POLICIES.

1. For the purpose of this plan, a hazardous material is defined as “Any substance or material, including radioactive materials, which, when uncontrolled, can be harmful to people, animals, property or the environment.
2. Waukesha County and municipal agencies will exercise broad lawful authority, within existing capabilities, to protect life, property and the environment threatened by hazardous materials incidents, to include ordering evacuations, in-place sheltering, and necessary actions to contain the spill or release.
3. The municipal fire departments will retain the role of Incident Commander (IC) until the immediate threat to public safety is abated. Thereupon, the on-scene IC will normally be turned over to the responsible party (spiller) who has primary responsibility for cleanup of the spill/release (under the direction of the Wisconsin Department of Natural Resources).

Includes implementing an integrated federal, state, tribal, and local response to an outbreak of a highly contagious or economically devastating animal/zoonotic disease, or an outbreak of a harmful or economically significant plant pest or disease.• Ensure the safety and security of the commercial food supply to include: food safety inspections to ensure the safety of food products; inspection of slaughter and processing plants; products in distribution and retail sites, and import facilities at ports of entry; laboratory analysis of food samples; control of products suspected to be adulterated; plant closures; food borne disease surveillance; and field investigations.• Protect Natural & Cultural Resources and Historic Properties (NCH) resources. Includes appropriate response actions to preserve, conserve, rehabilitate, recover, and restore NCH resources.• Supports federal ESF #6, ESF #8; ESF #9 ESF #14 to provide for the safety and well-being of household pets.

A. PURPOSE.

1. To coordinate and support local efforts to respond effectively to an incident involving agriculture, food, natural or cultural resources and provide a process to integrate State and federal ESF # 11 response/recovery actions.

B. POLICIES.

1. Waukesha County ESF # 11 coordinates the response and recovery activities of Waukesha County with local, state, federal and private agencies during an incident that involves agricultural and/or natural or cultural resources.

State Agency Policies As Related To ESF # 11:

2. The Department of Agriculture, Trade and Consumer Protection has broad authority to investigate and control animal diseases, investigate and eradicate plant infestations, and exotic pest species, and to ensure the safety of our food supplies through inspections and other activities. These authorities are found in chapters 93, 94, 95, and 97, WI Stats. Among other things, the department may test animals, regulate imports and movement of animals and plants and impose quarantines on diseased plants and animals. Detailed authorities are listed in Appendix 1.
3. The Wisconsin Department of Natural Resources has authority for natural resources, wildlife that may be affected by a foreign animal disease, and environmental regulations for activities conducted as part of ESF 11, including carcass management and incineration. The authorities are found in Chapters 1, 23, 29, 95, 254, 283, 285, 289 and 291 of the Wisconsin Statutes.
4. The Wisconsin Historical Society duties and responsibilities include serving as the principal historic preservation agency of the state, identification of historic and archeological sites, review of federal and state funded, licensed, and permitted activities that affect cultural and historic properties. Their general responsibilities related to cultural and historic resources are listed in s.44.34, Wis. Stats. 44.34. Cooperation with other state agencies is found in s. 44.39 and 44.40, Wis Stats. Protection of human burials from disturbance is found in s. 157.70, Wis. Stats.
5. The Department of Public Instruction (DPI) duties and responsibilities include: maintaining liaison with the American Red Cross to coordinate resources in a presidentially declared disaster to provide relief through release of USDA commodities for congregate feeding. DPI may determine that a situation warrants the use of USDA commodities for congregate or household distribution, without a presidential declaration. The DPI may coordinate with the Red Cross to the extent funds are available for replacement of the commodities. The general powers and duties of the Wisconsin Department of Health and Family Services are listed in Wisconsin State Statute 250.04. The department may require isolation of patients, quarantine of contacts, concurrent and terminal disinfection or modified forms of these procedures as provided by Wisconsin State Statute 252.06. Additional authority to protect public safety in the case of communicable disease can be found in Wisconsin State Statutes 252.18, 252.19 and 252.21.

PLU AND EH RESPONSIBILITIES/TASKS BY PHASE

<p>Pre-Emergency</p>	<p>Work with the Office of Emergency Management to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Develop and conduct training and exercise programs involving ESF 11 functions. 4. Develop and maintain a contact list of agencies and organizations involved with ESF # 11 operations, including staff and support rosters. 5. Develop and maintain ESF # 11 resource lists, including a contact notification list with essential information included, such as resources location address, telephone, cellular and facsimile numbers, and email addresses. 6. Ensure that copies of all necessary ESF # 11-specific emergency manuals, plans and procedures, and other reference materials are located in the County Emergency Operations Center. 7. Develop and maintain a database of trained professionals and volunteers throughout the county who can be called on to help with emergencies involving food, agriculture, natural and cultural resources. These staff members and external resources may be contacted and notified by the appropriate lead for the incident. 8. Assist municipalities in the preparation and development of food and agriculture response plans, as well as plans for natural and cultural resources, as deemed necessary. 9. Plan, conduct and evaluate public education programs for prevention, preparedness, response and recovery. 10. Assist in the maintenance and expansion of programs such as the Wisconsin Veterinary Corps at the county/local level to prepare volunteers for terrorism incident support for food and agriculture incidents. 11. Support coordination and cooperation between governmental, private sector and non-governmental agencies to facilitate response efforts.
<p>Emergency</p>	<ol style="list-style-type: none"> 1. When notified, report to the EOC.
<p>Emergency Operations Center (EOC)</p>	<ol style="list-style-type: none"> 1. Staff ESF # 11 position in the EOC. 2. County ESF # 11 staff will support response activities for the control and eradication of a foreign animal disease in Waukesha County and the State of Wisconsin through coordination with DATCP and the USDA – Animal and Plant Health Inspection Service – Veterinary Services (APHIS – VS), and the Department of Natural Resources (DNR). 3. Provide technical advice to the County EOC on matters related to the containment and eradication of any foreign animal disease. Provide support and technical assistance and coordination assistance to county and local emergency managers, tribal managers.

PLU AND EH RESPONSIBILITIES/TASKS BY PHASE

	<ol style="list-style-type: none"> 4. Maintain liaison with local, county and tribal government and NGOs service agencies. 5. Work with Public Health Division to issue advisories and protective action recommendations to the public as necessary. Provide accurate, consistent and timely information to the public. 6. Maintain records of cost and expenditures to accomplish this ESF and forward them to the EOC Finance/ Administration Section Chief.
Recovery Actions	<ol style="list-style-type: none"> 1. Continue coordination/monitoring of the management of plant and animal disease and pest infestations, food safety, and NCH resources. 2. Continue to maintain liaison with local, county and tribal government to manage volunteer service response activities. 3. Continue to coordinate services to farmers affected by an incident through the Farm Center Helpline and Farm Center staff.

SUPPORT DEPARTMENTS	RESPONSIBILITIES/TASKS
State EOC	See Box On Tab Page This Section.
American Red Cross	<ol style="list-style-type: none"> 1. Coordinate sheltering operations with feeding operations at specified sites. 2. Identify and assess the requirements for food and distribution services on a two–phase basis: critical emergency needs immediately after the disaster, and longer–term sustained needs after the emergency is over. 3. Coordinate the food distribution efforts of other NGOs.
Clerk/Treasurer (EOC Finance/ Administration) Section)	<ol style="list-style-type: none"> 1. Coordinate the documentation of all disaster related expenses such as personnel time, overtime, equipment usage, in–kind or stocked materials, etc. and follow accepted accounting procedures.
COAD	<ol style="list-style-type: none"> 1. Coordinate with State Medical Reserve Corps veterinary resources and Wisconsin Animal Response Corps.
County Chief Elected Officials	<ol style="list-style-type: none"> 1. 4. Law Enforcement Agencies
5. Natural Gas Utility (ies)
6. Parks and Land Use
7. Private Sector Fuel Suppliers
8. Public Health
9. Purchasing
10. Telecommunications
11. Water & Wastewater Utilities

Federal

Agencies

Primary Agency:

- Department of Energy

Supporting Agencies:

- Department of Agriculture
- Department of Commerce
- Department of Defense
- Department of Homeland Security
- Department of the Interior
- Department of Labor
- Department of State
- Department of Transportation
- Environmental Protection Agency
- Nuclear Regulatory Commission
- Tennessee Valley Authority

Likely Support Includes:

- Collect, evaluate, and share information on energy system damage and estimations on the impact of energy system outages within affected areas.
- Provide information concerning the energy restoration process such as projected schedules, percent completion of restoration, and geographic information on the restoration.
- Facilitate the restoration of energy systems through legal authorities and waivers.
- Provide technical expertise to the utilities, conducts field assessments, and assists government and private-sector stakeholders to overcome challenges in restoring the energy system.

A. PURPOSE.

1. Respond to and recover from shortages and disruptions in the supply and delivery of electricity, telecommunications, wastewater and County public utilities, and other forms of energy and fuels.

B. POLICIES.

1. The County Executive and Board of Supervisors may establish energy allocation, use and restoration priorities.
2. The County Executive and Board of Supervisors may establish and order energy conservation measures.

PUBLIC WORKS – ENGINEERING RESPONSIBILITIES/TASKS BY PHASE	
Pre–Emergency	<p>Work with the Office of Emergency Management to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Identify local energy systems and providers. 3. Establish, maintain resource inventories. 4. Develop database of existing critical facility generators, noting type of fuel, quantity on hand, and generator load. 5. Develop database of reserve generators and develop procedures for acquiring and deploying same with personnel to critical facilities during power failures. 6. Develop procedures for assessing damages to local utility distribution systems. 7. Encourage mitigation practices at utility distribution facilities to reduce the potential effects of hazards on the utility’s ability to deliver energy to local users. 8. Participate in drills, exercises. 9. Develop emergency action checklists. 10. Monitor public utility related issues to prevent a surprise public utility shortage. 11. Develop an operations plan for responding to public utilities shortages.
Emergency	<ol style="list-style-type: none"> 1. When notified, report to the Waukesha County EOC. 2. Coordinate energy utility activities with appropriate tasked organizations.
Emergency Operations Center (EOC)	<ol style="list-style-type: none"> 1. Staff ESF # 12 position in the EOC. 2. Determine condition, status of County energy and utility systems. <ol style="list-style-type: none"> a. Initiate damage assessment/recovery activities for local power, gas, water/ wastewater distribution systems. b. Determine possible affected areas, structures and resources needed for energy restoration. 3. Establish contact and coordinate with WE Energies and/or appropriate utility entity(ies).

PUBLIC WORKS – ENGINEERING RESPONSIBILITIES/TASKS BY PHASE

- Request that WE Energies and/or appropriate utility entity(ies) send a representative to Waukesha County EOC or provide liaison contact information.
4. Coordinate with support departments/agencies, to establish priorities and develop strategies for the initial response and restoration of utilities.
 5. Coordinate the provision of energy materials, supplies, and personnel for the support of emergency activities being conducted by the Waukesha County EOC.
 6. Communicate with and monitor County and utility response actions.
 7. Maintain communication with utility representatives to determine emergency response and recovery needs.
 - Contact electric, gas, telephone, and water utilities serving the emergency area to obtain information about damage and/or assistance needed in their areas of operation.
 8. Determine region’s generating capacity, expected peak loads; expected duration of emergency event, explanation of utilities’ actions; and recommendations of local agency actions in support of the utilities.
 9. Provide assistance to local providers in locating and acquiring equipment necessary to restore local electrical and gas capabilities, and to restore the water/wastewater systems.
 - a. Coordinate County government equipment and personnel as required to aid in this restoration.
 - b. Procure needed resources to repair damaged energy systems. Such resources could include transportation to speed system repair as well as logistical support for utility field operations
 - c. Work with local and state emergency organizations to establish priorities to repair damage to such systems.
 10. Monitor the procedures followed by individual utilities during energy generating capacity shortages to ensure County–wide action and communication.
 11. Determine present and future need for energy and utility resources.
 - a. Coordinate with ESF # 6 Mass Care to identify emergency shelter power generation status/needs.
 - b. Coordinate with support agencies and other ESF’s with assistance in providing resources for emergency power generation.
 12. Receive and assess requests for aid from county, state and federal agencies, energy offices, energy suppliers, and distributors.
 13. Obtain, coordinate energy and utilities resources as requested by field incident commanders.
 14. Sources for resources can include:
 - a. State and federal agencies.
 - b. Private industry.
 15. Establish, maintain contact with WEM Duty Officer.
 - Coordinate delivery of energy and utilities resources to affected areas.

PUBLIC WORKS – ENGINEERING RESPONSIBILITIES/TASKS BY PHASE	
	<ol style="list-style-type: none"> 16. Update the PIO with accurate assessments of energy supply, demand and requirements to repair or restore energy systems. <ul style="list-style-type: none"> • Inform PIO about generating capacity shortfalls. 17. Emergency Support Function (ESF) # 14

Long Term Community Recovery

Preface

Recovery is both a short-term activity taken to return vital life support systems to minimum operating standards and a long-term activity designed to return people and areas affected by a disaster to pre-disaster or better conditions with mitigation projects. Recovery activities generally incorporate programs designed for implementation beyond the initial crisis period of an emergency or disaster, but may also be response oriented in nature. Examples of recovery activities provided by state and federal assistance include crisis counseling, damage assessment, debris clearance, decontamination, disaster insurance payments, disaster loans and grants, disaster unemployment assistance, public information, community outreach, temporary housing and reconstruction.

Emergency Support Function (ESF) # 14

Long Term Community Recovery

A. PURPOSE.

1. To support county, local, tribal, nongovernmental organizations (NGOs), the private sector and volunteer efforts to enable community recovery from the long-term consequences of an emergency or disaster. This support consists of available programs and resources to reduce or eliminate risk from future incidents, where possible.

B. POLICIES.

1. ESF # 14 policy and concept of operations applies to county agencies/organizations, tribal, local agencies, nongovernmental and NGOs for activities relating to potential or actual emergencies and disasters. It may include participation from private businesses.
2. Parks and Land Use – Planning and Zoning Division is the primary coordinating agency for ESF # 14 and has the authority to plan for and respond to disasters under Emergency Management in Chapter 323 of the Wisconsin Statutes. Additional authorization is contained in the Federal Disaster Relief and Emergency Assistance Act (Stafford Act–Public Law 93–288, the Disaster Relief Act of 1974, as amended by PL 100–707, the Robert T. Stafford Disaster Relief and Emergency Assistance Act) and applicable Waukesha County Ordinances. Southeast Wisconsin COAD also has a coordinating responsibility through its affiliation with the Long Term Recovery Committee and Unmet Needs Committee.
 - a. ESF # 14 support may vary depending on an assessment of incident impact, the magnitude and type of event and the stage of the response and recovery efforts.
 - b. Provide support activities and services in defining and addressing risk reduction and long-term community recovery priorities in accordance with local, county, tribal, state and federal statutes, rules and regulations.
 - c. ESF # 14 is designed to reduce duplication of effort and benefits, to the extent possible. This includes streamlining assistance, identifying recovery and mitigation measures to support state, local, county and tribal planning efforts.
 - d. ESF # 14 will use forward-looking and market-based long-term community recovery and mitigation efforts, focusing on permanent restoration of infrastructure, housing, and the local economy, with attention to mitigation of future impacts of a similar nature, when possible.
 - e. ESF # 14 will use the post-incident environment as an opportunity to measure the effectiveness of previous community recovery and mitigation efforts.
 - f. ESF # 14 will support the use of loss reduction building science expertise for the rebuilding of critical infrastructure (e.g., in repairing hospitals or emergency operation centers to mitigate for future flooding or tornado risks).
 - g. ESF # 14 coordinates activities with the following Emergency Support Functions: ESF # 3 (Public Works), ESF # 5 (Information, Analysis and Planning) and transitions from ESF # 6 (Mass Care, Emergency Assistance, Housing and Human Services) and other ESFs, as necessary.
 - h. Parks and Land Use – Planning and Zoning Division, as lead coordinating agency, and the identified support agencies, particularly local municipal community development offices, will facilitate

documentation with county, local and tribal governments in the damage assessment process for publicly and privately owned buildings and structures; and will facilitate documentation of the costs incurred by local governments in responding to an incident.

- i. Parks and Land Use – Planning and Zoning Division and Southeast Wisconsin COAD, together with others as needed to oversee short and long term recovery efforts and initiatives, as identified in Waukesha County Hazard Mitigation Plan. The plans identify existing resources and tools to assist local governments to further mitigation at the local level. NGOs will assist with the long term recovery and mitigation to the extent possible and consistent with their responsibilities.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE	
PARKS & LAND USE – PLANNING & ZONING; COAD / VOADS & NGOS	
Pre-Emergency	<p>Work with the County Emergency Management to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Lead local preparedness and pre-disaster recovery planning. 3. Facilitate preparation of pre-event disaster recovery plans commensurate with local risk and vulnerability for public organizations, private entities and individual households. 4. Lead a pre-disaster recovery planning process that is inclusive and accessible and facilitates emergency management practices that comply with all applicable laws, including civil rights laws. 5. Articulate recovery needs and priorities to facilitate support and collaboration with the state and federal governments, private and non-profit sector organizations. 6. Establish a process for reviewing, validating, and setting planning priorities. 7. Pre-identify a structure for managing recovery, including a local recovery coordinator or lead for managing recovery. 8. Establish agreements and mechanisms to address surge capacity needs. 9. Ensure plans, agreements, and mechanisms address the provision of disability related assistance & functional needs support services, 10. Ensure recovery-related dialogue includes and is accessible to all community groups. 11. Ensure plans incorporate worker safety and health.
Stabilization	<ol style="list-style-type: none"> 1. Stabilization is the process in which the immediate impacts of an event on community systems are managed and contained, thereby creating an environment where recovery activities can begin. The various elements of a community system will stabilize on different time frames, leading to a situation in which response, stabilization, and restoration activities can occur concurrently. Stabilization includes such activities as: <ol style="list-style-type: none"> a. Providing essential health and safety services b. Providing congregate sheltering or other temporary sheltering solutions c. Providing food, water and other essential commodities for those displaced by the incident. d. Providing disability related assistance/functional needs support services. e. Developing impact assessments on critical infrastructure, essential services, and key resources. f. Conducting initial damage assessments. g. Conducting community wide debris removal, including clearing of primary transportation routes of debris and obstructions.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

	<ul style="list-style-type: none"> h. Restarting major transportation systems and restoring interrupted utilities, communication systems, and other essential services such as education and medical care. i. Establishing temporary or interim infrastructure systems. Supporting family reunification. j. Supporting return of medical patients to appropriate facilities in the area. k. Providing basic psychological support and emergency crisis counseling. l. Providing initial individual case management assessments. m. Providing security and reestablishing Law Enforcement Agencies functions. n. Building an awareness of the potential for fraud, waste and abuse, and ways to deter such activity, such as developing Public Service Announcements and publicizing ways to report allegations of waste, fraud and abuse. o. Begin assessment of natural and cultural resources. p. Maintain records of cost and expenditures to accomplish this ESF and forward them to the EOC Finance/ Administration Section Chief.
<p>Intermediate Recovery</p>	<ul style="list-style-type: none"> 1. Intermediate recovery activities involve returning individuals and families, critical infrastructure and essential government or commercial services back to a functional, if not pre-disaster state. Such activities are often characterized by temporary actions that provide a bridge to permanent measures. <ul style="list-style-type: none"> a. Continuing to provide individual, family-centered, and culturally appropriate case management. b. Providing accessible interim housing (in or outside the affected area depending on suitability) and planning for long-term housing solutions. c. Returning of displaced populations and businesses if appropriate. d. Reconnecting displaced persons with essential health and social services. e. Providing supportive behavioral health education, intervention, including continuing to provide crisis, grief, and group counseling and support. f. Providing access and functional needs assistance to preserve independence and health. g. Updating hazard and risk analyses to inform recovery activities. h. Establishing a post-disaster recovery prioritization and planning process. i. Developing an initial hazard mitigation strategy responsive to needs created by the disaster. j. Ensuring that national and local critical infrastructure priorities are identified and incorporated into recovery planning. k. Developing culturally and linguistically appropriate public education campaigns to promote rebuilding to increase resilience and reduce disaster losses. l. Supporting capacity assessment of local, state, and tribal governments to plan and implement recovery.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

PARKS & LAND USE – PLANNING & ZONING; COAD / VOADS & NGOS

	<p>m. Complete assessments of natural and cultural resources and develop plans for long-term environmental and cultural resource recovery.</p>
<p>Long Term Recovery</p>	<p>1. Long-term recovery is the phase of recovery that follows intermediate recovery and may continue for months to years. Examples include the complete redevelopment and revitalization of the damaged area. It is the process of rebuilding or relocating damaged or destroyed social, economic, natural, and built environments in a community to conditions set in a long-term recovery plan. The goal underlying long-term redevelopment is the impacted community moving toward self-sufficiency, sustainability, and resilience. Activities may continue for years depending on the severity and extent of the disaster damages, as well as the availability of resources.</p> <ul style="list-style-type: none"> a. Identifying of risks that affect long-term community sustainment and vitality. b. Developing and implementing disaster recovery processes and plans, such as a long term recovery plan and/or reflecting recovery planning and mitigation measures in the community’s land use planning and management, comprehensive plans, master plans, and zoning regulations. c. Rebuilding to appropriate resilience standards in recognition of hazards and threats. d. Addressing recovery needs across all sectors of the economy and community, and addressing individual and family recovery activities and unmet needs. e. Rebuilding educational, social, and other human services and facilities according to standards for accessible design. f. Reestablishing medical, public health, behavioral health, and human services systems. g. Reconfiguring elements of the community in light of changed needs and opportunities for “smart planning” to increase energy efficiency, enhance business and job diversity, and promote the preservation of natural resources. h. Implementing mitigation strategies, plans, and projects. i. Implementing permanent housing strategies. j. Reconstructing and/or relocating, consolidating permanent facilities. k. Implementing economic and business revitalization strategies. l. Implementing recovery strategies that integrate holistic community needs. m. Implementing plans to address long-term environmental and cultural resource recovery. n. Ensuring there is an ongoing and coordinated effort among local, state, tribal, and federal entities to deter and detect waste, fraud and abuse. o. Identifying milestones for the conclusion of recovery for some or all non-local entities.
<p>Post-Disaster</p>	<p>1. Organize, implement, modify and develop recovery plans as requested.</p>

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

PARKS & LAND USE – PLANNING & ZONING; COAD / VOADS & NGOS

	<ol style="list-style-type: none"> 2. Ensure integrated efforts across government offices, the private sector, and nongovernmental organizations during the implementation phase of recovery projects and activities. 3. Lead effort in restoring local critical infrastructure and essential services, retaining businesses, and redeveloping housing that have been damaged, disrupted or destroyed by the disaster. 4. Lead outreach effort to all its constituents to support an inclusive post-disaster recovery planning process. 5. Manage recovery rebuilding in a manner which optimizes risk reduction opportunities and complies with standards for accessible design. 6. Lead local recovery planning effort to establish recovery vision and priorities. 7. Establish metrics to evaluate recovery progress and achievement of local disaster recovery objectives. 8. Communicate and coordinate with other levels of government involved in the recovery. 9. Receive and manage private, state, and federal grant resources; ensure effective and nondiscriminatory use of funds; and enforce accountability and compliance. 10. Ensure the safety and health of workers.

Federal ESF #15 integrates Public Affairs, Congressional Affairs, Intergovernmental Affairs, Community Relations, and the private sector under the coordinating auspices of External Affairs. • Provide the resources and structure for the implementation of the federal Incident Communication Policy and Procedures (ICEPP).

Emergency Support Function (ESF) # 15

Public Information

A. PURPOSE.

1. To establish a system that gathers and disseminates emergency-related information through the media and directly to the general public. This does not include the Alert and Warning information covered in the Public Protection ESF # 22.
2. Ensure that sufficient Waukesha County assets are deployed to provide accurate, coordinated, and timely information to the public, the media, and local, state and federal governmental partners.

B. POLICIES.

1. It is the goal of the Waukesha County to release timely and accurate emergency information to the public in a cooperative manner with the media.
2. Waukesha County will coordinate emergency information releases with other Emergency Operations Centers (EOCs), and state/federal agencies.
3. The Public Information Officer through the County Chief of Staff and/or EOC Emergency Management:
 - a. Manage all aspects of emergency public information through use of the Joint Information System protocols.
 - b. Manage Waukesha Joint Information Center (JIC).

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

COUNTY EXECUTIVE; COUNTY PUBLIC INFORMATION OFFICER (PIO)

Pre-Emergency	<p>Work with the County Emergency Management to:</p> <ol style="list-style-type: none">1. Maintain this Emergency Support Function (ESF).2. Develop and deliver public education preparedness programs.3. Prepare emergency information and instructions for release during emergencies.4. Develop, maintain system to release timely emergency information and instructions.5. Coordinate and maintain a working relationship with the media; particularly those who will disseminate emergency information to the public.<ul style="list-style-type: none">• List and maintain available media resources (call letters, names, addresses, and telephone numbers) that will disseminate emergency information to the public.6. Establish a means to monitor and respond to rumors and social media platforms.7. Designate an information center that will be the single, official point of contact for the media during an emergency.

Emergency Support Function (ESF) # 16

Hospital & Medical Services

A major event would rapidly impact local government's resources and abilities to provide medical services. Hospital and medical facilities may be severely damaged or destroyed resulting in a medical and pharmaceutical supplies/equipment shortage. Persons who are not injured, but require daily medication, would have difficulty in obtaining necessary medication due to the damage or destruction of supply locations. Injuries and health conditions will be complicated by the impact to EMS, as well as overwhelming demand for pharmaceutical supplies.

--	--

A. PURPOSE.

1. The purpose of this ESF is to define the organization, operational concepts, responsibilities and procedures to accomplish volunteer and donations management requirements. The ESF is designed to include coordination of solicited and/or unsolicited goods, undesignated cash donations, and large numbers of affiliated and unaffiliated (spontaneous) volunteers.

B. POLICIES.

1. Local government typically bears primary responsibility for responding to those seeking to help and directing them to appropriate disaster agencies and organizations.
2. The role of Waukesha County government in donated goods and volunteer management is to ensure that an organized, equitable, and thorough disaster support is rendered to affected citizens.
3. Local government has primary responsibility for the coordination and management of unsolicited goods and spontaneous volunteers.
4. Local government is ultimately in charge of the donations management system. Federal/State government, international organizations and WI-VOAD/NVOAD activities are always in support of local government.
5. The management of volunteers and donations requires a united and cooperative effort during all phases of disaster by local government, NGOs, community and faith-based organizations, the business sector, and the donor community.
6. Not all volunteers, registered, affiliated or spontaneous, may be utilized during a particular disaster. Deployment of volunteers is based on the size and type of disaster as well as the skills needed by officials to mount an effective response and recovery effort. Qualified, registered and credentialed volunteers will be utilized as requested in emergency response actions. Waukesha County may reject or limit the utilization of volunteer services based on the analysis of ongoing need matched against qualified volunteers.
7. This plan does not supersede the established protocols of voluntary agencies regarding their respective procedures for soliciting goods and services, or mobilizing their trained volunteers. However, in a County emergency, voluntary agencies and community based organizations are expected to abide by this document in order to ensure a consistent disaster relief and volunteer system.
8. Untrained, unaffiliated volunteers may be incorporated into operations, particularly for large scale disasters.
9. Volunteers will follow the instructions of the supervisors and adhere to the safety precautions provided to them. Waukesha County does not accept responsibility for risk taking and negligent actions by volunteers.
10. Volunteers must be effectively managed to ensure that volunteers do not become survivors, casualties, or impede rescue, response and recovery operations.

11. Food safety protocols will be implemented during any distribution of food.
12. Transportation/distribution of donations from the donor to the receiving organization or site will be the responsibility of the donor.
13. Waukesha County and COAD encourage donations to established non-profit voluntary or community based organizations tasked to provide response/recovery services.
14. Waukesha County and COAD will coordinate with the State EOC to assure the expeditious delivery of donated goods to the affected area(s) and individuals.
15. Donations will be managed in accordance with Generally Accepted Accounting Principles.

CITIZENS AND ORGANIZATIONS ACTIVE IN DISASTER (COAD) RESPONSIBILITIES/TASKS BY PHASE	
Pre-Emergency	<p>Work with the Office of Emergency Management to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). <p><u>NGOs</u></p> <ol style="list-style-type: none"> 1. Develop a County Volunteer Management Plan for coordinating the influx of volunteers offering their services to Waukesha County in time of emergency. <ol style="list-style-type: none"> a. Include provisions for referring needed services to appropriate ESF(s) for consideration. b. Coordinate planning with other participant organizations. 2. Identify potential sites for Volunteer Reception Centers. 3. Develop formal process to register volunteers as agents for the County. 4. Develop procedures for coordinating assignment of non-emergency personnel with the deployment of volunteer groups to prevent duplication of services. 5. Develop procedures for assisting other agencies with job descriptions and personnel management policies related to the deployment of volunteer groups/persons. <p><u>Donations</u></p> <ol style="list-style-type: none"> 1. Develop a County plan for the management of donations. Coordinate plan. 2. Develop procedures for receiving, storing, sorting and distributing donated goods. 3. Train volunteer/personnel in donations management during major emergencies. 4. Develop procedures and policies for disseminating information to the general public (through the EOC PIO), and to the various Law Enforcement Agencies regarding routing information, types of material needed, etc. 5. Coordinate with local officials to develop procedures and policies for accepting special types of donations (e.g. cash, perishable materials, etc.). <ul style="list-style-type: none"> • Utilize the existing County/municipal procedures for receiving cash donations, as appropriate. 6. Plan and coordinate with State VOAD.
Emergency	<ol style="list-style-type: none"> 1. When notified, report to the Waukesha County EOC.

CITIZENS AND ORGANIZATIONS ACTIVE IN DISASTER (COAD) RESPONSIBILITIES/TASKS BY PHASE

	<p><u>NGOs</u></p> <ol style="list-style-type: none"> 1. When notified of an emergency situation, report to the Waukesha County EOC, if appropriate. 2. Provide information to the media (through the EOC PIO) concerning the proper method(s) of offering services to survivors in Waukesha County should be developed. 3. Implement procedures to track offers and their status. 4. Establish Volunteer Reception Center for registration of unaffiliated/spontaneous volunteers. 5. Screen, evaluate, and assign volunteers. 6. Coordinate provision of food, water, and shelter for volunteer workforce. 7. Provide other ESFs with periodic updates concerning offers received. When an ESF requests services offered by volunteers, implement procedures to arrange for the deployment of personnel to areas where need exists. <p><u>Donations</u></p> <ol style="list-style-type: none"> 1. When notified of an emergency situation, report to the Waukesha County EOC, if appropriate. 2. Develop and implement a Donations Management Plan, which involves the following: <ol style="list-style-type: none"> a. The issuance of press releases through the County PIO, describing what is needed and what is not needed, as well as procedures for properly packaging, labeling, and transporting donated goods to Donations Management Centers. Additionally, the preference for cash donations as opposed to in-kind donations should be stressed. b. The activation of the Donations Branch at the EOC and various other operating locations as dictated by the situation. c. The establishment of a Donations Management Center outside the affected area, as well as staging areas for use in managing the deployment of needed goods. 3. Coordinate transportation requirements for incoming donations, including: <ol style="list-style-type: none"> a. The relaying of information to rest areas and weigh stations concerning routing information and the acceptance or rejection of certain types of donated goods. b. The placement of signs indicating routes to the reception center and/or staging areas. c. The passage of designated goods for direct delivery to affected areas. 4. Coordinate with the Logistics/Facilities Unit to secure warehouse space at sites near the emergency area. Arrange for security of site (through EOC Law Enforcement Group), traffic control, etc. 5. Coordinate receipt, distribution of bulk items and donated goods.
<p>Emergency Operations Center (EOC)</p>	<ol style="list-style-type: none"> 1. Staff ESF # 17 position in the EOC. <p><u>General Actions</u></p> <ol style="list-style-type: none"> 1. Assess the need for donations. 2. Set up one or more collection/distribution centers service area.

CITIZENS AND ORGANIZATIONS ACTIVE IN DISASTER (COAD) RESPONSIBILITIES/TASKS BY PHASE

3. Set up one or more central distribution site(s) for donated goods.
4. Set up one or more assembly sites for volunteers from outside the County.
5. Inform the community about the locations and availability of donated goods and services through the EOC PIO; coordinate with Resource support ESF # 7.
6. Distribute donated goods at service sites
7. Collect donated goods and volunteer services at service sites with the help of volunteers and County employees
8. Provide staging areas at recreation centers and parks.

NGOs

1. Implement procedures to solicit, register, screen, receive, and deploy local volunteers. Establish Volunteer Reception Center.
2. Determine present and future need for volunteer resources.
3. Obtain and coordinate volunteer resources as requested by field incident commanders.
4. Establish Volunteer Reception Center for registration of unaffiliated/spontaneous volunteers.
5. Sources for resources can include:
 - a. COAD partners
 - i. Red Cross.
 - ii. Salvation Army.
 - iii. Volunteer Centers.
 - b. General public.
 - c. Emerging NGOs.
6. Coordinate, when necessary, with the State through the Waukesha County Volunteer Reception Center and the EOC Manager for the influx of volunteer help offered in aftermath of an emergency.

Donations

1. Provide coordination of donations with the appropriate tasked organizations.
2. Determine present and future needs for donated goods (type and approximate numbers).
3. Develop information for public distribution (through PIO) describing items needed, where to send them, etc.
4. Through the EOC Public Information Officer disseminates information to ensure that offers are not inappropriate to needs.
5. Periodically update public information concerning needed items, etc.
6. Receive offers of donated goods and services; match offers to needs.
7. Coordinate delivery system to affected population.
 - Request transportation resources from Logistics to facilitate the movement of needed items to staging areas or into the emergency area.
8. As goods arrive, provide periodic listings for distribution to EOC Section Chiefs and Branch Directors so they will know what is available through the system.
9. Respond to inquiries from other EOC Branches and Units regarding availability of certain items.
10. Coordinate with the State when necessary, for the influx of donated goods offered in aftermath of an emergency.

CITIZENS AND ORGANIZATIONS ACTIVE IN DISASTER (COAD) RESPONSIBILITIES/TASKS BY PHASE

	<ol style="list-style-type: none"> 11. Coordinate activities with the State EOC through the EOC Manager. 12. Implement procedures for disposing of unneeded or unusable items. 13. Manage cash donations received by County Government. 14. Implement cash management policies/procedures to insure accountability for all cash donations received by the County during the emergency. 15. Maintain records of cost and expenditures to accomplish this ESF and forward them to the EOC Finance/ Administration Section Chief. 16. Management of donated goods.
Recovery Actions	<ol style="list-style-type: none"> 1. Continue to assess the need for recovery goods and services. 2. Continue to monitor and report needs to EOC. 3. Coordinate delivery of donated goods into and out of the central distribution center. 4. Continue to inform the community about the locations and availability of goods and services through the EOC. 5. Continue to distribute donated goods at service sites. 6. Continue to collect donated goods and volunteer services at service sites with the help of volunteers and County employees.

Federal

NOTE: Though there is no Federal ESF # 19, likely support from Federal ESF # 6 includes:

Likely Support Includes:

- Coordinate federal resources, as required, to support local, tribal, and state governments and voluntary agencies in the performance of mass care, emergency assistance, housing, and human services for persons with access and functional needs.

A. PURPOSE.

1. To coordinate activities involved with the identification, registering, transportation, sheltering and care of people with functional and access needs before, during, and after a significant emergency.

B. POLICIES.

1. Waukesha County recognizes the need to undertake additional reasonable efforts to protect and assist people with functional needs at the time of emergencies and disasters, and especially during evacuations, sheltering and reentry.
2. Functional needs individuals are those who are in situations that would prohibit them from receiving, understanding and/or implementing governmental recommendations or orders regarding protective actions (evacuation and/or sheltering), and need support from others to effectively take protective actions. Functional needs individuals will include those who, due to physical or mental limitations, require assistance in implementing protective actions. It also includes individuals who lack the vehicles or structures to effectively implement recommendations or orders to evacuate or shelter-in-place, respectively. (Reference: The Functional Needs Guide.)

DEFINITION OF FUNCTIONAL POPULATION

Shelter operations can accommodate individuals who have a health condition that does not require institutionalization, but may require:

- Intermittent skilled observation , assessment, and/or maintenance;
- Assistance with activities of daily living (e.g., feeding, ambulating, self-medication or personal hygiene);
- Dependence on electricity;
- Receiving dialysis treatments.

Shelter operations cannot provide 24-hour skilled care and the following individuals will be referred to an appropriate health care facility:

- Persons who will require hospitalization or institutionalization;
- Residents of nursing homes, Assisted Living Facilities, Intermediate Care Facilities and facilities caring for the Developmentally Disabled or those with a mental illness;
- Persons who are bedridden;
- Women experiencing high-risk pregnancies who are within four weeks of estimated date of delivery or any pregnant woman in active labor;
- Persons who are in a sudden acute medical or emergency condition; and/or,
- An individual arriving at a Special Populations Shelter whose condition exceeds the capabilities of the shelter.

3. There are facilities and institutions within the County that house and care for functional needs individuals, which by Wisconsin law, must have plans, procedures and resources in place to implement protective actions for their patients during emergencies. The County will expect that such facilities within its jurisdiction have complied with this law and will not require, without advanced planning, County resources or personnel to complete protective actions for their patients. The County does recognize, however, that disaster-related damage to structures and transportation infrastructures could limit or prohibit implementation of facility emergency plans, and under such circumstances, County assistance could be necessary to minimize injury or loss of life.
4. **NONDISCRIMINATION.** No services will be denied on the basis of race, color, national origin, religion, sex, age, or disability, and no special treatment will be extended to any person or group in an emergency over and above what normally would be expected in the way of government services. Waukesha County activities pursuant to the Federal /State Agreement for major emergency recovery will be carried out in accordance with Title 44, Code of Federal Regulations (CFR), Section 205.16.—Nondiscrimination. Federal disaster assistance is conditional on full compliance with this rule.
5. It is the policy of Waukesha County to comply with the American Disabilities Act and its standards set forth in Title 41. CFR Section 101.19–6, to the extent permitted by fiscal constraints.

DHHS RESPONSIBILITIES/TASKS BY PHASE	
Pre-Emergency	Work with the Office of Emergency Management to: <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Prepare and maintain operating procedures, resource inventories, personnel rosters and detailed resource mobilization information necessary for implementation of ESF # 19.

DHHS RESPONSIBILITIES/TASKS BY PHASE	
	<ol style="list-style-type: none"> 3. Develop and maintain an inventory and sources of special medical needs resources, manpower and equipment to include supplies and maintenance. 4. Develop procedures to meet functional needs during disaster.
Emergency	<ol style="list-style-type: none"> 1. Coordinate emergency medical transport of individuals with special medical concerns to a hospital. 2. Assist with meeting any special medical needs. 3. Assist people with Alzheimer's disease, functional limitations and various disease processes and chronic illnesses. 4. Coordinate with the staff manager of "functional needs capabilities. 5. Support and monitor primary shelter activities, and redirect functional needs persons as necessary. 6. In the event that evacuation of all or portions of Waukesha is required, the EOC will request civic associations to facilitate actions taken for functional needs individuals within their neighborhoods. Such actions could include finding rides for functional needs individuals with other evacuating families, guiding emergency vehicles to the residences of functional needs individuals, and providing individuals to accompany functional needs evacuees during the evacuation to provide support when needed.
Emergency Operations Center (EOC)	<ol style="list-style-type: none"> 1. Staff ESF # 19 position in the EOC. 2. Determine coordination needed regarding functional needs shelters. 3. Notify civic association representatives serving the threatened or impacted areas regarding the emergency situation and initiate steps to utilize their support and services. 4. Establish the status of recommendations or orders for evacuation of all or portions of Waukesha County. Consult with ESF # 14 regarding actions to provide the necessary services to functional needs individuals. 5. Work with ESF # 6 staff to establish, if needed, telephone numbers(s) for functional needs individuals. Ensure that telephone operators are given up-to-date information regarding instructions for functional needs individuals and that procedures are in place for relaying requests from the public to ESF # 19 staff for action. 6. Ensure ESF # 15, Public Information, has received all relevant information regarding actions that functional needs individuals within the County are to take, and that such information is released to the media through ESF # 15. 7. Work with ESF # 7, Resource Management, and ESF # 16, to identify facilities, institutions and businesses that may be available to provide additional support in the transportation and care of functional needs individuals. Advise ESF # 5, Information and Planning, of the results. 8. Work with ESF # 1, Transportation, to provide resources needed to assist in the evacuation of functional needs individuals. 9. Maintain records of cost and expenditures to accomplish this ESF and forward them to the EOC Finance/ Administration Section Chief.
Recovery Actions	<ol style="list-style-type: none"> 1. Coordinate with ESF # 1, Transportation, to support reentry of evacuated functional needs individuals to their homes. 2. Work with ESF # 6 to identify functional needs individuals from impacted

DHHS RESPONSIBILITIES/TASKS BY PHASE

	<p>areas that may require assistance in accessing and using disaster relief and recovery services.</p> <ol style="list-style-type: none"> 3. Develop and prioritize strategies, in coordination with ESF # 6, for supporting recovery operations. 4. Upon request by the EOC, and in coordination with ESF # 14, provide personnel to assist in recovery operations.

Emergency Support Function (ESF) # 20

Fatality Management

Preface

Disasters have the capacity to produce large numbers of fatalities. The profound effects of mass fatalities on both loved ones and the entire community, and the ability to coordinate and obtain the needed fatality management resources are critical emergency response functions of Waukesha County.

Primary Agency

**Department of Health & Human Services (DHHS)
Medical Examiner**

Waukesha County Emergency Operations Center	State of Wisconsin
<p style="text-align: center;"><u>AGENCIES</u></p> <p>Primary Department of Health & Human Services (DHHS) Medical Examiner</p> <p>Support Ambulance Services: Public and Private Citizens & Organizations Active In Disaster (COAD) / VOADs & Non Governmental Organizations (NGOs) DMORT Emergency Management Fire Departments/EMS Funeral Directors/Association Hospitals Law Enforcement Agencies Public Works</p>	<p style="text-align: center;">NOTE:</p> <p>State support to this ESF may be available in coordination with the State Emergency Operations Center (EOC).</p>

Federal
NOTE: Though there is no Federal ESF # 20, likely support from Federal ESF # 8 includes:
<p><i>Likely Agency Activities</i></p> <ul style="list-style-type: none"> • Provide supplemental assistance for mass fatality management, victim identification, and decontaminating remains.

Emergency Support Function (ESF) # 20

Fatality Management

A. PURPOSE.

1. This function addresses general policies and procedures for the mitigation, preparedness, response to and recovery from incidents with fatalities. It also provides an initial coordination framework of mass fatality response activities.

B. POLICIES.

1. It is the policy of Waukesha County that human remains should only be removed if authorized by the medical examiner or his/her designee.
2. All human remains will be treated with the utmost respect and dignity during the collection and removal process.
3. Personnel involved in the collection, removal, identification and transportation of human remains must use the appropriate levels of protective equipment to prevent any injury or exposure to pathogens.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

DEPARTMENT OF HEALTH AND HUMAN SERVICES (DHHS); MEDICAL EXAMINER

Pre-Emergency	<p>Work with the County Emergency Management to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Maintain inventories of resources and equipment. 3. Participate in drills, exercises. 4. Develop emergency action checklists. 5. Maintain mutual aid agreements.
Emergency	<ol style="list-style-type: none"> 1. Determine if there have been fatalities and the numbers involved. 2. Notify the Medical Examiner of situation. 3. Plan for collection sites and personnel to bring fatalities in from the field (litter bearers). 4. Make sure that locations are noted where each body was found and that all information is appropriately tagged or attached (i.e. date, time, approximate age, location and identification if known). 5. Protect the property and personal effects of the deceased. <ol style="list-style-type: none"> a. Coordinate with Law Enforcement or EOC. 6. Notify relatives. <ul style="list-style-type: none"> • Coordinate/implement Family Reunification Centers. 7. Provide scene security and evidence identification. 8. Provide security for temporary morgues. 9. When notified, report to the Waukesha County EOC. 10. Implement and coordinate the Waukesha County Mass Fatality Incident Plan. 11. Establish effective fatality management incident management structure within the on–scene Operations Section. 12. Procure equipment and supplies necessary for: <ol style="list-style-type: none"> a. Tag and flag operations. b. Establishment of a temporary morgue, if needed. c. Body transportation. d. Temporary cold storage (portable units i.e., refrigeration trucks, or portable refrigeration containers). 13. Identify, set up, and coordinate activities at the Incident Morgue to include: <ol style="list-style-type: none"> a. Victim tracking. b. Fingerprinting. c. Physical examinations. d. Withdrawal of blood and body fluids. e. Forensic examinations. f. Victim identification. g. Preparation for final disposition and release of remains. 14. Advise on the use of Personal Protective Equipment as appropriate. 15. Assure epidemiological monitoring and surveillance is occurring. 16. Establish and maintain a comprehensive recordkeeping system for continuous updating and recording fatality numbers. 17. Establish Public Information capabilities within the on–scene structure or within the Joint Public Information System at the EOC to ensure accurate and expedient dissemination of information. 18. Coordinate with Law Enforcement for investigation/evidence preservation.

Emergency Support Function (ESF) # 21

Damage Assessment

Emergencies may create widespread damage and life threatening situations. The County must make an initial determination of where damage is, damage severity, the kinds of resources needed and locations where they are needed. This assessment begins the County's emergency response to locate and quantify the scope and severity of life threatening situations and identify escalating emergencies.

The County must also gather detailed damage information necessary to organize longer term response and recovery efforts. This information is essential to obtaining a state of emergency declaration by the Governor or a federal disaster declaration, which are necessary to obtain external assistance from these sources.

17. Specialists (As situation requires.)
18. Utilities, Private

Federal

NOTE: Though there is no Federal ESF # 21, likely support from Federal ESF # 3 includes:

Likely Support Includes:

- Provide public works and engineering-related support to include: post incident assessments of public works and infrastructure; and implementing and managing the DHS/ FEMA Public Assistance Program and other recovery programs.

A. PURPOSE.

1. **Life Safety Assessment:** Coordinate the conduct of the initial life safety assessment and ongoing damage assessments of the County so that accurate and timely information on the situation post-emergency are obtained.
2. **Damage Assessment:** Accomplish comprehensive assessment and reporting of damage to public and private property resulting from an emergency and requesting state or federal disaster assistance.

B. POLICIES.

1. All Waukesha County departmental personnel that are out on the streets will regularly report operational information and damages observed by them to the EOC through their normal dispatch centers.

2. Waukesha County will share assessment information with response and relief organizations in the EOC.
3. Personal information regarding emergency victims will be kept confidential and will only be shared with the response and recovery organizations identified within this plan for the sole purpose of providing assistance to these emergency victims.
4. In the event of a Law Enforcement Agencies related event, some assessment information may need to be kept confidential by the EOC staff or have limited distribution within the EOC until such time as the Police Chief or designee deems it appropriate for release within the EOC or to the public.
5. Life Safety Assessment will begin immediately upon occurrence of an emergency and Damage Assessment will begin as soon as it can safely be done.
6. Damage assessment should be conducted using surveys by teams of qualified County inspectors representing both the public and private sectors. Where required, these County teams will be augmented by inspectors from appropriate state and federal agencies. Types of damage assessment include:
 - a. Individual Assistance damage assessment relates to estimates of damage to the private sector and individuals, and includes damages to homes, businesses, farms, possessions, and other improvements.
 - b. Public Assistance damage assessment involves damage to public buildings, facilities, roads, bridges, sewer plants, etc. Public assistance is composed of emergency work and permanent restoration. Emergency work is defined as that necessary to save lives, protect public health and safety, and protect property. An example of emergency costs would be those associated with temporary facilities or temporary restoration of services. Permanent restoration is the cost associated with bringing a facility back to pre-emergency condition.
 - c. Building Inspection. This is a more thorough, professional evaluation of individual building safety and habitability conducted by County inspectors.
7. All affected Waukesha County departments will provide damage assessment reports regarding damage to buildings, equipment, vehicles, communications, and personnel availability to the EOC.

WAUKESHA COUNTY EOC RESPONSIBILITIES/TASKS BY PHASE	
Pre-Emergency	Emergency Management works with partner agencies to: <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Develop and coordinate damage assessment procedures with the State EOC. 3. Develop system and forms for tabulating damage assessment. 4. Develop damage assessment teams. 5. Conduct damage assessment training. 6. Maintain pre-emergency maps, photos, and other documents. 7. Participate in drills, exercises. 8. Develop emergency action checklists.
Emergency	<ol style="list-style-type: none"> 1. When notified, report to the Waukesha County EOC.
Emergency Operations	<ol style="list-style-type: none"> 1. Staff ESF # 21 position in the EOC.

Center (EOC)	<ul style="list-style-type: none"> • Conduct damage assessment of public and private property to determine the extent of damage. <ol style="list-style-type: none"> 2. Collect and analyze initial life safety assessment information from field units to include: <ol style="list-style-type: none"> a. Locations of injuries, deaths, damages. b. Types and extent of damages. c. Impact on people. d. Identify immediate victim needs (need for shelters, water availability, etc.). e. Identify resource requirements (assistance needed) in the affected areas. f. Identify local resources available. 3. As appropriate compile the information gathered by damage assessment teams, complete the state Uniform Disaster Situation Report (UDSR) report for the county and submit it within 24 hours to WEM. (See Attachment 4 to this ESF.) 4. Provide initial life safety assessment data and information to the EOC Planning Section Situation Unit. 5. Prepare an initial situation map illustrating the footprint (location, size, etc.) of the affected area to aid in deploying response and recovery resources. <ul style="list-style-type: none"> • The footprint may be revised several times during emergency response until the full extent of the impacted area is clearly identified. 6. Make recommendations as to actions to be taken based on the assessment information. 7. Provide a consolidated, overall situation report for responding agencies/ departments. 8. Provide information necessary for the EOC Public Information Officer. 9. Activate, deploy damage assessment teams. <ul style="list-style-type: none"> • Assign County personnel and volunteer professionals to damage assessment teams based on levels of certification and expertise. 10. Prepare Initial Damage Assessment reports for the Situation Unit Leader. 11. Request and coordinate structural engineers to assist in the evaluation of building safety, especially during search and rescue (SAR) operations. 12. Receive, record and consolidate all damage reports. <ol style="list-style-type: none"> a. Assemble damage assessment information and create visual displays and computerized GIS maps of the affected areas. b. Determine the extent of damages. This information will provide a basis for determination of actions necessary, establishment of priorities among essential actions and allocation of County resources in the emergency area during the early stages of the recovery effort. 13. Provide data to support Chief Executive local declarations of emergency and formal requests for assistance. Information to include: <ol style="list-style-type: none"> a. The extent of emergency impact on the County (description of the emergency, where the emergency struck, approximate number of people affected, demographics of the affected area). b. The estimated dollar amount of damages. c. Any conditions that could affect the ability to carry out relief coordination.
---------------------	--

WAUKESHA COUNTY EOC RESPONSIBILITIES/TASKS BY PHASE

	<ol style="list-style-type: none"> 14. Determine unsafe facilities. <ul style="list-style-type: none"> • Assess and post all damaged buildings, structures, and facilities for structural integrity and occupant safety. 15. Provide damage assessment data and information to the Planning Section. 16. Compile damage assessment reports and provide information on damages to the State EOCs. 17. Provide appraisers to assist with damage assessment. <ul style="list-style-type: none"> • Arrange for appraisers to arrive at affected sites. 18. Coordinate damage assessments with State, and federal agencies as appropriate. <ol style="list-style-type: none"> a. Because federal funding may be involved, and as part of the public assistance application process, state and federal damage assessment teams may want to identify and validate damaged property, define scope of repairs, and determine repair or replacement costs. b. Escort state and federal damage survey officials on inspection of damaged areas. c. Develop map(s) for affected areas: <ul style="list-style-type: none"> – Sites are numbered on County map. – Damages are described on separate sheets of paper by numbers corresponding to numbers on maps. d. Prioritize sequence of site visitations to ensure most heavily damaged areas are visited; it may not be necessary to visit isolated damage sites.
<p>Recovery Actions</p>	<ol style="list-style-type: none"> 1. Based on the damages and community development plans, provide guidance for post emergency mitigation and redevelopment opportunities. 2. Prepare Hazard Mitigation Reports. 3. Coordinate emergency permitting procedures. 4. Analyze damages from floods and make recommendations to EOC Director and Disaster and Emergency Services related to the National Flood Insurance Program (NFIP). 5. Serve as liaison to insurance industry in event of build-back issues and FEMA/NFIP requirements. 6. Coordinate and monitor the movement and activity of contractors entering the County working on restoration projects. 7. Assist Real Estate Assessments with reappraisal of properties following an emergency for tax adjustments. 8. Activate the County's Emergency Permitting Process. 9. Prepare Project Worksheets. <ul style="list-style-type: none"> • A Project Worksheet identifies a specific damaged property or structure, defines the scope of work, and establishes the cost of repair or replacement. A separate Project Worksheet is assigned to each site or project. The compendium of Project Worksheets comprise in total the County's Public Assistance Application (federal monies granted to repair, replace damaged or destroyed public facilities). 10. Train and deploy personnel for damage assessment. 11. Provide administrative advice and support relative to preparation of damage assessment forms and reports.

WAUKESHA COUNTY EOC RESPONSIBILITIES/TASKS BY PHASE

	<ol style="list-style-type: none"> 12. Analyze the damage assessment information to determine if the damages meet the criteria to request Federal Disaster Assistance (SBA or Presidential Declaration). 13. Attachment 3
WAUKESHA COUNTY DAMAGE ASSESSMENT SOP

A. OVERVIEW OF DAMAGE ASSESSMENT PROGRAM.

1. The County Emergency Management organizes a county-wide damage assessment team. The team members are trained on a routine basis and are prepared for activation 24 hours a day, 7 days a week subsequent to a disaster occurrence.
2. Each team member is pre-assigned to cover a specific geographical area (e.g., a given municipality or township) or a specific type of damage (e.g., county-wide damage to roads or forests). In addition, each team member knows what information is required to be reported (i.e., is familiar with the UDSR, the State's Standard Damage Assessment Report form), the timeframes for reporting, who to report to (e.g., the County Emergency Management at the EOC if activated), and by what means (i.e., via phone, electronic mail, 2-way radio, in person, etc.).
3. During a disaster, county and local response agencies will, on an ongoing basis, report on the extent of their involvement, estimate damages, and gather information regarding the disaster's impact on the public and private sectors. Such information is used by county decision-makers to direct the response and recovery effort. The County Emergency Management coordinates receiving and disseminating this information as appropriate. The County EOC may be activated or a field command post set up to facilitate this process. The County Emergency Management Coordinator will notify WEM, through the Area Director, when such a disaster occurs.
4. When there is the potential need for state and/or federal assistance to supplement county and local efforts or when requested by the WEM Area Director, the county is required to submit a 24-hour "flash damage report" to WEM via the TIME Teletype. The Uniform Disaster Situation Report (UDSR) is used for this purpose. (See Appendix C, "State of Wisconsin Guidelines for Assessing and Documenting Disaster Damage" which explains the reporting requirement and provides instructions for completing the form.) At a minimum, the 24-hour report should include the following:
 - a. Time, date, location, and type of disaster.
 - b. Time and date of the UDSR submission, as well as name of person submitting the report.
 - c. Number of people injured or deceased.
 - d. Number of persons homeless and number evacuated and in shelters.
 - e. Damage estimates for the public and private sectors.
 - f. An estimate of the amount of damage covered by insurance.
5. To obtain the information required on the UDSR, the County Emergency Management will activate the pre-designated county damage assessment team. The team will operate per instructions provided by the County Emergency Management. The County Emergency Management will coordinate the team's efforts and compile the information gathered by the team into an overall report for the county and submit it within 24 hours to WEM, also providing a copy to the WEM Area Director.
6. As the disaster progresses and emergency response efforts are curtailed, the county will continue to assess the impact of the disaster through information received from response agencies and from the county damage assessment team. This information will allow decision-makers to prioritize recovery efforts and to determine the need for supplemental state or federal assistance. The County Emergency Management will be responsible for transmitting updated information to WEM so that WEM can revise the original 24-hour UDSR submission.

7. The County Emergency Management, on behalf of the County Executive, will consult with the WEM Area Director on the need for state and/or federal assistance. A decision will be made jointly by WEM and the county as to whether or not and what types of federal assistance will be requested. “The State of Wisconsin County Emergency Management Director’s Guide to Key Federal and State Disaster Assistance Programs” (Appendix D) describes the programs available and the county’s role in requesting those programs.
8. When a decision is made to request Presidential Disaster Assistance, the county is required to participate in the Preliminary Damage Assessment (PDA) process. The PDA is the first step in requesting such assistance. The process and its purpose are described in “The State of Wisconsin Guidelines for Assessing and Documenting Disaster Damage.” The County Emergency Management is responsible for assigning a knowledgeable county/local representative to each of the PDA teams.

B. RESPONSIBILITIES.

1. The County Emergency Management is responsible for doing the following:
 - a. Organizes county-wide damage assessment team. Ensures that each municipality is represented and that county/local agencies/departments are aware of their responsibilities. Also ensures that all other potential sources of expertise are tapped to obtain necessary and required information. Maintains current listing of team member names and 24-hour phone numbers.
 - b. Trains damage assessment team members. Ensures that they understand the following:
 - (1) The purpose of the team and its damage assessment function. Also, the conditions under which it would be activated and how it would operate.
 - (2) Their role as team members, including how they will be apprised of the team’s activation, what information would be expected of them, including geographic or assessment area of responsibility, and how and when it would be transmitted to the County Emergency Management.
 - (3) The state’s requirements with regard to submitting the Uniform Disaster Situation Report (UDSR), and participating in the Preliminary Damage Assessment (PDA) process.
 - c. In a disaster situation, determines if the team should be activated and which members. Consults with the County Executive and the WEM Area Director and activates the team, as appropriate.
 - d. Upon activation, briefs the team on details of the disaster and on the specific timeframe for submitting information to the County Emergency Management. Reviews with the team damage assessment procedures and reporting requirements.
 - e. Receives and compiles information from the team members and uses it to complete a Uniform Disaster Situation Report. Submits the report as required to the Division of Emergency Management via FAX or TIME Teletype within 24 hours of the occurrence. Submits updated reports, as necessary, to WEM.
 - f. Provides damage assessment information to the County Executive and other decision makers on an ongoing basis. Obtains specific or additional damage assessment information at their request.
 - g. Maintains records of all damage reports and disaster-related expenditures.
 - h. Ensures that all affected municipalities and government agencies are maintaining separate and accurate records of disaster-related expenditures.

- i. If required, appoints and briefs county representatives on Preliminary Damage Assessment (PDA) teams.
 - j. If required, coordinates with WEM and the Federal Emergency Management Agency (FEMA) in conducting the PDA. If requested, locates facility to be used as headquarters for PDA teams and coordinators.
 - k. Upon request, provides appropriate information and documentation to WEM in support of requests for federal disaster assistance, e.g., Small Business Administration (SBA) Disaster Loan Program, Farmers Home Administration (FmHA) Emergency Loan Program, and Presidential Emergency or Major Disaster Declarations.
2. County-wide Damage Assessment Team Members are responsible for doing the following:
- a. Attend training sessions and briefings conducted by the County Emergency Management to develop an understanding of the following:
 - (1) The purpose of the damage assessment team and its damage assessment function. Also, the conditions under which it would be activated and how it would operate.
 - (2) Their role as team members, how they would be activated, what area they would be responsible for assessing, what information they would be expected to provide, and how and when they would be expected to transmit the information to the County Emergency Management.
 - (3) The county's reporting responsibilities with regard to the Uniform Disaster Situation Report (UDSR) and its role in the Preliminary Damage Assessment (PDA) process.
 - b. Determine, prior to a disaster occurrence, how they will obtain the damage information they are responsible for submitting to the County Emergency Management.
 - c. Upon activation of the team, obtain information on or attend a briefing conducted by the County Emergency Management to review damage assessment procedures and reporting requirements and to be apprised of specific timeframes for submitting damage assessments.
 - d. Perform damage assessment and submit assessment information to the County Emergency Management within the required timeframe. Submit updated information, or other requested information, to the County Emergency Management. Maintain record of all submitted information.
 - e. As appropriate (e.g., if representing a local unit of government or emergency response agency), maintain separate and accurate records of disaster-related expenditures.
 - f. If requested by the County Emergency Management, participate, as instructed, in the Preliminary Damage Assessment (PDA) process as a county/local representative.
 - g. Upon request by the County Emergency Management, obtain and submit additional information to be used as documentation in support of requests for federal disaster assistance.

C. POST-INCIDENT.

- 1. The County is required to submit a complete and final Uniform Disaster Situation Report (UDSR) to the Division of Emergency Management. In its final form, it will serve as both a damage assessment report and a

record-keeping document which describes the full extent of the disaster's impact on the public and private sectors and which summarizes the involvement of local/county, private, and NGOs in the response effort. This report should be mailed by the County Emergency Management to WEM Madison, with a copy to the Area Director, within two to three weeks of the disaster occurrence.

2. County Emergency Management.

- a. As required, assists in the administration and implementation of Presidential Emergency and Major Disaster Declarations. In particular, acts as Designated Agent or Single Point of Contact for all public assistance project applications in the county. Works with applicants in preparing for federal-state engineers. In coordination with applicants, reviews findings of engineers on completed Damage Survey Reports (DSR).
- b. In a Presidential Disaster Declaration, works with the State Hazard Mitigation Officer (SHMO) in identifying and recommending hazard mitigation projects. Assists in the development of the federally required 180-day hazard mitigation plan. If projects are funded, coordinates with SHMO to ensure they are completed as approved by FEMA.
- c. Prepares and submits a final UDSR to WEM (copy to Area Director), summarizing total extent of disaster-related damages in the public and private sectors and the amount of county/local disaster-related expenditures to date.
- d. Debriefs damage assessment team and critiques damage assessment operations. Makes appropriate changes in Damage Assessment Annex to improve future operations.

3. County-wide Damage Assessment Team Members.

- a. As appropriate (e.g., if representing an applicant for public assistance), cooperate with the County Emergency Management in complying with FEMA public assistance grant requirements.
- b. Attend damage assessment team debriefing conducted by County Emergency Management. Critique damage assessment operation and make recommendation for improvement.

Emergency Support Function (ESF) # 22

Public Protection (Warning, Evacuation, Shelter)

Preface

1. **Alert and Warning:** ESF is based on incoming notification of an occurring or imminent emergency situation, provide relevant populations with timely alert and warning, including information on protective actions such as shelter in place or evacuation, as well as where additional information can be obtained.
2. **Evacuation:** ESF is based on an emergency and/or incident that requires all or part of the county population to be re-located away from the threat. The magnitude and location of the event will dictate the establishment of evacuation routes.
3. **Shelter:** ESF is based on information received from existing and evolving evacuation operations and encompasses general and access and functional needs populations. Sheltering can occur in-place and/or in designated, equipped shelters to support displaced populations or until incident(s) are mitigated and recovery operations can be implemented. The sheltering function is designed to meet day-day needs of the displaced population and staffed to register and track all evacuees.

Emergency Support Function (ESF) # 22

Public Protection (Warning, Evacuation, Shelter)

A. PURPOSE.

1. Alert and Warning: To provide rapid alert and warnings to the public and key Waukesha County and other officials of an impending or occurring natural emergency, technological emergency, hostile action, or impending conditions that could be hostile or unfriendly to public welfare or safety.
2. Evacuation: To provide for the evacuation of part or all of the population from any threatened or stricken disaster area within the Waukesha County to locations providing safety and shelter and to provide guidance for in-place sheltering when evacuation is not feasible.
3. Shelter: Identify shelters and mass care facilities.

B. POLICIES.

1. Alert and Warning:
 - a. Waukesha County Sheriffs Department utilizes the 24-hour emergency Waukesha County Communications Center and other existing systems, such as sirens, Sheriff and municipal Police and Fire mobile units, telephone, County radio frequencies, fax, media, amateur radio and access TV channel, mass notification system (MyStateUSA) for the dissemination of warning information.
 - b. Citizens and government employees have the responsibility to monitor for severe weather alerts via television, radio, and weather alert radios – text alerts.
 - c. The criteria for issuing an alert and warning are:
 - (1) Public Safety: dissemination of information which will aid in reducing loss of life or substantial loss of property.
 - (2) Official Information: the source of information is a local, state or federal government agency that directly supports federal responsibilities concerning the protection of life and property.
 - (3) Time-Critical: an event that requires immediate public knowledge to avoid adverse impact.
 - d. Incident commanders may authorize the use of public address systems on vehicles, megaphones, face-to-face communications, and pre-scripted messages for time-critical notifications.
 - e. The Emergency Alert System (EAS) is used to supplement warnings to citizens utilizing participating radio or television stations.
 - f. Warning to the affected populace will be made by any expeditious methods available at the time to include, but not limited to, sirens, telephone, fax, radio, EAS, amateur radio, media, and police and fire mobile units and the mass notification system (MyStateUSA).

- g. No guarantee of a perfect system is implied by this plan. As assets and personnel may be overwhelmed, Waukesha County will endeavor to make every reasonable effort to respond to an emergency or disaster based on the situation, information and resources available at the time.
- 2. The decision to evacuate or shelter-in-place (S-I-P) can be complicated with each option presenting substantial benefits and risks. The IC must evaluate those risks and benefits to maximize public safety while minimizing potential loss of life. ICS must be used during evacuation or shelter operations.
 - a. Evacuation:
 - (1) Citizens are advised to follow evacuation orders. Those who do not wish to comply are encouraged to provide “next-of-kin” information.
 - (2) Consideration will be given to access and functional needs populations during the evacuation process.
 - b. Shelter:
 - “Shelter-in-Place” is the preferred option whenever possible.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE	
EMERGENCY MANAGEMENT; WAUKESHA COUNTY SHERIFF	
Pre-Emergency	<p>Work with partner agencies and stakeholder to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Participate in drills, exercises. 3. Develop emergency action checklists. <p><u>Alert and Warning:</u></p> <ol style="list-style-type: none"> 1. Maintain a 24-hour primary warning point for the receipt of notifications. 2. Develop and maintain a system to disseminate emergency alerts and warnings to the public. 3. Develop and maintain a system to notify key officials and agencies in the event of an emergency. 4. Facilitate development and maintenance of procedures and SOP’s for warning access and functional needs populations and locations, such as schools, hospitals, nursing homes, major industries, institutions, and places of public assembly. <p><u>Evacuation:</u></p> <ol style="list-style-type: none"> 1. Identify evacuation routes within Waukesha County. 2. Conduct public education about evacuation procedures. 3. Develop and maintain procedures and SOP’s for implementing evacuation operations, including evacuation routing. <p><u>Shelter:</u></p> <ol style="list-style-type: none"> 1. Identify locations/capacities of shelters in conjunction with ARC and HHS. 2. Analyze mass care resource requirements for equipping shelters. 3. Develop agreements with mass care providers as necessary. 4. Develop and maintain procedures and SOP’s for implementing sheltering operations.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

EMERGENCY MANAGEMENT; WAUKESHA COUNTY SHERIFF

	<p>5. Develop procedures and SOP’s for providing notification to sheltered populations regarding re–entry/relocation issues.</p> <p>Re–entry:</p> <p>1. Implement procedures and SOP’s for providing notification to sheltered populations regarding re–entry/re–location issues.</p>
<p>Emergency</p>	<p>Alert and Warning:</p> <ol style="list-style-type: none"> 1. Coordinate with Chief Elected Officials and Public Information Officers to disseminate alerts and warnings, as appropriate (this may be necessary prior to EOC activation). 2. Incident commanders may authorize the use of public address systems on vehicles, bull horns, face–to–face communications, and pre–scripted messages for time–critical notifications. 3. Notify departments and agencies to activate agency response efforts, as necessary to ensure 24–hour capability. 4. Alert employees assigned to emergency duties. 5. Coordinate alert and warning notification with other Waukesha County agencies and adjoining jurisdictions. 6. Utilize all means available to effectively disseminate notification and warnings. 7. Monitor all alert and warning systems to evaluate functionality. <p>Evacuation:</p> <ol style="list-style-type: none"> 1. Coordinate implementation of locally ordered evacuations. Use developed SOP’s for response and: 2. Initiate evacuation orders when necessary. <ol style="list-style-type: none"> a. Identify areas potentially in need of evacuation (i.e. flood plains, areas near hazardous materials, etc.). b. Identify evacuation routes and provide signage. c. Identify required transportation resources. d. Establish traffic and perimeter control as requested. e. Ensure public information activities. f. Ensure security for evacuated areas. g. Designate reception areas if necessary. h. Determine transport needs for access and functional needs populations. i. Develop and disseminate evacuation instructions. <p>Shelter:</p> <ol style="list-style-type: none"> 1. Determine if population should be sheltered in–place (ESF #10: Hazardous Material Incidents). 2. Identify and publicize shelter locations; Coordinate with ESF # 15 (Public Information) to ensure shelters are staffed and equipped with vital resources. 3. Shelter In–Place (ESF #10: Hazardous Material Incidents). <ol style="list-style-type: none"> a. Safe and quick evacuations may not be possible due to time, weather, and other factors. An option to evacuation is “shelter in place,” e.g. notifying occupants of buildings, facilities, homes, to seek protection indoors and stay inside until notified that it is safe to exit.

PRIMARY DEPARTMENT RESPONSIBILITIES/TASKS BY PHASE

EMERGENCY MANAGEMENT; WAUKESHA COUNTY SHERIFF

	<ul style="list-style-type: none"> b. When people cannot evacuate before a hazardous material plume arrives, public officials must advise them to stay indoors and reduce the ventilation from outside air as much as possible. c. For in-place sheltering to be effective, the decision-making authority must be clearly defined, warning to the public must be timely, and the sheltered population must know how to reduce shelter ventilation rates.
<p>Emergency Operations Center (EOC)</p>	<ul style="list-style-type: none"> 1. Staff ESF # 22 position in the EOC. 2. Maintain records of cost and expenditures to accomplish this ESF and forward them to the EOC Finance/ Administration Section Chief. <p>Alert and Warning:</p> <ul style="list-style-type: none"> 1. Disseminate emergency warning information received from state and federal agencies. 2. Disseminate warnings initiated at local government level. 3. Warning dissemination methods can include: <ul style="list-style-type: none"> a. Sirens. b. Telephones and pagers. c. Mobile public address (PA) systems. d. Mobile sirens. e. "Runners" e.g. door to door notifications. f. Use of media: local television, radio and newspaper. g. Emergency Alert System (EAS). h. County and municipal communication systems. i. Law Enforcement Agencies Transaction of Information for the Management of Enforcement (TIME) System Teletype. j. National Warning System. k. Mass notification systems. l. 2-1-1 Impact 4. Coordinate manpower for door-to-door warning if feasible. <p>Evacuation:</p> <ul style="list-style-type: none"> 1. Serve as the Waukesha County point of contact for municipal, county and state ordered evacuation efforts. 2. Initiate evacuation orders when necessary. 3. Coordinate the implementation of locally ordered evacuations, actions include: <ul style="list-style-type: none"> a. Identify areas potentially in need of evacuation (i.e. flood plains, areas near hazardous materials, etc.). b. Identify required transportation resources. c. Establish traffic and perimeter control as requested. d. Ensure public information activities. e. Ensure security for evacuated areas. f. Designate reception areas if necessary. 4. Plan for recovery to include: <ul style="list-style-type: none"> a. Initiate return, when possible. b. Control traffic.

NOTIFICATION AND WARNING SOP

A. NOTIFICATION.

1. Waukesha County may receive initial warning of a disaster or pending disaster from County and municipal Departments, the National Warning System, neighboring jurisdictions, the State EOC, the National Weather Service, the news media, or the general public.

B. WATCH, STANDBY PROCEDURES.

1. If a pending disaster has the potential of affecting Waukesha County. Departments will take the following actions:
 - a. Review this document.
 - b. Notify employees.
 - c. Review department emergency plans.
 - d. Insure that department vehicles and equipment are serviced and ready.
 - e. Inventory existing communication equipment. Be prepared to collect and redistribute radios, portable telephones, chargers, batteries, etc.
 - f. Obtain maps, drawings, and other emergency aids.
 - g. Continue to provide routine service to the public, but plan to change to emergency procedures upon warning notification.
2. Recall procedures vary by department, and each department has the responsibility to inform employees of proper recall procedures. Employees who are recalled are expected to secure their families and homes, and report promptly to their assigned positions.
3. Employees who are recalled should realize that the emergency may be several days or longer in duration. Each employee should report to his/her emergency assignment with personal items necessary for 72 hours (e.g. personal articles, toiletries, change of clothing, medications, special non-refrigerated dietary foods, blankets/sleeping bag, etc.)

C. WARNING.

1. WCC receives warnings regarding technological and natural hazards which may affect the county.
 - County outdoor warning sirens are activated, if needed.
2. WCC notifies by pager or telephone:
 - a. Emergency Management who activates the Emergency Management alert list.
 - b. All county pager holders.
 - c. Local Law Enforcement Agencies and fire departments who activates local sirens and notifies the Chief Elected Officer of the municipality.
3. The general public receives warning information by:
 - a. Activation of outdoor warning sirens.
 - b. Local broadcasts or printed media.
 - c. Door-to-door notification by emergency services personnel.
 - d. Mobile public address systems.
 - e. Plectron and weather alert radios.
 - f. Mass Notification System.
4. Functional needs groups receive information by:
 - a. Door-to-door warnings for handicapped, visually and hearing impaired.
 - b. Foreign language media messages.
 - c. Closed-caption television messages.
5. Upon notification of a warning (imminent or spontaneous event), each department will initiate internal notification actions to:
 - a. Alert employees assigned to emergency duties as appropriate to the situation:
 - Suspend or curtail normal business activities.
 - Recall essential off-duty employees.
 - Send non-critical employees home.
 - Secure and evacuate the department's facilities, if warranted.
 - b. If requested, augment the County 's effort to warn the public through use of vehicles equipped with public address systems, sirens, employees going door to door, etc.

Attachment 2
EVACUATION AND SHELTER SOP

A. EVACUATION DECISION.

1. Evacuation is normally ordered by the County Executive or the Executive Group of the affected political jurisdiction.
2. If immediate evacuation is critical to the continued health and safety of the population, the Incident Commander may order an evacuation (hazardous materials spills or fires).
3. The line of succession for evacuation recommendations is:
 - a. Executive Group/County Executive.
 - b. Sheriffs Department.
 - c. Municipal fire or law enforcement officials.

B. DIRECTION AND CONTROL.

1. During a large scale evacuation and/or shelter situation, the EOC Human Services Branch, under the direction of the Executive Group, coordinates and monitors shelter activities.
2. Evacuation and shelter information is accomplished through the use of the county warning and communication system.
3. If the Emergency Operating Center is activated, the EOC supports direction and control of the incident by the on-scene Incident Commander (IC).

C. EVACUATION ORDER.

1. Evacuation orders are initiated after on-site evaluation and recommendation by the appropriate authorities.
 - a. The affected population is not to be moved into a more dangerous situation than posed by the primary hazard.
 - b. The evacuation area is defined in terms clearly understandable by the general public.
 - c. On slow-moving events, pre-evacuation notice is given to affected residents as hazardous conditions warrant such action.
2. When ordering an evacuation, the following considerations should be addressed:
 - a. Weather and highway conditions.
 - b. Evacuation routes, their capacities, and susceptibilities to hazards.
 - c. The availability and readiness of shelters for evacuees.
 - d. Modes of transportation for evacuees and for those unable to provide their own.
 - e. Functional needs groups.
 - f. Time required to complete evacuation vs. time to onset of disaster conditions.

D. EVACUATION ORDER DISSEMINATION.

1. Affected jurisdictions use appropriate Waukesha County warning modes to direct the population to evacuation and/or seek shelter.

2. Evacuation and/or shelter information is provided to the Waukesha County Public Information Officer (PIO) for immediate dissemination.
 - a. The Waukesha County PIO keeps local media sources updated on all evacuation and/or shelter information.
 - b. Local television and radio stations broadcast current evacuation and/or shelter information.
 - c. Law Enforcement Agencies and Fire and Rescue Services may go door-to-door to warn evacuees.

E. TRAFFIC CONTROL.

1. Law Enforcement Agencies maintain traffic control:
 - a. Traffic points, assembly areas, and reception centers are designated.
 - b. Rest areas are established along evacuation routes to provide the necessary aids. Evacuees are able to obtain fuel, water, medical aid, vehicle maintenance, and emergency information at designated rest areas.
 - c. Law Enforcement Agencies and the Waukesha County Public Works Department coordinate assistance to those vehicles having mechanical problems or abandoned.

F. SHELTER OPERATIONS.

1. Shelter activities are coordinated by the EOC Human Services Branch who:
 - a. Determines which shelters should be open.
 - b. Coordinates dissemination of shelter information to the PIO.
 - c. Coordinates reception and shelter activities with American Red Cross.
 - d. Assign trained managers and staff to all public reception centers and shelters prior to opening them.
2. The American Red Cross, Southeastern Wisconsin assists with mass care activities.
3. Sheltering operations are coordinated through the Shelter Officer.
 - a. Determines which shelters should be open.
 - b. Coordinates dissemination of shelter information to PIO.
 - c. Reception center personnel register and assign evacuees to shelters.
 - d. American Red Cross personnel coordinate shelter activities.
 - e. Local Law Enforcement Agencies officers and/or volunteers are assigned as security to congregate care facilities.
 - f. Responsible for crisis upgrade of shelters.

G. RE-ENTRY.

1. The re-entry decision and order are made by Incident Commander or Executive Group after the threat has passed and the evacuated area has been inspected by Fire and Rescue Services, Law Enforcement Agencies, Public Works, and local utilities for safety.
2. Re-entry of an evacuated area requires coordination and direction of evacuees from the area by Law Enforcement Agencies.
3. When ordering re-entry, the following considerations are addressed:
 - a. Insure that threat is over.

- b. Insure homes have been inspected and are safe to return to.
 - c. If homes have been damaged, determine any long-term housing needs.
 - d. Determine number of persons in shelter who will need transportation to return to their homes.
 - e. Inform public of proper re-entry procedures and remaining hazards.
 - f. Coordinate traffic control and movement back to the area.
 - g. Issue proper clean-up instructions.
4. PIO should coordinate and disseminate public information through the local media on re-entry procedures.

Attachment 3
ACCESS AND FUNCTIONAL NEEDS POPULATIONS

EVACUATION SHELTERING, RE-ENTRY

General Evacuation Issues

1. Issues that have greatest impact on those with access and functional needs include notification, evacuation, emergency transportation, access to medical care and medications, access to mobility devices or service animals while in transit or at shelters and access to information.
2. Access and functional needs populations must be identified, so neighbors, couriers, or the police can make personal contact with them to ensure they are aware of the alert conditions. These groups include, but not limited to those with; physical and/or mental impairments, the elderly, homeless individuals, non-English speaking individuals, etc.
3. Agency support for identifying access and functional needs populations include Waukesha County HHS, ADRC, Public Health, Community Based Organizations, state and federal agencies.
4. Access and functional needs populations have a greater vulnerability to disasters and consideration must be given high priority for evacuation and sheltering actions. This also includes institutional groups and other congregated populations.
5. Evacuation SOP's need to ensure all residents have access to public education and information materials in appropriate formats, tailored to access and functional population needs, both prior to and during the event.
6. Warning procedures should ensure that all residents, including the blind or those with low vision, and the hearing impaired receive information in an appropriate format. Often this will require several forms of alert and notification and may even include sign language interpreters on local media channels.
7. Some access and functional needs populations will not or cannot comply with mandatory evacuation orders, because of transportation constraints, mobility impairments, or for a variety of other reasons.

TRANSPORT

1. Transportation demands of access and functional needs populations can vary and requires careful planning and assessment of types of transport required, since type of transport provided can expedite or complicate the process. In addition, collaboration between providing agencies is critical, since response vehicles may have to be acquired from a variety of public and private agencies
2. First responders should be trained to recognize cognitive impairments by routinely screening for signs of confusion among evacuees and other signs.

SHELTERING

1. Shelter staff should be trained to work with people with disabilities, including those with guide or service animals.
2. SOP's for sheltering and transport should include, but not be limited to; accommodations for walkers, wheelchairs, crutches, people with scooters, and bedridden populations.

3. Access and functional needs shelter may have to be identified and utilized for large-scale evacuation
4. Shelter security plans should include procedures for addressing loss of Law Enforcement Agencies during and following hazardous events.
5. Coordinating efforts with social service agencies to provide intervention counselors at shelters will help reduce stress on evacuees, especially those with medical needs who may be without familiar services.
6. Individuals with access and functional needs and associated care takers may choose to or have to shelter-in-place during emergencies, because of the potential trauma associated with acquiring needed resources at the shelter.
7. Issues may arise if the person is unable to effectively react to hazardous conditions.

RE-ENTRY

1. Access and functional needs populations may require additional follow-up counseling measures in schools or other institutions, due to trauma from evacuation and sheltering issues.

Attachment 4
EVACUATION PLANNING FACTORS

A. COUNTY WIDE EVACUATIONS.

Should it be necessary to evacuate Waukesha County for county-wide events (i.e. hazardous materials accident, weapons of mass destruction event), the Waukesha County EOC will coordinate its efforts with other local jurisdiction EOCs.

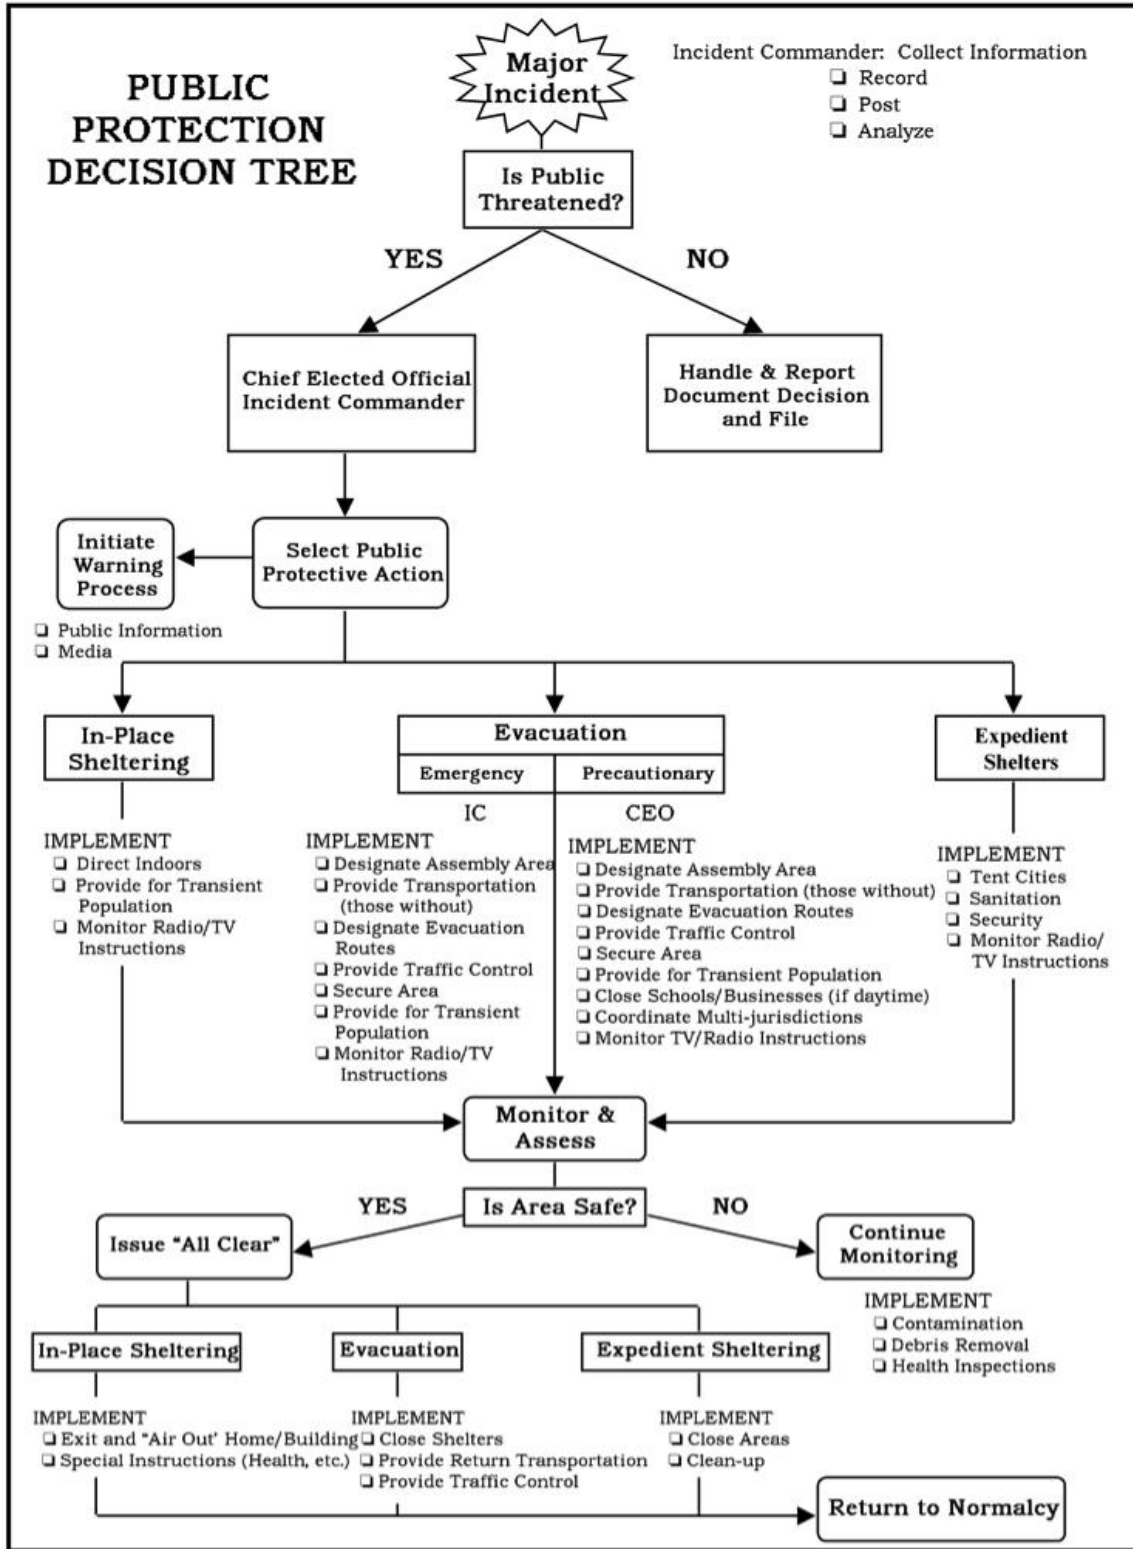

B. NEIGHBORHOOD OR AREA EVACUATION.

Certain events can occur with little or no warning (i.e. hazardous materials event, large fire, hostage/terrorism event) requiring immediate public protection efforts. A “time and circumstances” evacuation plan will be implemented by the Incident Commander at the scene, with support by the Waukesha County EOC as requested and time allows. The following planning factors should be considered in preparing an evacuation plan:

1. Consider the characteristics of the hazard/ threat: magnitude, intensity, speed of onset, duration, impact.
2. Determine area to be evacuated.
3. Establish a perimeter. Consider special equipment:
 - Barricades with flashing lights.
 - Barricade tape.
 - Evacuation route signs.
4. Determine the number of people to be evacuated, time available in which to effect the evacuation, and the time and distance necessary to insure safety.
5. Establish entry and exit control points.
6. Identify functional needs populations:
 - Schools.
 - Day care centers.
 - Nursing homes.
 - Handicapped persons (hearing, sight, mentally, mobility impaired).
 - Non-English speaking persons.
 - Hospitals, health care facilities.
 - Jails, juvenile facilities.
 - Transient populations (street people, motel/ hotel guests).
 - People without transportation.
 - Animals: Kennels, veterinary hospitals, zoos, pet stores, animal shelters, farm animals.
7. Identify assembly areas for people without transportation.
8. Estimate numbers of people requiring transportation.
 - Remember functional needs populations.
9. Identify evacuation routes. Consider: traffic capacity, risk areas.
10. Identify mass care facilities, safe areas.
11. Consider need for animal control, care, evacuation.
12. Plan for “what ifs,” i.e. vehicle breakdowns, bridge/ road damages, secondary hazards along evacuation routes, etc.
13. Plan for security: Perimeter control, property protection, etc.
14. Minimize family separation. Consider how to reunite families.
15. Is an “evacuation order” from the local elected official(s) needed?
16. Determine reentry procedures.
17. Issue specific evacuation instructions to include:
 - Situation: Emphasize hazard/threat/risk.
 - The life/death consequences for not evacuating.

- Services that will be discontinued or interrupted within the evacuation area.
 - Legal consequences for re-entering the area.
 - Identification of the specific area(s) to be evacuated.
 - List of items that evacuees should take with them (such as food, water, medicines, portable radio, fresh batteries, clothing, sleeping bags).
 - Departure times.
 - Pickup points for people requiring transportation assistance.
 - Evacuation routes (give easy to understand instructions using major roads, streets, highways, rivers, etc.)
 - Location of mass care facilities outside of the evacuation area.
 - Where family members go to be united.
 - How functional needs populations are being assisted.
 - What to do with animals. –Keep animals secured, on leash, etc.
18. Remember to keep evacuees and the general public informed on evacuation activities and the specific actions they should take.

Attachment 5
PUBLIC PROTECTION DECISION TREE

Attachment 6
ALERT/WARNING/NOTIFICATION SYSTEM

A. SYSTEM DESCRIPTION.

1. National Warning System (NAWAS).
 - NAWAS is a nationwide private telephone communications system funded by the Federal Emergency Management Agency. It operates on three levels of government: Federal, State and Local. The system has network nodes located at strategic locations in each state. States, in turn, coordinate a system connecting system nodes in various counties. The primary warning point for Waukesha County is the WSP District 3 and is monitored on a 24 hour basis.
2. National Weather Service (NWS).
 - Current weather information and warnings are received over the NAWAS and internet computer products. Radio broadcasts are received over the NOAA weather radio broadcasting from Missoula, MT.
3. Emergency 911 Communications Center.
 - The 911 Emergency System is a locally operated telephone system capable of receiving emergency information from the public and disseminating such information to the various emergency response agencies, such as police, fire and rescue units within the local area.
4. Outdoor Warning System.
 - Waukesha County does not possess a designated outdoor warning siren system. Siren systems are owned, maintained and operated by and at the discretion of local municipalities. However, outdoor sirens are positioned in several locations within Waukesha County. Activation of the outdoor warning sirens can be accomplished by the 911 Communications Center serving the specific jurisdiction.
5. Flood Warning System.
 - The National Weather Service has a network of rain and river gauges that are strategically placed on regional rivers and collect data used for flood warning purposes.
6. SkyWarn.
 - Project SkyWarn is a national program designed to place personnel in the field to spot and track severe weather and Waukesha participates in the program. These field personnel are trained by the National Weather Service in basic severe weather meteorology, and in how and what to report to the proper officials. During periods of severe weather, the spotters are dispatched to the field and relay reports to the NWS or the EOC. If the EOC is activated, it disseminates the appropriate warning. Trained severe weather spotters maybe activated in Waukesha County.
7. Emergency Alert System (EAS).
 - The Emergency Alert System is composed of AM, FM, and TV broadcast stations and non-government industry utilities operating on an organized basis during emergencies at national state, and local levels. It provides for the alerting of participating stations, dissemination of standardized emergency information, and/or

termination of non-emergency station activities until the emergency subsides.

- The FCC, in conjunction with Federal Emergency Management Agency (FEMA) and the National Oceanic and Atmospheric Administration's National Weather Service (NWS), implements the EAS at the federal level. The President has sole responsibility for determining when the EAS will be activated at the national level, and delegated this authority to the director of FEMA. The EAS provides an official means for supplying emergency information to the public. Local radio and television broadcast stations participate in EAS based upon a contractual agreement between the station and the FCC.
- In cases where there is an immediate threat to life or property that justifies immediate notification of the public, local emergency management officials may choose to issue a Civil Emergency Message (CEM) through EAS.
- Procedures for EAS Activation for Non-Weather Emergency Messages (State or Local):
 - A Designated local Official identifies a risk to life or property that justifies immediate notification of the general public;
 - Designated local Officials create a message for dissemination;
 - Message is provided to appropriate National Weather Service (NWS) office(s), by fax or verbally. Activation of the EAS for Waukesha County is facilitated through the WTMJ Channel 4;
- Authentication and Issuance
 - WTMJ authenticates by calling back and confirming message with Designated Official or dispatch;
 - WTMJ enters and sends out the message, activates EAS;
 - _____ may also broadcast messages over NOAA Weather Radio;
 - Broadcasters receive message from WTMJ and can automatically broadcast message over radio and television networks, even those that are unattended;
 - NOAA Weather Radios automatically alarm.

8. Print Media and Electronic Media.

- When time is sufficient, warnings and emergency information are provided through the print and electronic media, and the County of Waukesha's web page.

9. Neighborhood Warning Procedures.

- In some instances, additional warning must be provided to certain areas. Methods used include, but limited to, vehicle mounted public address and door-to-door warning.
- Law Enforcement Agencies and fire service vehicles, which are equipped with sirens and/or public address systems, will augment fixed warning devices.

10. Amateur Radio Network (ARES/RACES).

- This network provides a means to disseminate emergency public protection messages to various local and statewide amateur radio users and groups. This system supplies a vital radio communication link between the EOC and local governments throughout the state.

11. NIXLE.

- NIXLE is a public notification system intended to alert residents to emergency weather, road closings, public safety advisories, and natural or man-made disasters through mobile telephone text messaging. The authorized administrators are the Law Enforcement Agencies Department and the Homeland Security and Emergency Management Agency.

12. Mass Notification System (MNS).

- MNS is operated by Intrado, a corporation that provides 911 operations support systems services to incumbent local exchange carriers, competitive local exchange carriers and wireless carriers. The EPNS system is activated via web interface or by calling their emergency call relay center. EPNS calls the phone lines identified in the 911 database within specified geographic area. EPNS is also capable of utilizing pre-loaded calling lists.

13. Health Alert Network.

- The Health Alert Network (HAN) is a strong national program, providing vital health information and the infrastructure to support the dissemination of that information at the State and Local levels, and beyond. The HAN Messaging System currently transmits Health Alerts, Advisories, Updates, and Info Service Messages.

14. 511 System.

- The State Department of Transportation operates a traveler advisory system accessible by calling 5-1-1. The system can be used to advise motorists on state highways of travel related information or warnings.

15. Cable Television Interrupt System (CTIS).

- CTIS enables emergency management officials to override the audio being broadcast on local cable providers with scripted emergency messages. This capability is only available in jurisdictions served by cable TV services.

B. SYSTEMS TESTING.

1. Components of the warning system are tested on a regular basis, some daily, weekly, or monthly.

Emergency Support Function (ESF) # 23

Debris Management

Emergencies may create a variety of debris that impact the County's ability to provide emergency response and may affect the health and safety of the public. Clearing debris to permit travel emergency vehicles and removal of debris to protect health and safety are vital components of the County's emergency response.

Primary Agency

Water and Wastewater Utilities

Federal

NOTE: Though there is no Federal ESF # 23, likely support from Federal ESFs # 3 and # 10 includes:

Likely Support Includes:

- Manage, monitor, and/or provide technical advice in the clearance, removal, and disposal of debris from public property. The scope of actions related to debris may include waste sampling, classification, packaging, transportation, treatment, demolition, and disposal.
- When ESF #3 is activated for a debris mission may also: collect, segregate, and transport to an appropriate staging or disposal site hazardous materials that are incidental to building demolition debris, such as household hazardous waste and oil and gas from small motorized equipment; remove and dispose of Freon from appliances; and remove, recycle, and dispose of electronic goods. (The removal of hazardous material containers that may have become intermingled with construction debris, such as drums, tanks, and cylinders containing oil and hazardous materials, is managed under ESF #10.)
- Management of contaminated debris (e.g., chemical, biological, radiological, or nuclear contamination) will be a joint effort with ESF #10 and FEMA. The scope of actions related to contaminated debris may include waste sampling, classification, packaging, transportation, treatment, demolition, and disposal of contaminated debris and soil.

A. PURPOSE.

1. To provide for the coordination of emergency road clearance, debris collection and disposal.

B. POLICIES.

1. Debris clearance is critical to life safety and security. Debris removal efforts will first focus on clearing of major transportation routes and roadways into damaged areas to allow for the movement of emergency vehicles, personnel, equipment and supplies.
2. Debris removal is necessary in affected areas to prevent the development and spread of vector-based epidemiological agents, general sanitation problems and environmental damage.
3. All disposal activities will be conducted with health and environmental concerns being the foremost consideration.

4. Waukesha will encourage the use of contracted services.

PUBLIC WORKS RESPONSIBILITIES/TASKS BY PHASE	
Pre-Emergency	<p>Work with the Office of Emergency Management to:</p> <ol style="list-style-type: none"> 1. Maintain this Emergency Support Function (ESF). 2. Maintain inventories of resources and equipment. 3. Participate in tests and exercises. 4. Develop emergency action checklists and Standard Operating Procedures (SOPs). 5. Maintain pre-event contracts to support debris management needs in an emergency. 6. Work with ESF # 1 to establish and maintain priorities for roadway corridors that will have priority in regard to debris removal and repair to allow access into damaged areas. 7. Develop and maintain a Debris Management Plan; Coordinate development of the plan with Public Works & Engineering ESF # 3. Plan content should include strategies for: <ol style="list-style-type: none"> a. Debris clearing. b. Debris collection. c. Identification of temporary storage and areas. d. Recycling. e. Disposal. f. Hazardous waste identification and handling. g. Administration. h. Dissemination of information to the public. 8. Pre-identify means of transporting the debris if normal channels are unavailable. 9. Establish pre-event working relationships and understandings with neighboring jurisdictions and contractors. 10. Establish and maintain a comprehensive record keeping system for continuous updating and recording of debris numbers. 11. Maintain mutual aid agreements.
Emergency	<ol style="list-style-type: none"> 1. Implement the Waukesha County Debris Management Plan; Coordinate debris operations. 2. Send a senior representative to the Waukesha EOC, when the EOC is activated during an emergency. 3. Coordinate with ESF # 3 for emergency road clearance and removal of debris for reconnaissance of the damaged areas and passage of emergency personnel and equipment for health and safety purposes. 4. When notified, report to the Waukesha County EOC. 5. Administer and manage contracted services. 6. Coordinate emergency road clearance and removal of debris for reconnaissance of the damaged areas and passage of emergency personnel and equipment for health and safety purposes.
